

Chapter 161

Those who were talking on the phone almost dropped their phones at once.

They looked at Melissa in disbelief!

What did they just hear?

The Hexaleaf was in the hands of the Genuine Care Medical Center?

F*ck!

How was that possible?

Nathan's smug face was contorted in horror as if he had just been smashed in the face!

As for the owners of the pharmaceutical companies, they all received reports from their subordinates on the phones.

"Boss, I just asked around. The suppliers of the Hexaleaf have agreed to sell their herbs only to the Genuine Care Medical Center."

All the answers were exactly the same. There was an audible pause in the hall at this moment.

The Genuine Care Medical Center!

It was the Genuine Care Medical Center again!

Not only did they monopolize the Heption Herb!

But they had also monopolized the Hexaleaf!

What would this mean?

This meant that all the Heption Herbs and the Hexaleaf were in their hands!

The Genuine Care Medical Center had the exclusive rights to name the price!

Everyone's eyes were bloodshot!

They patted their own heads hard!

That was right! Since they had known that the Hexaleaf could be used together with the Heption Herbs, of course, they would buy the Hexaleaf out!

The Genuine Care Medical Center was truly brilliant. No way they would allow such an opportunity to go by!

D*mn it!

They had taken one wrong step. All they ended up losing so much money!

Melissa looked at William, who was calm and relaxed. She recalled the day when William asked her to secretly purchase all the Hexaleaf available in the city.

At the time, she almost wanted to fight with William.

The Hexaleaf was no more special than normal herbs and wild grasses at that point in time.

Fortunately, Lydia stopped her.

Lydia could foresee what would happen as her prescription had been modified by William.

Lydia was puzzled to see that William added the Hexaleaf into the prescription.

It was William's plan to secretly acquire the herb that made Lydia connect the dots that the two herbs could neutralize each other's toxic effects.

The truth became clear at once after she gave it some thoughts.

William was the one who contributed the most to their achievement this day!

All the wealthy tycoons looked at William with a bitter face.

A while ago, they pleaded so hard at Felicity to transfer some of her Heption Herbs to them.

But now, the Hexaleaf was in the hands of the Genuine Care Medical Center.

They had no choice but to go back to the Genuine Care Medical Center again!

William saw this and tittered. "Rest assured, my friends. We will sell the Hexaleaf at the market price. After all, your presence here today has played a huge role. Believe in the Genuine Care Medical Center, we will not forget your aids."

They looked at William gratefully and could not help complimenting William again.

Watching this scene, Melissa heaved a sigh.

Only this little b*stard would be able to make such perfectly planned strikes, twice!

Well, who else would be able to do such a shameless thing?

William looked at Bernard, who was suppressing his anger, and stated, "Mr. Hsu, it seems that the second agenda of the day is to prosecute us, right? But, it seems to me that both the Genuine Care Medical Center and the Bai family are in the clear."

Bernard glared at William, feeling extremely frustrated.

He had no idea where this guy came from!

How dared he be so arrogant!

Wasn't he just a mere staff member of the Genuine Care Medical Center? Who did he think he was to pull an attitude here?!

The tables had only been turned because Melissa and Felicity instructed him to do so. He did not even contribute anything!

"He was just a messenger. How dare he put on an act in front of me!" Bernard thought.

"Are you sure you want to be so 'calculative'?" Bernard whispered to William.

He was obviously threatening William.

"Well, I don't think we are being 'calculative'. According to Nathan earlier, we shouldn't blame

innocent people. Neither should we let the guilty one escape," William replied with a smile.

Nathan's face turned even more livid!

He had literally shot himself in the foot!

"Are you sure you want to be my enemy? Do you know who I am?" Bernard hissed fiercely.

And when he was about to tell William his position in the pharmaceutical association, William answered coldly, "In my eyes, you are nothing!"

Everyone was shocked at what he said!

Melissa looked at William in horror. This little b*stard was so composed after being insulted and scorned at a while ago.

But now, why was he being so aggressive towards Bernard, who held such a high position and power?

Strange indeed.

William's reply had completely provoked Bernard!

Bernard scowled at William. "I see you got some guts! Our enmity starts today!"

The crowd noticed that Bernard was going to abuse his power, their eyes immediately lit up with red fury.

"Mr. Hsu, you've seen everything that happened just now. You should know better than us and be able to differentiate right from wrong!"

"The Bai family and the Genuine Care Medical Center are not only innocent but also kind-hearted. We should complement their good deeds," a lady shouted.

"As for that Zhao family, they have deceived the whole city and almost committed murder indirectly. If the Association doesn't look into this, then we will never back down until justice is served!"

The crowd exerted enormous pressure on Bernard; he could not afford to fight against the public.

Besides, the association president would step down next month. He couldn't afford slip ups at this period of time.

He stared at Nathan fiercely and said, "The Zhao family is indeed guilty. I now order Nathan to kneel down before the audience and the media to apologize on behalf of the Zhao family!"

Nathan glowered at Bernard.

However, Bernard's face remained cold. He then turned his face away, refusing to make eye contact with Nathan.

Nathan had made up his mind!

A real man knew when to yield and when to give in!

Kneel it was!

Bernard was obviously asking him to do this for the sake of the Zhao family.

As long as he knelt down, the Zhao family would not perish.

The crowd didn't understand Bernard's intention. At this moment, they were fueled with rage as they bellowed, "Kneel! Kneel! Kneel!"

In an instant, a cacophony of voices erupted in the hall!

Nathan was about to kneel down when a man suddenly pushed the crowd away and rushed in.

When they saw who the intruder was, the hall came to a deadly silence.

Shockingly, this intruder was none other than the head of the Zhao family, who had been absent since a while ago!

Lincon!

He ran all the way here!

Over the last few years, he had become so weak that even getting up a hill was difficult.

His shirt was soaked with sweat as it outlined his plump body.

He was trying to catch his breath.

He glanced at the crowd as he heaved a sigh of relief. He could hear the crowd chanting a while ago.

Were they asking someone to kneel down?

Thank goodness, he had managed to catch up!

Now it should be the moment when Nathan was challenging the Bai family and the Genuine Care Medical Center. He must have ordered them to kneel down and apologize.

Well, since the two families had strong support from higher-ups, it was not practical to ask them to pay a huge amount of compensation or go to jail.

Anyway, all these were but shows, aimed to strengthen the Zhao family's position.

They should spare the Bais and the Genuine Care Medical Center!

But... the punishment was inevitable.

The press conference this day related to the reputation of the Zhao family. Even if anyone were to question him how things turned out this way, he would say that the situation went out of control itself.

To have the Bais and the Genuine Care Medical Center to kneel down was just to please the public.

Thinking of this, he took in another deep breath. It was time for him to take over the conference.

He boomed, "I am Lincon Zhao! From now on, I will be in charge of the second agenda of the day.

08:35 

The Bai family and the Genuine Care Medical Center, I will show you mercy and spare your lives!"

He pointed to the side as he added, "As long as you kneel before us, we will forgive you. But in the future, remember me to show us some respect if we ever cross paths again!"

He then turned to the crowd. "Everyone who is present here, for the sake of our family's good deeds in the past few days, please do me this favor, would you please?"
