

When His Eyes Opened Chapter 2137

Chapter 2137

The nanny: "Okay, don't worry, go to work!"

Avery: "Well."

Avery picked up her bag, put on her coat, and went out.

The temperature in Bridgedale has plummeted by nearly ten degrees in the past few days, as if passing autumn and entering directly into winter.

After she got in the car, she told Ali the address.

Ali asked, "Boss, are you and Hayden reconciled?"

"Not yet. I'm too much. If I were him, I wouldn't be able to calm down so quickly." Avery said calmly, "Hayden likes to eat chestnuts. When we come back in the evening, let's go buy chestnuts first."

"Well. He went to the pharmacy by himself last night." Ali said, "I didn't respond last night, and I just realized today why he went to the pharmacy. It's not that he feels a lot of pain, and you're afraid that the injury is too serious, and you feel guilty."

Avery felt even more uncomfortable when Ali said so.

"Boss, I know that you didn't mean to hit him. It's too embarrassing for you to be caught between the father and son. No one can do a job and family that is flawless and foolproof. Don't blame yourself." Ali comforted.

"Your mouth is getting sweeter." Avery said and glanced at Ali.

"Because my wife received the car from you, she is very happy. She asked me to serve you well." Ali blushed in embarrassment.

Avery couldn't help laughing: "Tell me what your wife wants in the future, and I'll buy it for her."

Ali: "Boss, don't do this. You're not afraid of other people's gossip? You might as well give me the money for the gift. I hand over the money to my wife, and my wife is happier."

Avery: "Hahaha, good."

Tate Industries Bridgedale Branch.

The arrival of Elliot and Chad caught Norah by surprise.

Margaret committed suicide yesterday, making the whole Jones family dumbfounded.

Norah's entire plan was messed up.

She originally planned to use the relationship between Travis and Margaret to get the Tate Industries into their own hands, and then try to get rid of Travis's control. Who knows, Margaret died, and now it is difficult for Travis to protect himself.

"Norah, is it an accident?" Chad said, breaking the silence.

The muscles at the corners of Norah's mouth moved, and the expressions on her face were colorful.

"Why didn't you say anything in advance when you came over? It's a bit surprising." Norah said, a smile on the corner of her mouth, "What's the matter with you coming here? By the way, Mr. Foster, how are you?"

"Are you? Do you always look forward to my death? When I die, you just want to find a way to take the Tate Industries as your own?" Elliot directly said this.

"The trust between us no longer exists, so you can humiliate me with the most vicious words. Even if I say the sky, even if you have no evidence at all, as long as you think I did the bad things, is it really me? Did I do it?" Norah complained for himself.

"Norah, how are your parents in Aryadelle?" Elliot seemed to have changed the subject.

Norah was stunned for a moment. After realizing what might have happened, she immediately walked to the corner, took out her mobile phone, and called her mother.

——Sorry, the user you dialed is temporarily unavailable, please try again later.

"What did you do to my mother?" Norah screamed in exhaustion.

Elliot: "As you said, the trust between us no longer exists. Even if I say the sky is breaking, even if you don't have any evidence, you doubted me for the first time. Why don't you call your adoptive father again?"

"No need to call! You must have caught them both together!" Norah clenched her phone tightly and gritted her teeth, "Elliot, I do things alone! What kind of men are my parents?"

"You finally admitted it." Elliot looked at her with all his time, "I'm not a man, it's not you, the poisonous woman who has the final say."

“Elliot, you let my parents go! You let them go!” Norah burst into tears, “Win the king and lose the bandit, I failed, and I have more to die for! But my parents are innocent!”

“You do have more to die for. But before you die, you must do one thing for me.” Elliot said indifferently.

When His Eyes Opened Chapter 2138

Chapter 2138

“Elliot, now my parents are in your hands, don’t say do one thing for you, even if it is ten Anything, a hundred things, as long as I can do it, I will do it for you. I only have one request, when I finish doing things for you, please let me live. My mother has diabetes, and my adoptive father was injured in the waist before. they can’t do heavy work. The two of them depend on me to support them, and if I die, neither of them will have a way to survive.”

Norah lowered her head, tears streaming down her face.

Chad watched this scene from the side, feeling very ironic. He didn’t sympathize with Norah at all.

In his opinion, Norah’s tears were crocodile tears.

If his sympathize with Norah and let her live, she will definitely come back to bite Elliot once she has a chance in the future.

“I asked the lawyer to draw up a document. After you sign the document first, I’ll consider whether I should give you a way out.” Elliot sat in the boss chair and looked at her lazily.

“What document?” Norah asked nervously.

Elliot picked up the phone, checked the time, but didn’t reply to her.

Chad was very curious, so he leaned into Elliot’s ear and asked in a low voice, “Boss, are you planning to abolish the gambling agreement?”

“Yes.” Elliot replied softly.

Their voices were not too loud, but just enough for Norah to hear.

Norah was now like fish on the anvil, even if she was told, it didn’t matter.

She would know when the lawyer brings the papers in later.

“I can sign an agreement to abolish the previous gambling agreement. Without Travis’s help, I would not have been able to accomplish the goal you set.” Norah knew that she had no other choice.

Even if she didn’t want to, Elliot would force her to sign the agreement.

Elliot doesn’t want to have any connection with Norah now, nor does he want to see Norah have any connection with the Tate Industries anymore.

...

The villa that Mike bought for the five experts was about half an hour’s drive away from where Avery lived.

The location of the villa was a little remote. The advantage was that the single-family villa had a relatively large area, which was especially suitable for doing research for them.

After Avery arrived, she found that there was no one on the first floor, but when she got to the second floor, she could hear their discussion.

The content revolves around the working principle of the device in Elliot’s head.

“You’re talking too much. If it is controlled by people, Margaret died yesterday, but isn’t Elliot still alive and well?”

“Margaret is dead, but there are other people in her team. There must be other people who also have this technology. If it is not controlled by humans, how do you explain the theory through which this device works?”

“The brain is not the same as the heart!”

“I didn’t say the brain is the same as the heart, Didn’t Avery find Margaret’s research materials? I stayed up late to read these materials, this special device made by Margaret is equivalent to remodeling a ‘neuron’...”

“I have also seen Those materials are gone! This neuron made by Margaret is an ice-cold machine! That’s why I propose that this device is controlled by humans!”

Their arguments were in full swing, and Avery stood outside the door and listened for a while. Then, a knock on the door interrupted their quarrel.

“Avery, you came just in time! How is Elliot today?” Ivory pulled her to sit beside him, “Fatty said Elliot is now a living robot under human control. His words and deeds...”

When His Eyes Opened Chapter 2139

Chapter 2139

“Hey! Who are you calling fat!” The expert who was called fat was a little angry.

“You are the fat man! Among the five of us, you are the fattest. Your real name is so long, who can remember it! Just call you fat!” Ivory said with conviction.

“Okay, a fat man is a fat man. It’s really hard to remember my name.” The fat man said angrily.

“Avery, you live with Elliot every day. You know best whether Elliot is a robot or not.” Ivory pulled back to the topic, “Is there anything unusual about his speaking habits and behavior?”

Avery said without hesitation, “I can tell you with certainty that Elliot is no different from before. He has his own independent thinking mode, including his conditioned reflex behavior, which is the same as before. He was not manipulated by humans. So this assumption can be crossed out.”

The three senior of them at the head showed regretful expressions one after another.

“Ivory, have you read Margaret’s research materials? What do you think?” Avery asked.

“If it is the special device that keeps Elliot alive now, and Elliot’s entire thinking pattern is the same as before, don’t you think it’s very contradictory? Didn’t you say Margaret could control him? What did Margaret use to control him? A computer or a special remote control device?” Ivory put forward his own idea, “Now that Margaret is dead, you should find the thing that can control Elliot.”

“Yes! I have the same idea as Ivory. As long as there is a controller, we can push it backwards and make the device in Elliot’s head!” Someone echoed.

Avery also wanted to find the controller. The problem is that even no one knows where Emmy is now. How to find the controller?

“Avery, let’s talk alone.” Ivory pulled Avery out of the room.

“Is there anything you can’t talk about in the conference room?” Avery asked.

“Because I can’t use them.” Ivory pulled Avery downstairs, “I want to see the device in Elliot’s brain, please let me see it!”

“I had sent over the CT of his brain. Didn’t you see it?” Avery wondered, “I remember it clearly, I put it in a cardboard box.”

“No. I’m not looking at that CT film.” Ivory leaned into her ear, whispered, “Let’s open his head and take a look at the device! Use a high-definition camera to record its appearance, so that we can do research? What Margaret used remote control, it doesn’t matter! The most important thing is The breakthrough is actually in Elliot!”

It’s said that, Ivory’s mind was very flexible.

This was a method Avery never thought of.

The reason why she didn’t think about it was because Elliot was only operated on by Margaret. Now that he still has a wound on his head, his brain can’t bear to open it again.

“Not now.” Avery refused. “His brain can’t handle it. I can’t let him take risks beyond my ability.”

Ivory: “Okay! I know it’s not the time yet. By then, we haven’t made a breakthrough yet, so just follow the method I said just now! I think he should agree, after all, we did this to save him.”

Avery: “We’ll talk about this later, but now we’ll think of other ways.”

At 5:00 p.m., Avery left from the secret research base of six of them and went to the city to buy chestnuts.

On the way, she messaged Elliot and asked him what he was doing.

Elliot quickly replied to her message: [At home.]

Avery looked at the message he sent and was stunned for a moment: [Where’s Hayden?]

He replied again in seconds: [Also at home.]

Avery felt a little suffocated.

Father and son were alone at home, would they quarrel again?
