The Charismatic Charlie Wade Chapter 3800

Immediately afterwards, the Gulf of Aden, which has not been peaceful in recent times, suddenly broke out a big news. A number of pirate forces in the Gulf of Aden were dispatched in an orderly manner, and six freighters were hijacked in one go at noon that day. The news broke out and shocked the world! Including Charlie, who is in China, received pushes from major news media at the first time. The way the pirates in the Gulf of Aden hijacked the freighter is very simple and rude. It is nothing more than chasing the slower freighter with speedboats, using various weapons to deter the opponent to give up resistance, and then boarding the ship to control all the crew, and then drive the ship to your own. Go to base camp and wait for the shipowner to take the money to redeem people. This time, when they hijacked several other ships, they were all resisted by international security personnel, and both sides suffered casualties. However, only the process of hijacking the Xinglong was extremely smooth. Because Xinglong had almost no resistance throughout the entire process, it was nothing more than a few crew members that symbolically sprayed high-pressure water jets with high-pressure water guns. After the threat of the pirates firing shots, the crew was so frightened that the high-pressure water guns were stopped. Afterwards, the pirates boarded the freighter smoothly and were delighted to find that the owner of the Xinglong was too stingy and did not even hire security personnel for the ship. As a result, they happily took control of the entire ship's dozens of crew members. Soon after, Xinglong began to change course and headed towards their base camp. As soon as the Xinglong turned around, the pirates couldn't wait to report the successful hijacking to their leader. When the leader heard that he had successfully robbed a freighter with nearly 20,000 containers, he was naturally very happy and felt that he had caught a big fish. So he immediately released the news to the outside world, claiming that the Xinglong had been hijacked by him, calling the owner of the Xinglong and asking the owner to pay them a ransom of 10 million dollars. They didn't even know who the owner of the Xinglong was. However, according to their experience, as long as they publish information about the ship, the shipowner will come to the door non-stop. According to past experience, after confirming

that the ship has been hijacked, the shipowner will immediately communicate with the leader of the pirate organization, asking them not to harm the crew on the one hand, and bargaining on the price issue on the other hand. The pirates can afford to hijack this kind of thing, but the shipowner cannot afford it. Now that the shipping price is so high, one can't wait to earn 100 million U.S. dollars in one trip. If it is delayed for a period of time because of being hijacked, not only will the transportation revenue be severely lost, but the cargo owner must also be compensated for the loss. Sometimes, the loss caused by one day's delay may exceed several million U.S. dollars. But what the pirate leader didn't expect was that Yisu Shipping, from China, didn't even contact them the first time. On the contrary, Charlie received the call from Ziva Hank the first time. As soon as the phone was connected, she said nervously: "MR. Wade, our ship has been hijacked!" "Yes." Charlie smiled slightly: "I saw the news." Ziva Hank said anxiously: "The robbers asked for a ransom of 10 million dollars. I haven't responded to them. Didn't you just arrange for someone from the Wanlong Temple to escort you? This ship just reported back eight hours ago. , Saying that the soldiers in the Wanlong Temple have already boarded the ship, how could this happen..." Charlie smiled and said, "This is my requirement for Wanlong Palace." "Huh?" Ziva Hank was stunned, and blurted out: "Why?" Charlie smiled and said, "Don't worry, there will be nothing wrong with the boat. As for why, you will know soon."
