

## Read I am a quadrillionaire

I am a quadrillionaire chapter 2857-A level 8 civilization not far from Leila.

At this time, this place had become a hell.

Countless living planets had turned into dead stars, continents were fragmented, and all life had become extinct.

Lufian was the one who caused this.

The fusion of his dual souls allowed him to quickly increase his strength by devouring all life.

He could also devour the life of planets and continents, not just animals and plants.

Once he started, he could not stop.

In other words, Lufian will become a complete devil from now on.

Wherever he passed, mountains would collapse, and the ground would be torn apart. At the same time, all lives would go extinct.

Lufian could already start devouring when his souls were fused, but at that time, he still had a sliver of kindness and was unwilling to use it.

However, he was aware of David's existence now. In addition to that, he not only fought with David and got seriously injured, but he also became Leila's public enemy.

Even his favorite woman, Elora, had betrayed him. So Lufian no longer had any scruples. After recovering from his injury by 30%, he immediately used Devour to absorb all the vitality from this level 8 civilization.

The continent was in tatters. Living creatures became dry bones, and the planet became a dead star.

After devouring the entire level 8 civilization, Lufian fully recovered from his injuries and made a qualitative leap in strength.

He was promoted from beginner Heavenly Overlord to mid- Heavenly Overlord.

One must know that in Heavenly Overlord Rank, every small step forward was full of difficulties.

If one did not use unique methods or have no chance encounters, the time needed to upgrade from beginner Heavenly Overlord Rank to mid-Heavenly Overlord Rank would be measured in epochs.

However, how long did Lufian take?

According to logic, this was impossible, yet Lufian achieved this.

This was the power of Devour.

Huff!

After exhaling, Lufian opened his eyes, and a dark beam escaped from his eyes, igniting the void in front of him into flames.

What kind of eyes were those?

His eyes were all black, like two tiny black holes.

If an ordinary person saw his eyes, their vitality would be instantly devoured.

After displaying a sinister grin, Lufian let out a spine-chilling sound.

“Tch, tch, tch... How powerful! This power is so mesmerizing! Devour lives up to its name indeed. Not only did it cure my injuries quickly, but it even improved my strength drastically and made me a mid-Heavenly Overlord. My strength can even go up to peak Heavenly Overlord after I go berserk! With this, there will be a place for me in the universe, no matter how big it is! David, Sylvio, Elora, all of you should go to hell!”

In the end, Lufian’s voice was filled with hatred.

As one of the five Leila rulers, he was kicked out without any prior notice.

How much blood and sweat had he sacrificed for Leila’s protection in the past hundreds of epochs?

Especially in the battle with the Robotias. Aside from Sylvio, Lufian was the one who sacrificed the most.

After destroying the Robotias, he even got seriously injured.

Yet, this was what he got.

Coupled with Elora's betrayal, Lufian would never be able to accept this.

A mid-Heavenly Overlord was enough to deal with David, right?

It had only been a few short years, so David probably had not recovered 30%.

So, this was the best time to destroy David and devour Leila.

After devouring Leila, Lufian figured he could be a peak Heavenly Overlord.

Then, after devouring some more, he could soon surpass Overlord Realm and become an Almighty.

"David, Sylvio, Elora, I'm coming. Are you ready to be my food? I wonder if you'll feel remorse when I start devouring and destroying everything in Leila."
