

# Married At First Sight Chapter 4228

---

## Chapter 4228

Elisa replied, "Let's push the meeting to tomorrow. I need to go to the hospital. Jasmine just had a baby—a boy, 6.32 pounds. Both mother and child are doing well."

The secretary smiled. "I'll give her a call to congratulate her."

She had no intention of tagging along. Elisa was the boss, and unless she was invited, she'd visit Jasmine on her own time.

Elisa headed out excitedly.

A Maybach was parked outside. Remy, seeing her, rolled down the window and waved.

Elisa walked over with a bright smile. "Why didn't you come inside?"

Remy got out of the car. "I just got here and saw you coming out, so I waited. Where are you headed?"

"Jasmine had her baby! I'm going to the hospital to see her and the little one. You came at the perfect time—let's go together. But first, let's pick up some gifts."

Remy immediately opened the car door for her. As he got in, he asked, "Wasn't Jasmine's due date still a month away? Why did she deliver early?"

It wasn't that Remy kept track of other women's pregnancies, but Elisa had mentioned it so often that he remembered.

"She went into labor early. Serenity happened to be at the hospital for a checkup and found out. Thankfully, both mother and baby are fine. The baby was placed in an incubator for observation but is doing well and is now with Jasmine."

Elisa smiled. "It's great news! I have to see them."

As Remy drove, he mused, “Strange. Josh loves posting about his wife online. He shares their daily life constantly, but now that he’s a dad, he hasn’t posted anything.”

Elisa hadn’t added Josh on social media—he was her friend’s husband, after all. She only had his contact for business reasons.

“Maybe he’s too busy to post,” she guessed.

What she didn’t know was that Josh had been so overwhelmed during the birth that he fainted from nerves. Posting on social media was the last thing on his mind.

His attention was solely on his wife. He had barely glanced at his newborn before rushing back to be with her.
