

# The Return of the God of War [The Protector]

## Chapter 2810 - 2811

### Chapter 2810

Especially a few neighboring countries are even more afraid.

The flames of war have spread to them.

This group of giant creatures suddenly turned...

They still understand the truth about lip and tooth cold.

In addition, the origin of this group of creatures is unknown, and it is not known who is behind the scenes, or that there is no behind the scenes at all.

Levi Garrison and Zhanying Nation knew that it was the laboratory of the gods behind them, but the others didn't know.

So this is the point of panic.

No one can guarantee that it won't hit him.

Another point is that the interests of all parties are involved.

If Daxia exists intact, it will restrain many forces and keep the situation in a peaceful state.

Once Daxia has a problem here.

Many problems may arise.

It will involve all aspects of interest issues, and even survival issues.

Therefore, for many parties, Daxia must have nothing to do!

For example, the nearby East Island, Star Country and so on.

They first stood up and said that they must support Daxia!

With the first, there is the second.

More and more forces expressed their support for Daxia.

The rest must be involved.

Supporting Daxia is actually to protect yourself...

Daxia's hostile forces actually don't need support, but what can all parties do if they look at you?

You can't antagonize everyone, and you can't vote if you vote.

Can only promise to support.

The most depressing is the war eagle country!

They don't even need to fear the Lab of the Gods, let alone Leviathan.

But with all the forces in the world looking at you, you can only agree to support.

Otherwise, it is inevitable that everyone would not suspect that it was the ghost of the Warhawk Nation, and these Leviathans were made by the Warhawk Nation.

In order to avoid becoming a public enemy of the world, the Eagle Nation had to agree to support it.

They don't want to be put on a hat!

I don't want to be a public enemy...

Therefore, it will happen later that the major countries and forces around the world come to support Daxia.

In fact, all of this was a meeting that Levi Garrison arranged for King Kong on the 2nd, 3rd and 4th to convene the major decision-makers from all over the world.

Let them have no reason not to come to support!

This is what Levi Garrison is so good about!

Calculate every party, even if it is a war eagle country!

So that they can't refuse support!

...

The whole world is coming to support.

It is easy to suppress this group of Leviathans.

...

After Levi Garrison's retreat ended.

The strength of the whole person has gone up to another level.

Especially when this kind of crisis is coming, it puts Levi Garrison under pressure, and it is easier for him to improve and break through.

It is a bit unimaginable that Levi Garrison is so strong that he can continue to be strong.

If Huo Yun Cthulhu knew this, I would be shocked to drop his chin.

Can it continue to grow stronger? Although he is also practicing this exercise, he knows that this exercise has an infinite end.

But in his opinion, the end should be Levi Garrison's realm.

He is working hard in the direction of Levi Garrison.

But if he knew that Levi Garrison could still make a big improvement, he was afraid that he would collapse.

After the retreat, Levi Garrison stayed at the base of the Gods Laboratory.

He was waiting for the real action of the Gods Lab.

Especially the main priest behind.

He had long wanted to meet the Dark Doctor for a while.

Now it's finally time to wait.

As soon as the base of the Lab of the Gods was opened.

Mr. X led all the troops and equipment in the Lab of the Gods to be dispatched...

Levi Garrison stared in the dark, and looked forward to it.

Want to see how strong the main priest is?

Is it truly capable of being called the gods?

He is ready to shoot.

The "Divine Tribulation" in his hand is already hungry and thirsty.

This artifact was cast to deal with the laboratory of the gods.

It means the catastrophe of the gods!

He is ready for a big battle.

At the same time, he has sent instructions to make the variant No. 13 and the Four King Kong rush here.

Meet this big battle.

Time passed by every minute and every second.

The large forces in the Lab of the Gods left the base one after another.

...

After half an hour.

Levi Garrison was disappointed.

Where is the main priest?

People?

## Chapter 2811

et?

Although the team of the Gods Laboratory is super powerful, it is stronger than the ancient Garrison Clan of the Baolong clan of Tiance Mansion.

Picking out one at random will make it too strong.

All the major forces in Daxia are crushed and killed...

Powerful ones comparable to Mr. X, and Lucifer the Clown the Great are even more dominant.

Even some of their weapons are terrifying.

The overall combat effectiveness is terrifying to the extreme.

This is also the reason why Mr. X has been so slow to take action.

Because they are too strong, they don't want to expose their strength in advance.

It is enough to deal with these Leviathan legions of Tiance Mansion.

Their group of powerhouses and the main gods are waiting to deal with Daxia's two types of legendary existences.

It won't be wasted at other moments.

It can be seen how strong they are.

But right.

Far from achieving what Levi Garrison wanted!

Levi Garrison was going to deal with the chief priest, that was the opponent he wanted.

Therefore, Mr. X's group is meaningless to him.

He also cannot expose force in this place in advance.

Wasted on them.

Where is the main priest?

come out faster!

Levi Garrison waited anxiously.

Ten minutes passed.

It seemed that all the army of the Gods Laboratory had come out in the capital base.

There are no more people.

This disappointed Levi Garrison.

Sure enough, waited for a while.

No one came out.

And Mr. X led the army and a large number of equipment to evacuate.

Could it be said that the main gods will not come out?

Levi Garrison is unwilling!

The real threat to the Lab of the Gods is still the chief priest!

Nothing else to be afraid of!

In other words, Levi Garrison can solve it.

therefore.

Levi Garrison thought about it.

Started to jump down.

After wandering in the capital base of the Gods Laboratory for a while, quietly entered it.

He wanted to see if the main priest was among them...

Along the way.

Was shocked by this underground castle.

advanced!

Technology!

...

This is unprecedented.

Even Levi Garrison felt like seeing the world.

Too advanced.

The ten streets of the world's major countries...

But along the way, the equipment was emptied.

It seems that they are going to abandon this base.

Nothing will be left...

Is the main priest really not here?

Levi Garrison began to tremble a little.

He went deep all the way.

It looks like emptying everywhere.

The chief priest even couldn't even see the roots.

Soon he probably walked the entire base all over.

Came to the main control place.

Levi Garrison examined it carefully.

Suddenly, his face changed drastically."not good!"

Levi Garrison's eyes widened, and his hair stood up!!!

He saw a device similar to the detonation countdown in the main control place!

The Lab of the Gods is about to abandon this base.

They are completely emptied!

In order to erase all traces, we must destroy this place!

“They want to destroy this place!”

Levi Garrison understood.

But this time is already slow.

The countdown has come.

He can't avoid it!

“No, they are going to destroy the entire capital!!!”

At the moment when the destruction was approaching, Levi Garrison understood.

After the withdrawal of their large forces from the Lab of the Gods, they not only wanted to erase the traces of the base, but also to destroy the entire capital.

So the detonator they left here is too horrible.

The power of this weapon is unprecedented!

Levi Garrison felt the terrifying energy, this is the power that can turn the entire capital into purgatory!

“Rumble...”

In bursts of earth-shattering explosions, this base was destroyed.

This huge explosion.

Make the entire capital shake, everywhere like a big earthquake.

Every corner of the huge capital witnessed this big explosion.
