

## Chapter 164

"I will contact the relevant authorities to forbid all the pharmaceutical companies under the Zhao family to operate. Also, I will issue a notice under the name of the Qena City Pharmaceutical Association that the Zhao family will never be allowed to be engaged and involved in any fields that are related to medicine," Bernard announced loudly.

Nathan and Lincon's faces turned pale in an instant.

They were not allowed to engage in the pharmaceutical industry forever...

The Zhao family had been working in the pharmaceutical industry for generations.

If they couldn't be involved in that industry anymore, then wouldn't the connections and resources they had accumulated and garnered all this while be wasted completely?

Lincon's tears welled up in his eyes and he immediately knelt on the ground. "Mr. Hsu, we've been foolish and done silly things. But please show us some mercy, please! I'll kowtow to you."

Bernard looked at Lincon detachedly and said, "It's your fault. You are the one who brings this upon the Zhao family!"

That was right. They were the ones who had asked for trouble!

Bernard did try to spare their lives, but they were the ones who didn't cherish it!

And now, it was too late to regret!

Bernard left the scene as soon as he finished speaking.

This press conference was full of twists and turns; everyone was still recalling how the Genuine Care Medical Center won this fight.

Harper and Hugo, who were on the second floor, looked at each other, their eyes twinkling with both astonishment and helplessness.

Finally, Harper smiled bitterly. "Sigh, initially I was worried that he wouldn't be able to overcome this disaster. I even sent someone to plead for him. I didn't expect this at all. It seems that my worries are not necessary at all."

Hugo's bitterness was not less than Harper's. He shook his head and said, "Yes, I always thought that he was still too young and immature. I didn't expect that his way of dealing with it was actually more vicious, powerful, and effective than ours. I guess he is indeed one rare gem in his generation, isn't he?"

"Forget it! Let's take it as a lesson this time. I am a snob for underestimating him! In the future, I definitely won't look down on him anymore,"

Harper added.

However, he was muttering inwardly, "Oh Young Master Lu, you have grown much faster than I thought."

"I can finally rest assured to pass you the job of taking revenge for Master Lu!"

Then the two of them left the hall quietly.

In the middle of the hall, Felicity took William's hand gently and whispered with a slight blush on her face, "William, thank you for what you did today."

Melissa's face froze. She had been forced to take in another dose of their lovey-dovey moments, again.

"Oh geez, spare me please!"

"Farewell then!"

She took Lydia and the others before they left the scene at once.

As for William, he pinched Felicity's little hand and mumbled gently, "Why are you being so polite with your husband?"

Felicity blushed and asked curiously, "William, how did you get those evidence? How did you know that the Zhao family was so devious?"

William was dumbstruck momentarily before he answered nonchalantly, "Oh, it was the Genuine Care Medical Center that discovered it all. I was

just taking advantage of it since I knew these pieces of evidence could help you to fight back against them. Most importantly, all of this had happened because of you. It was all because of your doings that you were able to achieve this result today."

Felicity looked at William's handsome face and felt her ears burn.

He was right. Good things always automatically bounced back to her since she was a kind person to begin with.

Her fever that day made her slightly confused. That was how she ended up ignoring the public's opinion and asking William to take the five million yuan to buy the Heption Herbs.

It seemed that there was truly some benefits in treating others kindly.

William, on the other hand, was also counting his harvest of the day.

The Genuine Care Medical Center had won a great victory.

They had managed to earn a total of almost 700 million yuan by just using 100 million to buy all the Heption Herbs and Hexaleaf.

Besides, these were all the profits generated in one single day.

Now that the Heption Herb was monopolized by

the Genuine Care Medical Center, it indicated that they had full control over their products. Their subsequent profits would be even more impressive.

It was a pity that this kind of profit could only last for a couple of years.

The public would definitely try to use all kinds of methods to transplant and to break their monopoly of the Heption Herbs and Hexaleaf.

However, a couple of years were more than enough.

Who would know for sure what would happen in the future?

Moreover, the Genuine Care Medical Center had also gained the trust of the citizens of Qena City. Now they had built good connections with a group of affluent members of the society. This could ensure them a promising future.

Furthermore, Felicity had managed to build a name for herself and became so well-known in the city.

Although all she had gained was a company and around ten million profits, she had also received something in return that could not be calculated.

She was acclaimed as a goddess of kindness, who always triumphed regardless of what happened!

She was one step closer to taking charge of the pharmaceutical industry in Qena City and getting closer to what he had promised her half a year ago.

All in all, the press conference hadn't been in vain after all the hard work he'd put in. All his efforts had been paid off well.

Just as William and Felicity were about to leave the hall, a group of people suddenly surrounded them.

It was the Bai family!

The Bais surrounded Felicity, their eyes full of fury and envy!

It should have been a good day for the Bai family. However, in the end, the Bais ended up being despised while Felicity became the focus of everyone's attention.

This made all of them feel uncomfortable as if there was something lodged in their hearts.

However, what else could they do now that things had come to this?

They could only butter up Felicity.

Yasmine took the lead. She approached Felicity with a bright smile, saying, "Felicity, I knew you would have a great future. You didn't disappoint me in the end! Our family is proud of you!"

The people behind her immediately praised along,

"Yes, that's right! I did say that Felicity would have a way of solving the problems today! Look, you had collected all the evidence earlier and fought back well! Bravo, Felicity!"

"I was worried about you before. You silly girl, why didn't you tell me that you already had the evidence earlier? I can't even sleep well as I have been worried about you for days," Rebecca cut in.

One by one, the members of the Bai family surrounded Felicity. They continued to lavish compliments on her as if she was a priceless jewel.

However, Felicity no longer wished to be acquainted with the hypocritical Bai family. She seemed to have grown up at this moment. She gave them a warm smile and said, "Thank you, Grandma. Thank you, Mom. Thank you, everyone. I will work harder in the future."

Seeing how Felicity was reacting, William couldn't help laughing.

She finally knew how to treat the Bai family.

When Yasmine saw Felicity's humble attitude, she immediately responded, "Felicity, you helped our family steal the limelight this time. The credit is all yours and no one can take it from you. It's fortunate that the Bai family has you to lead us. By the way, did you use the five million yuan from the company's account to buy the Heption Herbs at

that time?"

Felicity nodded and asked, "What if it is?"

Yasmine answered with a smile, "Nothing. I'm just asking. Since it's the company's money, then it is our family's money as well. Well done, Felicity!"

Of course, Felicity understood what Yasmine was hinting.

It meant that the total price of five million yuan that had now increased to more than twenty million yuan would all belong to Bai Family. Not a single yuan belonged to Felicity.

However, Felicity was surprisingly tough this time. "Hmph, don't worry about this sum of money. I have other use for it."

Everyone was dumbfounded.

Yasmine was about to lose her temper but she refrained from snapping. "Felicity, what are you going to buy that cost more than 20 million yuan? This is not a small amount of money. You shouldn't learn any bad habits from your friends out there!"

Felicity looked at William with endless gentleness in her eyes.

Like unloading a huge stone from her chest, she answered, "The money is used to buy the Emperor's Flower! No one can take it away from me!"
