“It’s not good! There is no interception on my side! Two targets have entered the Antarctic glacier!”

Agent Black Hawk contacted Levi Garrison.

The brain of God also found the location of the two aircraft.

“We did not stop before reaching the Antarctic Glacier! We have already missed our best opportunity!”

God’s brain looked annoyed.

According to his plan, it is to reach the Antarctic glacier one step ahead of time at a very fast speed!

Then find a way to destroy it.

But now because of those people’s obstruction, it has been too long, and it is impossible to arrive early.

Agent Black Hawk also missed the best time because of his stupid brain.

It is also impossible to reach the Antarctic glacier in advance.

And it was at least half an hour away.

This means that the best opportunity is missing.

“Now if we follow the regular route, we will definitely not be able to catch up!”

“The only hope is to find other channels to enter! See if there is a hint of life!”

Said the brain of God.

After the Black Hawk agents received the message, they immediately used long-range weapons to open a channel at the location locked on the Antarctic glacier.
