

Read I am a quadrillionaire chapter 2751-2753

I am a quadrillionaire chapter 2751-The Elves returned from the small valley, bringing the Vingean head and the Vingean elites.

After David crippled them, they completely lost their fighting ability. They could not even defeat an ordinary Elven woman,

so they couldn't escape.

Queen Isa did not kill the Vingean immediately.

Of course, she would not spare them either.

After all, there was deep hatred between the two races, so the Elves wished death upon all Vingean.

However, she did not choose to kill them because she was waiting for an opportunity to execute them at the Elves'

sacrificial ceremony.

It was a grand event to worship the Elves' ancestors once every hundred years.

So, executing the Vingean in the sacrificial ceremony was Isa's offering to the Elves' ancestors.

The hatred between the two clans for generations was finally coming to an end.

Moreover, it also ended in her hands.

Although the Elves did not do it themselves, did it matter?

As long as they could get revenge, how they did it was unimportant.

The Elves should take advantage of this opportunity to wipe out the Vingean in one fell swoop, lest the other side regain their strength and make a comeback in the future.

However, the Misty Forest was too extraordinary.

The Elves could not even tell the direction when they went in, let alone find where the Vingean lived.

There was nothing Isa could do about it.

Fortunately, with David's promise and those three clones, even if the Vingean regained their peak strength, the Elves could defeat them if they dared to leave the Misty Forest.

The news that the head of the Vingean and most of the elite of the Vingean was defeated also spread among the Elves.

As a result, the entire clan was joyful.

Nothing excited the Elves more than revenge.

Inside a tall tower in the clan, Isa sat on the throne while the elders of the Elves were below her.

Everyone looked excited.

In fact, they were the actual controllers of the clan and even had the power to depose the Elven Queen.

Yet, that was before.

Starting today, Isa would become the first queen in the history of the Elves to have complete control of her clan.

Even if the Elders' Council wanted to remove her, they could not.

When Isa brought back the Vingean head and elites, her prestige reached its peak.

Even the respected elders of the Elders' Council could only hope to catch up with her.

"Isa, did you really capture the Vingean head?" one of the elders asked impatiently.

The other elders all looked expectant.

"Didn't you know?" Isa replied calmly.

This was the first time she had a dominant and psychological advantage against The Elven Elders' Council.

I am a quadrillionaire chapter 2752-This was the first time she had seen these old, stubborn people showing such expressions.

"Those are all spread by the people, so they are not convincing. We want to hear it from you," another elder added.

'Yes! We need you to say it yourself.'

"In that case, I'll tell you then. Not only have we captured the head of the Vingean, but we have also captured most of the Vingean elites, and they are all crippled at this moment. I didn't kill them because I planned to use the blood of the Vingean to honor the Elven ancestors at the sacrificial ceremony," Isa said in a deep voice.

As soon as she said that, the scene fell into silence.

After a while, an elder shouted excitedly, "Hahaha! Very good! Great! Isa, It seems we were right to overcome all difficulties and ignore the people's objections below to make you the queen! You didn't disappoint us!"

The other elders also showed excited expressions.

They were all highly respected older people in the clan, and most had also served as the head of the Elves.

One could regard the Vingean as their nightmare.

This nightmare that had plagued the Elves for generations had been solved, so how could they not be excited?

"Isa, can you tell us in detail how you did it? The head of the Vingean and more than half of the Vingean elite are no joke. With their strength, they can completely destroy our clan," an elder asked politely.

Isa's behavior had completely conquered these stubborn elders.

They only heard that Isa had led her people to capture the head of the Vingean, so they immediately came to Isa to confirm. They did not know much about the specifics of what happened.

How could the person responsible for the rumor know the whole story?

“I will describe the specific process to you later. Before that, I have something very important to tell you,” Isa said seriously.

“What is it?”

“I gave away the Elves’ inherited bow!”

As soon as Isa finished speaking, the elder asked loudly in shock. “What? Y- You gave away the inherited bow?”

‘Yes! I gave it away!’ Isa confirmed again.

“You... You... You...” An elder pointed at Isa, but for a long while, they were speechless

Typically, Isa would be bombarded by The Elven Elders’ Council if she said something like that.

They might even directly depose her as the Elven Queen. However, now, it was different.

Isa had just captured the Vingean head and most of the elites. Moreover, she had avenged the blood feud of the Elves.

Her prestige had reached its highest point among the clan, far more than these elders.

Now, if Isa’s position were to be deposed, no clan member would agree.

“Isa, did you use the bow as a bargaining chip to get a big shot to come out and help you capture the head of the Vingean?” The person who asked the question was the great elder of the Elves.

At the same time, she was also the leader of the Elders’ Council and had high prestige.

‘Yes and no,’ Isa replied ambiguously.

“Isa, stop keeping us in suspense. I know you must have had no choice but to give away the bow. Tell us what happened in detail! If you really use it in exchange for the head and elites of the Vingean, we won’t blame you, but

have you considered that without the bow, can we still deal with Leila's major forces safely? This is a lose-lose situation. At the end of the day, as the Elven Queen, you should consider the interests of the entire clan rather than making the Elves passive

just to vent your anger at the moment," the Great Elder said solemnly.

As the great elder of the Elves, she was naturally very aware of the current situation of the Elves.

The various policies implemented by Isa were indispensable to the Elves' achievements today, but the inherited bow also played a significant role.

Once the intimidation of the inherited bow was gone, the future of the Elves would be challenging.

"Great Elder, do you know who I gave the bow to?" Isa asked.

"Who?" The great elder was confused.

I am a quadrillionaire chapter 2753-"An Overlord!"

Upon hearing this, the members of The Elven Elders' Council present, including the great elder, were stunned.

They thought Isa had used the Elves' inherited bow to invite a partial Overlord to come out.

However, it turned out to be a real Overlord.

Was this possible?

Everyone figured it was impossible.

What kind of existence was an Overlord?

They were already at the pinnacle of Leila.

There were only five Overlords in the entire level 9 civilization Leila, and they had long since stopped caring about the world.

Even the Elves' inherited bow would not be enough to invite them.

Moreover, it was already so difficult for the partial Overlord to meet the five Overlords, so how did Isa invite an Overlord?

“Isa, are you telling the truth? You must know that when it comes to the Overlords, you cannot say anything casually;

otherwise, it will be a crime of disrespect,” the great elder said solemnly.

“Don’t worry, Great Elder! Since I dare to say this, I dare to take responsibility for it. I’m not scared even if news gets out,”

Isa replied seriously.

“Then which of the five Overlords did you get?”

“None of them.” Isa shook her head.

“None of them? Isa, are you sure you are not joking?”

Everyone knows that Leila only has five Overlords. Now you are telling us you had an Overlord’s help, but it’s not one of the five Leila rulers? Isn’t this a contradiction?” The great elder felt like she was being taken as a fool.

“Great Elder, as the saying goes, there are always people better than you. Are you 100% sure that Leila only has five Overlords? If there are five Overlords, why can’t there be a sixth? Can’t some Overlords like to keep a low profile and like to hide in the dark?” Isa asked.

The great elder was left speechless.

Leila only had five Overlords, and everyone knew that.

However, she could not exclude the possibility of a sixth one.

“Isa, how can you be sure that the other party is a real Overlord and not a partial Overlord?” The great elder asked.

“I don’t think a partial Overlord can so easily catch an arrow shot by my bow’s source and also cripple the head of the Vingeans and most of the elites in an instant. You know the head of the Vingeans is not weak, and he also personally admitted that he is an Overlord...”

“Then can I meet him?” The great elder looked expectant.

“I can’t promise you anything. I must get Master David’s permission before I can take you to see him.”

“Is he still in the clan?”

“Of course! He will not leave until he has attended the sacrificial ceremony.”

Next, Isa told them what had happened without missing any details.

She did not say that it was her plan and only said that David’s arrival was a coincidence.

During the whole process, the Elven Elders’ Council breathed in relief.

If Master David had not appeared in time, the Elves would probably have suffered heavy losses.

“Isa, have you thought about the future of the Elves? Without the bow, the Elves will have their deterrence. Of course,

even if we still have the bow, you have activated the last source, so it’s considered useless. How can the Elves continue to survive?” The great elder asked worriedly.

The other elders also looked worried.

It was certainly satisfying to avenge the Vingean, but what would happen to the Elves in the future?
