

# Chapter 377

"I...I don't want to live anymore! uuu..." Rayna ran out crying.

Behind him, Lenny called the security department: "Looking at the woman with a cat-faced cat, she must think about not letting her find her death in the company!"

The men of the Jun family have always treated women who they don't like are only cooler and disdain, not the coolest and disdain.

In Lenny's eyes, he never regarded Rayna as a woman.

Wrong, because he never regarded Rayna as a person.

"It's all gone!" Lenny looked at the support present and said coldly.

"Yes, Master Jun!" Many people responded in unison, and then filed out.

"Suzi." Lenny yelled. When she was about to let Suzi stay for a while, Lenny's cell phone rang, and he picked it up to connect: "Hey, little uncle, what's the matter?"

The little uncle in Lenny's mouth is Sanford's cousin Xu Zetong.

At the other end, no one knew what Xu Zetong said, so he heard Lenny say: "Okay, I see, I will come right now."

After closing the line, when he wanted to call Suzi again, he saw that Suzi was no longer in the meeting room. Lenny wanted to go to the design department where Suzi was shrinking to find Suzi, but because my uncle asked him to do it. Things were more urgent, and Lenny immediately left the company again.

And here, Suzi has returned to the design department.

"Sorry director, you really shouldn't lie to me to come back. It's normal for the company not to come to work, and I didn't plan to come, but what did you lie to me for?" Suzi questioned the design director displeasedly.

The director said with a very embarrassed expression: "Suzi, I know you are wronged, but you have offended the company's little princess Rayna. Although she was driven out of the company by Lenny today, Rayna has a backstage. Of.

Her backstage is no weaker than Mr. Jun.

We...As a part-time worker, I have no ability to fight Rayna. I can only call you at Rayna's instructions. "

Suzi: "...Forget it." After Yubi, she looked at the design director again: "I want to ask, does the company still need me?"

Design Director: "..."

This woman was brought in by Young Master Jun. Will the company dare not?

She immediately said repeatedly: "Yes, yes, of course!"

As soon as the words of the design director fell, Linda next to him whispered to the ears of the design director: "Director, you can think about it, the person Jun, is basically not more than a day with women, and he drove Suzi with him. Come here because he answered the phone and left when he returned the hand last time.

If you succeed now, do you think Mr. Jun will keep Suzi in the company?

Even Ms. Rayna, a relative of the imperial family, and Young Master Jun dared to expel her immediately, let alone a woman like Suzi?

I think you'd better not make your own claim to let Suzi stay. "

The director thought for a while, Linda was indeed right.

The Ministry of Personnel did not say that Suzi would be hired again.

At this moment, the design director looked at Suzi embarrassingly: "That..."

"It's okay!" Suzi smiled relievedly, and then glanced at Linda, but Linda looked at Suzi provocatively. The tone seemed to say to Suzi: What's so great!

"If you don't keep me, then leave." After Suzi finished speaking, he turned around and left. She had just walked out of the office two or three steps, but suddenly Linda received an outside call. After hearing a few words from the other party on the phone, Linda suddenly cried and asked, "This...what should I do, also... ..There is another remedy?"

## Chapter 378

There was a problem with Linda's design, Suzi saw it last week. Now that I heard Linda begging on the phone, was it something Suzi had expected?

Without turning his head back, Suzi continued to walk outside, but heard Linda screaming behind him: "Suzi! Stop for me!"

Suzi just pretended not to hear.

She is no longer an employee of this company, why should she stop?

"Suzi! Are you deaf?" Linda put down the phone, stepped on high heels angrily, chasing Suzi, and then glared at Suzi from her side in front of Suzi.

Suzi's tone is cold: "Get out of the way."

I was too lazy to say a word to anyone. She had to find a job. The job was almost finalized in the morning. If it wasn't for the design director to call her and tell her that the job can still be kept, she Won't come back!

Fortunately now, she can't do her job here, and she doesn't know if she can keep the job there. Suzi is in a hurry now.

"Suzi, you are a ghost!" Linda asked indiscriminately.

Suzi: "What did you say?"

"You actually don't want to come here to work hard, you're just a bastard! Miss Min is right! You are a third person, and you go wherever you see a man.

You were unsuccessful in seducing Miss Min's brother-in-law, and you moved here in a blink of an eye. As a result, you succeeded in attracting the attention of Young Master on the first day, Suzi, we all thought you were a bun, so you are a master!

A master who seduce men!

When you pretended to proofread my copy for me, did you move your hands and feet on it? If you, a person who doesn't understand architecture, move your hands and feet a little bit on it, if the construction party continues to construct according to your plan, it will be wrong!"

"That's right! Suzi, did you make a ghost!"

"If you don't tell the truth, you won't be able to leave today! Our design department has never had any trouble. Why did you make a mistake when you came!"

"Director, you can't let this fisher girl go! If she leaves, our design department will be out of luck!"

For a while, everyone in the design department was in the same hatred and rushed to prevent Suzi from leaving, as if Suzi would be able to take the blame for the entire dozen of them if they stayed behind.

Suzi looked at Linda with cold eyes, and then at the design director.

When she first came to apply for the job, the design director was in charge of the main recruit. Whether she can design or understand architecture, the design director naturally knows, so at this time, Suzi will look at the design director unblinkingly.

Director Zhengsu said with an expression: "It is your fault to say that Suzi doesn't understand design. I recruited Suzi personally. She understands design and architecture."

Suzi breathed a sigh of relief.

"But..." The director turned the conversation and said again: "Suzi, although you are not an employee of the company now, you did work for the company for two days, and you did contact Linda in those two days. Design draft, Linda is the most senior designer in our design department, and her design is generally not wrong.

Therefore, you are also involved now. "

Suzi: "Director, if you have anything to say, please speak up!"

She didn't want to waste time.

"Why not, let's go to the construction site to take a look and compare Linda's design drawings. Anyway, it's just the beginning of the past two days. It shouldn't be a big problem, but we have to distinguish who is responsible, right?"

"Good!" Suzi answered simply.
