

Billionaire God of War Novel Chapter 2351 – 2352

Chapter 2351

Everyone knows what the end of betraying the wolf.

That is the devil, it is a existence that only allows him to betray everyone, but does not allow anyone to betray him!

Guan Yi looked at the crowd and didn't speak any more.

“Understand.” The

Ninth Hall Master Luoyang nodded, and Tang Fang also nodded.

They are sitting here today, it is tantamount to a united front.

If anyone leaks the wind, they will die together!

In Greed Wolf, there is no chance for the informer to live, as long as he betrayed him, or even the idea of betrayal, once the Greed Wolf finds out, it will be a dead end.

Because he will not give others a second chance to betray himself!

The matter was agreed, Guan Yi stood up.

“Okay, I will arrange this matter. You should be prepared. When you need to take action, I hope you don’t hold back.”

He said lightly, “You have to fight for what you want. Can you get it? It depends on God’s will.”

He said so, but in the bottom of his heart he made up his mind that he would achieve his goal no matter what the price was, and he promised not to give up!

Thinking of being slapped by the greedy wolf, the hatred in my heart is hard to dissipate!

At any rate, he is also the master of the hall, and he is humiliated in public by greedy wolves. How can he bear it?

New hatred and old hatred, then count them together.

He made safety, and took advantage of Greed Wolf’s recent retreat, not knowing what he was doing, and quietly left the crypt.

In recent years, people like them have never left the catacombs and wandered outside, but they have never exposed their identity, let alone dared not easily affect the balance of the outside world.

Because this is also the rule.

They can fight against anyone, but no one dares to provoke God's will and rules!

If you rashly disrupt the balance of the outside world, God will punish them. This is the rule. No one dares to cross the red line.

But now, it's different.

The Heavenly Palace sees the sky again, and there are even signs of recovery, and the gate of the catacombs is also opened again, which means that the balance of this world has been broken.

It doesn't matter whether it is greedy wolves or other people.

It's not them anyway.

Looking at the sun above my head, Guan Yi was a little emotional.

"It's coming out again. This world seems to be a little different from before." When

was the last time he came out?

It seems that the people here don't wear the same clothes, and the relief outside is not what it is now. The times have changed and it is completely different from the past.

Unexpectedly, in this era, there will be masters, masters who can compete with greedy wolves.

Guan Yi changed his clothes, learned the information he needed, and left the capital city and headed directly to the South Estopia. It is said that the forbidden area there is also the person who can fight against the wolf.

And Andrew at the moment.

Discussing with several experts.

"After testing and analysis, we found something,"

Ethen said. "These waters have very strong active factors, but we have never seen what these factors are. From a chemical point of view, we can decompose and analyze them. , But it is difficult to decipher the mystery."

If these active factors can be extracted, it will be a major advancement for human beings.

The problem is that with the current high technology, even if it takes time to do this, Andrew now lacks time.

“Can it be separated?”

Andrew asked.

Since it can be analyzed, it shouldn't be difficult to separate it out. As long as you use some more methods and use it mildly, then you can still use it.

“Yes.”

Ethen glanced at several experts and said affirmatively, “We have separated a part, and the concentration is relatively high. How are you going to use it?”

Chapter 2352

This highly active factor may be more powerful than some stimulating chemicals. The body of ordinary people can't bear it. Even if it is the dog brothers, this kind of people who have experienced beatings may not be able to work.

“I will do the experiment myself.”

Andrew said.

“Are you here for the experiment?”

Ethen was a little surprised, but this was dangerous.

“Except for me, no one else can do it.”

Andrew said, “Since it can be separated, it will be much easier. You continue to research and keep me informed of any new discoveries.”

He did not waste time. They took away the material they separated and left the research institute.

He did not go home.

If you have to experiment by yourself, it might be dangerous. Would you worry about going home?

Andrew would not be like this.

He went to the Jidao Martial Arts Center and asked Mason to make arrangements to keep people from approaching the exercise room.

Mason was well prepared. If something unexpected happened, he would definitely save people as soon as possible.

In the practice room.

Andrew poured the water in the small bottle into his mouth and swallowed it directly.

All of a sudden, as if drinking shochu, the hot feeling came to my heart instantly!

From the throat to the stomach, there was a puff of air, instantly surging up.

“Huh—”

Jiang Ning’s eyes widened, this kind of impact is really not easy.

He immediately adjusted his state and felt the slight changes in his body.

After swallowing that saliva, he was observing how that active factor entered the body and how it spread to various parts of the body.

“It’s amazing, it’s the water in the longevity pond.”

Andrew discovered that his body seemed to be changing. He didn’t expect that the water would also have an effect on him. Although it was not like the old naughty boy, he was very responsive, but he still Can feel it.

It’s like a catalyst that makes cells become active, muscles become stronger, and bones become harder!

He carefully perceives the subtle changes, including every inch of skin, just to figure out how the water in this longevity pond acts on the body. At the same time, he also finds a way to make this process as gentle as possible. some.

Andrew tried time and time again, but for him, the impact was not great, but he drank too much and got a little belly up.

He stayed in the practice room for a full day and night. If it weren't for knowing that Andrew was okay, Mason and the others would have rushed in.

“Mr. Jiang shut himself in the room, just drinking water?”

” Did it for a day?”

“This is too powerful!”

They knew that the water Andrew drank was more terrifying than high-concentration liquor. Even Gou and the others dared not drink it directly, but Andrew drank it all day and night.

“He is for everyone.”

Mason said, “This thing, if you can find a suitable way to use it, then it will be an opportunity for all of us.”

Especially for him, the elderly, the Changshengchi Water, but it can rebuild their vitality, not to mention rejuvenation, but at least, the vitality will be more vigorous, and they will live forever.

He had some expectations, all of them were looking forward to it, and they all hoped that Andrew would succeed.

As in the past, Andrew has never let them down, and it can definitely be done.

“Old Tan, someone is looking for the curator outside!”

Suddenly, someone ran in, walked up to Mason, and respectfully said, “That person looks a little strange.”

Mason frowned slightly, “Stranger?”

“Well, never I’ve seen it, and I haven’t seen this person in the system. I’m not a master in the world, but he doesn’t feel like an ordinary person.”

Old Tan nodded.

He glanced at the exercise room: “You should arrange more people to protect Mr. Jiang from being disturbed. I will go out to see who it is and find Jiang Ning.”
