

## Chapter 5060

Soon there was a dense document In the hands of Joseph.

This document records the information of all flights entering Mexico in the five days before the New York incident.

Since the vast majority of inbound flights are small and medium-sized aircraft,”

“Aircraft with a range of more than 15,000 kilometers are only a minority,”

“So after sorting out, there are less than 100 sorties in total.

And among the flights with less than 100 sorties,

Passenger planes accounted for 80%, and cargo planes accounted for 20%.

However, since the location of the circle drawn by Duncan is probably in South Asia and Southeast Asia,

There are no direct passenger planes between these places and Mexico.

During these five days, there was only one cargo plane taking off from Colombo, the capital of Sri Lanka.

The model of this cargo plane is exactly the Boeing 777 ultra-long-range passenger plane mentioned by Joseph just now.

It can be seen from the entry information that the plane took off from Colombo,

On the fourth night before the incident in New York.

After a 20-hour flight, it arrived at the border city of Monterrey in Mexico in the early morning two days before the incident.

And landed at Monterey International Airport.

The entry information also shows that in the entry application for this plane,

The goods filled in are tea and coffee beans, which are specialty products of Sri Lanka.

After seeing this information, Duncan said excitedly,

“There is a high probability that this is the plane!”

Joseph also agreed: “This aircraft is a Boeing 777-200LR,”

“Which is Boeing’s longest-range aircraft. It is not impossible to fly 20,000 kilometers with a moderate modification,”

“And cargo aircraft converted from passenger aircraft are very common,”

“But it stands to reason. , It should not be modified with ultra-long-range passenger aircraft.”

“Because ultra-long-range passenger aircraft has added more fuel reserve space,”

“The available commercial load is not large. Using this kind of aircraft to convert to a freighter does not care about the load,”

“But only about the efficiency. This kind of aircraft can basically fly directly to any two airports on the earth.”

Speaking of this, he paused for a moment, then said,

“Inspector Li, this plane seems to be prepared for global maneuvering,”

“Combined with that mysterious organization. The characteristics of the previous behavior,”

“I think your series of inferences, including this result, are correct! It is the target we are looking for!”

Duncan nodded: “I also think it is it!”

Joseph couldn’t help but admire: “Inspector Li, you are really amazing!”

“You can lock the plane used by the other party in such a short period of time.”

“I’m afraid this mysterious organization would never have imagined that they would be exposed so quickly!”

Duncan said seriously: “The main reason is May 47. With him here,”

“He can gradually help me identify clues and help me to conduct cross-comparisons.”

“This organization definitely did not expect that some of their dead men would survive,”

“And they would not believe that the dead men could help leak some useful key information,”

“It is even more unexpected that someone will find their plane.”

“If there is no information on May 47, we would even think that these dead people are all from the United States.”

“And, normally, even if someone is investigating suddenly”

“The dozens of dead people who appeared in the United States would never have thought that this was related to a regular cargo plane flying from Sri Lanka to Mexico.”

“They never thought that we could use the earthquake information of the past so many years to locate the approximate location of the dead people, so as to narrow the scope a little bit.”

Joseph sighed: “Information is important, but your ability to extract information from limited information,”

“And keep narrowing the scope is the key to finding clues, so you are called the best detective. It’s not unreasonable!”

Duncan smiled humbly, then pointed to the cargo plane’s registration number and company, and said,

“By the way, Master Wan, the plane’s registration number starts with 9V.”

“If I remember correctly, this is the registration of a Singapore aircraft. number, so this aircraft must be registered in Singapore,”

“And the company that it belongs to is YT-Airlines. Please check where the company is registered and the company’s public information,”

“Since it is a normal registered company. Then the public information should be relatively easy to find.”

“Okay!” Joseph also had a feeling that he could see the moonlight through the fog,

And he couldn’t hide his excitement and said:

“Inspector Li wait a moment, I’ll use it now. Check it out on my computer!”

After that, Joseph opened his laptop and searched for the company registered as YT-Airlines on Singapore’s corporate information query website.

The information shows that this company is registered in Singapore and is an aviation logistics company named Yuantai International Express in Chinese.

The company has a total of three shareholders, all of whom are Chinese,

And there are six registered cargo planes under the company’s name,

All of which are ultra-long-range versions of the Boeing 777.

After Joseph found out the information, he said to Duncan,

“Inspector Li, if you find these three shareholders, will you be able to dig out clues about the mysterious organization?”

Duncan said solemnly: “I think among these three, every shareholder should have a false identity.”

“It is impossible for such a cautious organization to leave any substantive clues related to people in this link.”

“The reason why a company must be registered and every aircraft must be registered is also their last resort.”

“For this reason, aviation safety is a major issue that most countries in the world attach great importance to,”

“If there are no complete procedures, their planes will not be able to fly at all.”

Joseph asked him: “Then what should we do next? ?”

Duncan thought for a while and said, “I met Young Master Wade before I came,”

“And he and I both felt that we should not have direct contact with each other during the investigation process,”

“So as to avoid exposure in advance, so I’d better report it to him. See what he thinks!”
