

Married At First Sight Chapter 3139

Married At First Sight Chapter 3139-Tania had never paid attention to Serenity's company size. She only knew that Serenity's vegetable company had already gotten its business on the right track and cooperated with many big hotels, schools, and large groups.

She also knew that what Serenity valued most was the quality of the vegetables. She tried her best to use farmyard manure on the vegetable farm and bought it everywhere. She also needed to use as little as possible when using pesticides. The people responsible for managing the vegetable farm all have ten talents. People with more than a few years of experience growing vegetables.

Serenity suggested that the major schools' canteens should receive the vegetables from her company. Students were the flowers of the motherland and its future. She couldn't cheat students just to make money, so she must make sure that they can eat with confidence.

If she goes to the market, she will pick up some vegetables and return to eat.

She always ate vegetables grown in the market as a boss. She picked all the vegetables she wanted to eat from the market for both her company's canteen and the market canteen.

Who dares to inject medicine into the food that goes into his own stomach?

Don't be careful, no matter how careful you are.

Although this has resulted in the vegetables in the market not growing so fast, it cannot stop Serenity and others from being wealthy and renting a lot of wasteland. They have several large markets and grow a lot of various vegetables in batches, which can guarantee supply to major customers.

Now that Serenity and Jasmine are pregnant, it's inconvenient for them to run around. Their men don't want them to run around anymore, which is the main reason.

Although Elisa could still talk about business everywhere, she was a wealthy lady after all, and her understanding of fields, vegetables, and other crops was not as good as Serenity's.

She was mainly responsible for negotiating business.

Consequently, the company has not yet added any food markets. The current few large food markets are maintaining the normal operation of the company. However, Elisa has already inspected all the available land. As long as there is wasteland and there is a large amount, she will discuss it with the two partners. Then Serenity will take the time to follow her on a business trip to see the fields and then sign a lease contract to build a new one. The new farm will be used for planting vegetables.

Since the farms are all rented fields and are not long-term, the three owners have discussed it, and now their company has already started to make profits. They will invest the money they make in other businesses.

This way, when the vegetable company closes down in the future because it can no longer rent the fields, they will still have other industries, and the focus will be on investing in other projects.

“You are right. Our Serenity started its own business and created a new generation. Elora took over the family business and belongs to the wealthy generation, which is different from Serenity. Serenity will take over many small businesses in our family in the future. After a long period of experience, she will become stronger than she is now.”

Tania felt relieved and less concerned that her second daughter-in-law would overshadow her eldest daughter-in-law after receiving comfort from her husband.

The sixth brother, Tatum, and the eldest brother, Zachary, had a good relationship, and Tania hoped their wives would get along well with each other in the future.

She trusted the old lady's vision. After she comforted herself, she said to her husband, “We will give more of our private property to Serenity. Zack is the eldest son, and Serenity is the eldest daughter-in-law. In ancient times, most of the family property was inherited by the eldest son.”

Liam smiled and said, "Private property belongs to both of us. No matter how we divide it, the children will not have any objections. Just be afraid."

"What are you afraid of? Are you afraid that Tatum and the others will have objections?"

Liam said, "I'm afraid that none of our sons will want our family property. Our two daughters-in-law are not lazy people. They are both women of the new era. They can make money and are responsible. I'm afraid they never thought about inheriting our family property. Where's the family property?"

People from other families may worry that the younger generation is always thinking about dividing the elders' property. But in the York family, the elders really don't have to worry about that. Instead, they have to worry about the younger ones not wanting their money.
