

## When His Eyes Opened Chapter 1198

### Chapter 1198

Mike said, "Then you just showdown with Elliot and tell him that Shea is still alive. Let him worry and suffer also. It's better than letting him hate you alone."

"I can't get through to him. I haven't been able to get through to him since last night, until now.... He probably won't use this number again." Avery's voice was heavy, and she made no secret of her helplessness and grief, "Mike, my heart seems to be dead."

"What to die for? Even without him, you still have three children." Mike snapped, "When is Shea's surgery? Is the time determined?"

Avery took a deep breath and said, "If it goes well, then Tomorrow. I talked to Shea last night. She was so innocent and kind. She missed Elliot very much. I promised her that when her surgery was successful, I would take her to see Elliot.. ....but I couldn't contact Elliot anymore..."

"You can't contact him, maybe other people can. You need to adjust your mood first. If Shea's operation can be successful, you are still afraid of him. Can't you come out? I'll take the child to Bridgedale to find you in two days." Mike comforted her.

Avery: "Well. I'm going to the hospital."

Mike: "Avery, love is always just the spice of life, not a necessity. Don't be right. Life loses confidence."

"Got it." After talking on the phone, Mike returned to the villa. He stayed until nine o'clock at night and left when Layla fell asleep.

After coming out of Foster's house, he drove to Chad's house.

After Elliot left the Sterling Group, Chad seemed to have been beaten by frost.

Not to mention that Elliot will not step into the Sterling Group again in the future, just thinking that the future boss will be Adrian is not a small blow.

Adrian doesn't understand anything, how can he be the boss of the Sterling Group?

And behind Adrian, there are Henry and his son. It means that the company has now fallen into the hands of Henry and his son.

Just thinking about it makes Chad feel sick.

He has been by Elliot's side for so many years, and he knows how much Elliot hates this father and son.

Asking Elliot to make such a decision is tantamount to cutting the flesh from his body and feeding it into the enemy's mouth.

After Mike came back, Chad said coldly, "Avery hasn't returned to Aryadelle yet."

"I told you, she won't be back for the time being." Mike put on his slippers and led him towards the living room, "You think of a way. Contact Elliot."

"How can I think of a way? How can I get in touch? What if I get in touch?" Chad pushed his arm away, "I am no longer a boss or subordinate with him. You let me get in touch. What did he say?"

"Even if you are no longer a boss and a subordinate, but you have known each other for so many years. you are still friends."

"He has many friends. There is no shortage of useless friends like me." Chad laughed at himself and said, "Why did you ask me to find him? Are you looking for him, or Avery looking for him?"

Seeing that Chad was so angry, Mike poured him a glass of water: "What if I said Shea was looking for him? Chad, Do you really think that Avery has a vicious heart and turns her elbows out to drive Elliot to a corner?"

Chad's expression froze, his eyes couldn't hide his panic: "Shea? Did you just say Shea?"

Mike explained, "Yes Shea is still alive. But she is very ill. Her health is not good. After giving Robert a blood transfusion, she went into shock once, and was rescued later, and then she developed kidney failure...Shea wants a kidney transplant. If she doesn't, she will die. Whether she will be able to recover after a kidney transplant is unknown. So Avery didn't tell anyone about this."

Chad Adam's apple rolled around, and his mind was in a mess: "Shea's kidney transplant, why should I let my boss transfer the equity?"

"Because Adrian's kidney can be transplanted to Shea. And Adrian is held in Henry's hands. It's actually very simple, but it's hard to accept." Mike sat down on the sofa and exhaled, "Elliot called Avery yesterday and broke up."

"Oh...you asked me to find my boss, did you want me to tell him about Shea?"

## When His Eyes Opened Chapter 1199

### Chapter 1199

“Yes. It’s better for him to know the truth than Avery alone.”

“Why didn’t you tell me earlier.” Chad threw the cup in his hand to the ground and roared, “You early Just got it, right? Why didn’t you tell me earlier? You b\*stard.”

Mike blushed after being scolded: “As for Avery’s considerations, I will definitely listen to her...”

“F\*ck you.” Chad clenched his fists tightly, extremely angry.

Is it too late to tell the truth now?

“Why are you so angry? Can’t you get in touch with Elliot? If you can’t get through to him, send him an email... He can’t possibly stop using all his social accounts, right?” Mike said angrily. Annoyed, trying to calm him down.

“Even if you tell Elliot about Shea, what can you do? He has already transferred the equity. You and Avery, you two are two sc\*mbags.” Chad couldn’t bear it anymore, and swiped his fist at Mike’s face.

“D\*mn it. You don’t need to swear, but you still do it. Those who didn’t know it thought it was your equity that was transferred.” Mike covered his face with one hand, and lifted Chad onto the sofa with the other, “Adrian is now in the hands of Avery. Let Adrian transfer the equity to your boss again.”

“It’s easy for you to say.”

“Because it’s that simple. It’s hard for you to think about it, then it’s hard for you to do anything.” They stared at each other with big eyes, and after a stalemate in the atmosphere for a while, Chad finally figured it out.

“Okay, I’ll contact my boss. If I can’t get in touch, I can’t help. Who is to blame for Avery’s stupid things?”

“Can you stop scolding Avery?” Mike begged with the pain on his face, “Avery hides it from Elliot, it’s not because Elliot is irritable and fragile. She wants to deal with the matter and then tell him what’s wrong.”

Chad: "Even if my boss is irritable and vulnerable, it's better than Avery's self-righteousness and the heart of the Virgin."

Mike: "It's obvious that your boss's problem is more serious. If your boss is a normal person, Avery doesn't have to worry so much. Avery fell in love with him. It's like raising an eldest son!"

Chad: "You idiot, shut up!"

Mike: "You're the idiot!"

...

Chad tried all the ways to contact Elliot but there was no result.

...

Bridgedale.

After Adrian did a series of preoperative examinations, the doctor asked him to sign the operation risk notice.

Although Adrian was a donor and taking a kidney was not life-threatening to the body, there were still risks.

He held the pen and looked at Avery.

"Doctor, Adrian didn't know how to write. Is there a red ink pad? he can press his handprint." Avery immediately spoke to the doctor.

The doctor immediately brought the red ink pad.

Adrian did not hesitate to print his own fingerprints on the notice.

The doctor said to Avery, "The operation is scheduled for tomorrow morning. Let him have a good rest today, don't be nervous."

Avery nodded. The doctor left the ward with the notice.

Adrian looked at her and asked, "Avery, is it because of me that you broke up with Elliot, right?"

## **When His Eyes Opened Chapter 1200**

Avery came to the hospital in the morning, Wesley saw that her eyes were so swollen, so he chatted with her for a while.

Adrian heard the conversation between the two of them clearly.

Avery immediately shook her head: "No. I broke up with Elliot because I didn't tell him about finding Shea. He didn't know why I brought you here, so he was angry."

"Then how can I get Elliot not to angry?" Adrian asked.

His question was simple and direct, and Avery was moved by it.

How to make Elliot not get angry, she had no answer in her heart.

Avery sat down beside the hospital bed and talked to him, "Adrian, the shares he transferred to you must not be transferred to Henry and Cole. Because this is a lot of money, if you give it to them, they won't treat you kindly because of this, and they may use the money to do bad things."

Adrian nodded after hearing her words: "Then I'll transfer it to you, okay?"

Avery shook her head: "Let's talk about it after the operation. Now I just hope that the surgery goes well and that you and Shea are safe and sound."

Yonroeville.

Elliot came out of the airport and saw Kyrie Jobin and his bodyguards at a glance.

Kyrie Jobin strode forward and patted Elliot's shoulder: "Our friendship for so many years, I know that you will not break up with me because of a woman. You may not know much about my current investment. Next, I will... I'll show you around."

"I'm going to take you to a good place today to show you the latest results of the projects I invested in! If you see it, it will definitely be an eye-opener.

They drive away quickly.

About an hour later, the car stopped in a remote park.

Elliot looked vigilantly at the sign at the entrance of the park.

There were two signboards, one signboard was Safari Park, and the other signboard was Biological Laboratory.

“Is it legal to open a biological laboratory in a safari park?” Elliot questioned.

Kyrie laughed: “I knew you were going to ask this question. There were many types of biological laboratories. This biological laboratory in a safari park is not the kind of biological laboratory you imagine.”

They went into the park.

Kyrie explained to Elliot all the way what research the biological laboratory was doing.

“We originally had a pair of monkeys in the monkey park. They had a very good relationship. They gave birth to four little monkeys. When the fourth monkey was born, the mother monkey had physical problems, so she was sent to a separate place for treatment.”

“At this time, the staff sent another female monkey. Soon, the female monkey developed a relationship with the male monkey, and the female monkey had a good relationship with the male monkey’s four little monkeys.”

” When the female monkey was pregnant, the original female monkey recovered. The staff sent the female monkey back, and the female monkey found out that the male monkey had a new love, and immediately became unhappy and refused to eat...”

Elliot said Listen intently as if he was listening to a story.

“It’s definitely not going to go on like this, so the team of experts in the biological laboratory transferred the emotionally injured female monkey out and decided to perform an operation on it.” Kyrie raised his eyebrows and asked Elliot, “Have you heard of amnestics ?”

Elliot shook his head without hesitation: “Unheard of.”

“Yes, I have only seen such bizarre things in movies and TV dramas before. But the biological laboratory I invested in did it. They used the latest medical methods to give this mother The monkey underwent amnestic surgery. After the operation, the female monkey’s mental state returned to normal.”
