

Chapter 371

I used to think it was because she was cold-tempered, didn't care about everything, and had very little ties, so she looked much more delicate than her peers, but today, Arron suddenly discovered that Suzi's skin is really good.

Especially when drinking full water, the small face is full of collagen. The mere appearance of not applying Fendai is enough to make him unable to move his eyes.

Seeing Arron look at her like this, Suzi blushed immediately.

The blushing face, like two blushes, Suzi didn't know what to say, she coughed slightly: "That..."

Before she finished speaking, her lips were already covered by the man.

What he didn't finish on the training lane of the driving school was to be done at home after all. Before he knew it, Suzi was carried into the bedroom by the man.

The beauty of this night is of course needless to mention.

Suzi was in good spirits the next day.

She feels that life can be like this, it is already very good and perfect for her. The only thing that makes her inadequate is, where is Sanford?

Suzi did not dare to ask Arron.

Between them, she hadn't been familiar with the matter that she could ask him where Sanford was.

Suzi wanted to wait again.

After having breakfast, Arron and the two took Lilly to kindergarten as usual, and then Suzi to work at the company. Suzi got off the bus near the company, and then transferred to Wuliuzhan Road to find a job in the Internet cafe.

For a week in a row, Suzi came here in this way. Until the morning of Monday of the second week, when Suzi had only been on the road for one stop, the phone rang.

Picking it up and seeing that it was an unfamiliar landline, Suzi was pleasantly surprised. She guessed that 80% of the resume submitted by her was finally available. Sure enough, the applicant really called Suzi. Let Suzi now apply for a job at a construction site in the suburbs.

Although it is a little far away, for Suzi, no matter where he is, he just needs to have a job.

She was very happy and excited.

After getting off the bus, I transferred to another bus to go to the work site designated by the other party. When he got there, Suzi saw a lot of people on the construction site clamoring.

What happened?

She wanted to turn around and go back, but when she thought that she had come all the way to apply for the job, she was a little unwilling to go back. She came closer and listened. It turned out that several technicians were arguing because of the disagreement of opinions.

Listen carefully again, it seems that some mistakes have occurred on this construction site due to defects in the preliminary design. Now that the preliminary foundation has been laid, it is impossible to make up for it. This has caused a dispute among several technicians.

Suzi walked in quietly, listened carefully, and then carefully observed the situation of the entire foundation. She got into a few disputed crowds and said slowly: "I have a way to remedy it."

Although her voice is not high, her words are very clear. But it is enough for everyone living in the town.

One of the staff members wearing hard hats looked at Suzi and said with disdain: "You, the little yellow-haired girl you brought, are you still studying in college? Why are you running around for fun? Go? Go, this is the construction site, not where you should be."

Suzi did not move, she still insisted: "I really have a solution to this problem."

She is not only a designer. She has been on the construction site for five or six years. She has experienced many things that often happen on the construction site. She also likes to look at various construction proposals from all over the country.

She has much more architectural knowledge than the average person.

"Suzi, why are you here?" a voice behind him asked in surprise.

Chapter 372

When Suzi turned around, he saw that the man turned out to be Lenny.

"Jun...Young, President Jun?" Suzi subconsciously shouted, "Why are you here?"

Lenny raised his eyebrows: "This is a job undertaken by our design company. Why, are you handling this on behalf of the company? Why did your design department send you here?"

Suzi: "Sorry, I have already resigned. I came here to look for a job today. I happened to encounter such a problem. I...I can help you solve this problem."

Lenny couldn't help but looked up and down Suzi: "You..."

Suzi nodded: "Yeah."

Lenny immediately said to the technical personnel who were arguing between the two sides: "Okay, let this beauty try and talk about her plan."

After speaking, Lenny looked at Suzi again.

I haven't seen it for a week. The little girl's complexion looks much better than it was a week ago, as if she was well-nourished by drinking water from the inside out. Her skin was like a baby, with a little rosy inside. , Do not play Fendai Fendai, dress plainly, but look better as she opens up.

What's more, she also said that she has a way to solve this defect.

Lenny became more and more interested in Suzi.

At this time, Suzi had already put on his safety helmet, then walked down the newly dug foundation, squatted down and took a horizontal stick to make gestures: "First, take out some soil on both sides, the smallest area, as long as you can put down two cements. Pillar's will do.

Fill the deep hole that was taken out with concrete pillars, erect them on both sides, so that the upper part can be fixed, and then a beam is erected from it. Fix the beam, and then pierce the broken beam on the ground with the steel bars grabbed from it. In this way, the problem of unreliability of the suspended foundation can be solved. "

This explanation made the technicians present stunned.

But after listening to Suzi's detailed explanation, they also felt that this would definitely make up for the original shortcomings. And it can save a lot of

trouble. Otherwise, half of the foundation has been laid, do we have to start over again?

How much human and financial resources have to be lost?

The staff on both sides looked at this quietly student-like girl with a calm expression on her face.

"Ahhh! Little girl, you are a genius. A young girl like you, who is willing to go to the construction site nowadays, how did you...how did you get such rich practical experience?" one of the technicians Ask Suzi.

Suzi said briefly: "Because I have been soaking in the construction site all the time."

"No wonder, whoops, it's not easy to see such a hardworking girl now."

"Yes, yes."

Lenny on the side also looked dumbfounded.

Unexpectedly, the intractable problems on the huge engineering site were solved by Suzi. The appearance of the problems she solved was really rusty and beautiful.

When Lenny was about to talk to Suzi, Suzi said: "Excuse me, where is the personnel department? I...I came to the construction site to apply for a technician."

"What!" Lenny remembered that Suzi said that she had resigned. He couldn't wait to ask: "Suzi, you...why did you resign? Isn't our architectural design company's treatment bad? Why did you resign?"

For more than a week, Lenny has been at his home in Kyoto. He just got off the plane and came to Nancheng this morning. He heard on the phone that

there was a problem on the construction site, so Lenny rushed over and did not expect to meet him here. To Suzi.

Even more unexpectedly, Suzi didn't do it in the company.

Suzi shook his head: "I... don't want to do it there."

She tells the truth, she is also reluctant to have that job. After all, it is in the urban area and it is so close to the only kindergarten. Now, although there is a construction site office on this construction site, it is estimated that there will be one if you drive away from Arron's district in the city center. Half an hour.
