# The Return of the God of War [The Protector]

## Chapter 2816 - 2817

### Chapter 2816

Seeing Leviathan's body shape change from a distance.

Everyone took a deep breath.

There was extreme horror in the eyes...

too frightening!

Just a lap larger, its combat effectiveness will be greatly improved!

These Leviathans have been directly upgraded and come to a whole new level.

However, it is not only a lap bigger,

No one thought that the scales on their bodies actually contained terrifying substances.

Now it has become a body protective film.

The energy liquid in the film has the function of destroying corrosion. Once it is attacked, there is no place to die.

Just like the special weapons of the Maya industry, once the special substances on them are contaminated, there is no longer any way to survive.

At that time, the whole world was helpless!

Now these scales contain upgraded special substances.

After all, it was developed by the Dark Doctor.

Not only does it cause super serious damage to the human body, it also damages all other weapons and buildings.

More powerful!

At this time, the world coalition forces in front were already less than ten kilometers away from the Leviathan army.

They began to bombard Leviathan with various weapons.

For a time, the front was turned into a sea of flames again.

Various secret weapons were useful to Leviathan before!

But now that the Leviathan has evolved, the secret weapons of various countries have failed.

Hit them, it won't work at all.

This surprised everyone.

Then the Leviathans began to accelerate.

This speed makes everyone unimaginable.

How much energy does such a big body get so fast?

But the Leviathans actually moved at such a speed.

Suddenly, it appeared before the world coalition forces.

The reinforcements of the major countries and forces are all on advanced aircraft or maritime vehicles.

Even many reinforcements are wearing various special armors.

“boom!”

“boom!”

“boom!”

...

After the Leviathans arrived, they attacked directly.

The membranes of their bodies suddenly ejected energy liquid, which first produced an explosive effect.

Immediately afterwards, the special material turned into a torrential rain and swayed on the equipment or people of the reinforcements.

In the next second, the corrosiveness of the special substance was revealed.

No matter what material is made of equipment and equipment, as long as they are contaminated by this special substance, high-strength corrosion will occur immediately.

“Shit...”

Everyone saw the reinforcements’ weapons, aircraft, and maritime vehicles all corroded...

Suddenly no longer.

Even if the reinforcements were wearing secret armor, they were corroded, and then their bodies.

“what!!!”

...

There were screams everywhere.

Heavy losses ahead!

at the same time.

The reinforcements who rushed up wanted to destroy the Leviathans at close range.

As a result, the thin film on the Leviathan body sprayed out special substances...

They may be super strong and unmatched.

Maybe the battle armor can reach the standard of aerospace, and there will be no damage from the friction of the atmosphere.

However, when encountering this kind of material, it was all corroded, and no matter how strong the combat power was, it could not be used.

Now the situation is Leviathan, let alone hurt the core.

You can't even touch it.

You will die at the first touch.

This wave of reinforcements basically lost a third of their strength.

shocked!

Everyone was completely dumbfounded. Leviathan is now technically invincible!

I have to say it!

Even if you encounter it, you can recover instantly!

What's more, after getting bigger, the combat effectiveness also soared!

It can't stop it at all!

How to do?

Everyone panicked!

“Not good! This material is very similar to the material on weapons before Maya Industries! But it’s an upgraded version!”

...

Someone quickly tested these substances.

Get this conclusion!

“what???”

Everyone was shocked again.

Previous studies on the special materials on Maya industrial weapons were not clear.

In addition to the deep-sea material dug in Kangaroo Country, there are no ways to deal with it.

Now comes the upgraded version again.

Isn’t this asking them to die on the spot?

## Chapter 2817

“withdraw!”

“Hurry up!”

...

At this point, if you don’t withdraw, you will die!

The supporting armies began to withdraw one by one.

But the Leviathans continued to press up.

There are also many weapons that have not been used, and they are used against the escaped reinforcements.

Leviathan's speed is too fast.

There were even a lot of people who directly trampled reinforcements to death.

The casualties are increasing.

But there is no way to fight back...

Now Daxia is just changing the situation.

But the crisis has not diminished at all.

The threat is even greater.

"Let's go!!!"

Underworld gods led the masters who were holding artifacts or god armors and started attacking.

Other things can't stop it.

But they believe it.

The armors and artifacts created by the metal resources of the forbidden area No. 76 cannot be corroded.

The Underworld God has just tried it with the special material brought by the forward team.

"boom!!!"

The evil spirits rose from the ground, holding a crossbow!

Suddenly shot an arrow!

"Shit!"

Sure enough, the artifact is still useful.

Directly penetrate the film of Leviathan and cause no small damage.

Although compared to the damage caused before, it cannot be compared.

At least it works!

Others are also working hard!

For example, Ye Wudao, Ye Lingtian and others rushed forward.

Holding the artifact in hand, they showed their posture against the sky.

The liquid sprayed by the Leviathans could not cause damage to these war armor artifacts.

This makes Mr. X angry!

"It's them again! What the hell is going on in Forbidden Land No. 76?"

...

But the problem is that the number of artifacts and armors is still too small.

Although it works, it is almost trivial.

It just boosts morale.

Let everyone here know.

Can cause damage to Leviathan...

But it doesn't work.

I saw the Leviathan that was hit recover quickly, and even the companions next to him were helping it to recover.

If this goes on, even if they suffer various injuries, it is useless.

If the core cannot be destroyed, there is no way to prevent their recovery.

There is no difference between being injured and not being injured.

“Buzzing...”

next moment.

The three thousand Leviathans began to gather all the energy and focus on the first row.

Xiao Liejun and the others had seen this tactic with their own eyes.

“withdraw!”

“Quickly disperse! Quickly disperse!”

“Everyone spread out! Avoid being set on fire!”

...

Xiao Liejun’s department began to shout hysterically.

Let everyone retreat and disperse, don’t pile up together.

Now everyone, boats, etc. are all gathered together.

This kind of letting Leviathan set fire is very dangerous.

Chaos started here.

One after another scattered around.

Some even dive directly into the sea.

...

The scene and its chaos.

“Buzzing...”

Fortunately, it takes a while for all Leviathans to gather energy.

Amidst the earth-shaking sound, the gathering was finally over.

“boom!”

“boom!”

“boom!”

...

The super-strong energy wave carries out a cover-destructive bombardment on the front.

“Rumble...”

This wave of offense can be called epic...The tremendous power flattened everything in the sea ahead!

Even the terrible power is like steaming the sea water to dryness.

The Evil God and others at the forefront realized the danger.

Immediately use the divine weapon divine armor or the like to start the defense.
