

Chapter 359

"You...you wait for me!"

Rayna was out of breath by Suzi for a long time, and her lips turned purple. She stroked her chest to calm her anger as much as possible, turned and limped and left the design department.

"You can!" Linda sneered and said sarcastically behind Suzi.

Suzi: "..."

She just pretended not to hear.

Because during the proofreading process, she discovered some Linda design problems.

Linda's design style is very gorgeous. At first glance, it is particularly eye-catching and makes people feel comfortable, but architectural design is different from fashion design.

If the architectural design only considers gorgeousness and not firmness, it is a big hidden danger.

A senior designer like Linda, don't you understand?

Suzi looked up at Linda.

Linda is running against Suzi with a few colleagues: "Newcomer, do you really think that you were able to reach the sky once you were protected by Mr. Jun yesterday? Mr. Jun rarely appeared in the company.

Do not come once a week or even a month.

Even if he will come to the company again today, I bet Mr. Jun doesn't know you anymore, believe it or not? Do you know why Master Jun guarded you yesterday? "

Suzi originally wanted to give Linda some deficiencies in her design, but now she doesn't want to point it out. She just looked up at Linda: "Why?"

"Because he has a lot of delicacies and delicacies, he wants to eat bitter vegetables for a different taste.

I watched too much with beautiful women, aesthetically tired, and suddenly saw an old woman in the countryside, suddenly felt fresh, which means one thing. "

"Haha..."

"Puff..."

The office was full of laughter.

Linda looked at Suzi with a grin: "Just kidding, just kidding, under normal circumstances, the new staff, we all make a joke like this, Suzi, don't you mind?"

Suzi smiled slightly: "Don't mind."

"Okay, okay, we're starting to work, Suzi, you proofread as soon as possible," Linda said.

"Yeah." When Suzi was about to sit down and continue to look at Linda's design work, someone behind her called her: "Suzi, come to the personnel department."

Suzi felt a little bit in his heart, shouldn't the personnel department let her go because of Rayna's complaint?

Get out! Get out!

Suzi got up and followed the man to the personnel department.

It's not a big deal either, mainly because she just came yesterday, and the Human Resources Department hasn't had time to tell her some employee rules and the like. New employees always have a small meeting. This small meeting was lengthy and not substantive, and it ran for an hour as soon as it opened.

But Suzi has always listened carefully.

At the end of the meeting, Suzi returned to the office of the design department. As soon as she walked in, she felt that the atmosphere was a bit wrong. Several colleagues took a peek at her, but quickly avoided.

What happened?

Suzi was taken aback.

But she also knew that she was a newcomer, and yesterday she was offended by Mr. Jun's different eyes. Even if something happened to the design department, no one would tell her.

Suzi can only pay more attention to himself.

With this attention, she found that her chair was not right.

The chair in her position looks exactly the same as her original chair from the outside, but this chair is a little bit backward. Suzi is engaged in architecture, and she can see the difference between the two chairs at a glance.

This is definitely not her original chair, there must be a problem with this chair!

Chapter 360

Suzi glanced at Linda inadvertently, then picked up a pile of proofreading materials and came to Linda's desk, and said honestly: "Linda, these are proofread by me. Here are you."

Linda took the information blankly and looked at Suzi.

Suzi continued to speak honestly: "Linda, I'm going to eat first, and I will review it after I have eaten. I take advantage of the fact that there are few people eating now, so I will go to the cafeteria first, so that people in the cafeteria won't be watching me again."

Linda sneered: "Yo, Suzi, you have learned how to master it."

Suzi smiled slightly: "You have to learn to adapt when you are in the workplace. I'm going to eat."

After finishing speaking, before Linda said anything, Suzi turned and left the design department.

Behind him, a group of people in the design department mumbled immediately.

They are all pity expressions that they didn't see in the good show.

"Hey, it seems that Miss Rayna's scheme can't succeed."

"What's the rush? Suzi hasn't noticed the mess, she just wants to go to dinner earlier, and come back after dinner later, let's watch a good show, haha."

"Will Rayna play too much?" one of them said worriedly.

"What are you afraid of? We are not playing with her! Who made her offend Rayna when she first came?"

"If something happens, we also have a sin of not knowing it."

"Hey, let's stop discussing, just don't know. Anyway, we can't offend Rayna."

Several design staff members shut up at the same time.

They glanced at the chair at the same time, just thinking about it without irritating themselves, but still thinking about Suzi's jokes in their hearts.

However, Suzi said that she would go to the cafeteria to eat, but she didn't really go to eat. She went to the administrative department upstairs and called Galia to come out.

"What's the matter with Suzi?" Galia glanced at Suzi, "Suzi, why are you still wearing so old fashioned today? In fact, you are not bad at all. You look much better than Rayna, and much better than our company. The girls are beautiful, so you can wear them beautifully. It's best to be chased by Young Master Jun, and then pissed them off. I hate these people for being deceived. What's so great!"

Suzi smiled: "You are facing me like this, so you are not afraid of them running on you?"

Galia: "It doesn't matter, I'm not afraid."

Suzi felt warm in his heart.

In fact, as long as her heart is open, she can still make friends anytime, anywhere.

"By the way, Suzi, what are you looking for?" Galia asked again.

"Can you... help me ask for the security of the surveillance room and let me take a look at the surveillance video of my office?" Suzi asked slightly embarrassed.

Galia was startled: "What's wrong with Suzi, what happened?"

Suzi shook his head: "I'm still guessing and skeptical now. I have to watch the surveillance video to know what happened. Can you take me to the surveillance room for a look?"

"Go!" Galia pulled Suzi and left.

When she arrived outside the surveillance room, she took Suzi and quickly left.

"What's the matter?" Suzi asked.

"Should pack cigarettes for the security guards first, and beg others to do things, so it's easier to ask for something."

Suzi nodded immediately. The two went to the convenience store, bought two packs of high-end cigarettes, and then went to the monitoring room. Seeing the arrival of two beautiful women, the security guard asked politely: "Is there anything I can do for you?"

Suzi said politely: "Brother Security, I am a new designer. I originally helped us design and proofread things. I have a very small instrument and I don't know where it's dropped. I would like to trouble you. You can't adjust the monitoring playback to see where the instrument is dropped."

With that said, Suzi handed two packs of cigarettes to the two security guards: "Thank you, security guard brother."
