

Chapter 5061

At this time, Charlie had returned to Providence.

Claire went to class on time as usual, while he stayed alone in the hotel, waiting for news from Duncan.

Although Charlie saved Duncan's life like a savior, he admired Duncan in his heart.

He admires his meticulous thinking and meticulousness,

And he thinks this man can find breakthroughs in places that others can't think of.

It is his ability that has created his reputation as a detective.

And his idea of trying to use the clues of huge natural disasters to gradually locate where the dead soldiers are located is indeed very practical in Charlie's view.

Therefore, he believes that after Duncan went to Syria to see May 47,

It would not take long. The clues will gradually become clear.

Duncan didn't let Charlie down either. He made a phone call to him, which lifted Charlie's spirit.

After answering the call, Charlie asked him the first sentence: “Inspector Li, what’s the outcome?”

Duncan hurriedly said, “Young Master Wade, we have analyzed some clues now,”

“But what to do in the future is still up to you to decide.”

Having said that, he reported to Charlie in detail what he had analyzed and investigated together with May 47 and Joseph.

Charlie didn’t expect that Duncan would sort out so many valuable clues so quickly.

First of all, it is the location of the May 47 and other dead men.

At present, it can be determined that the high probability is in South Asia,

Especially the southeastern coast of Sri Lanka,

And the islands in the surrounding waters of Sri Lanka. It’s very accurate.

If they really want to find it in this range, it shouldn’t be difficult.

Secondly, it is the Yuantai International Express Company registered in Singapore.

In Charlie's view, the function of this company is most likely to transport the soldiers for this mysterious organization;

In addition, there is a very key clue, which is the six Boeing ultra-long-range aircraft registered under the name of Yuantai International Express.

Having mastered the registration numbers of these six planes,

Theoretically, he has mastered the transfer of the dead of this mysterious organization.

After reporting this, Duncan said to Charlie:

"Master Wade, there are two directions for in-depth investigation at the moment,"

"One is to find the dead man's station in the currently locked area,"

"And then monitor the person in charge of the dead man's station,"

"And then go all the way. Follow the clues and find the real core members of the mysterious organization;"

"The other is to find out the actual controllers of Yuantai International Express first, and monitor them closely;"

“I personally feel that this Yuantai Express has a high probability of linking your Aunt who committed suicide by taking poison,”

“She was the white glove of this mysterious organization in the outside world.”

“Most likely they are members of this mysterious organization’s periphery,”

“Or another kind of death squad that is higher than the May 47 dead men,”

“Looking up from their line, you should be able to find clues about the organization.”

Charlie thought for a moment, then said, “Inspector Li, there is no need to investigate these two directions for the time being,”

“This organization can exist for hundreds of years.”

“It must have built multiple firewalls long ago,”

“Once there is a problem with any one of the firewalls,”

“All connections can be immediately disconnected, leaving almost no clues.”

Having said that, Charlie added: “In contrast, We don’t have any firewalls now.”

“As you said before, once there is substantial contact, the contact must be mutual.”

“At that time, as long as the other party grasps a few clues,”

“They will be able to check all the people around me.”

“It’s clear to me that I’m not afraid of death, and besides, I have enough self-protection ability,”

“But I can’t make sure that everyone around me will not be in danger.”

Duncan couldn’t help but ask, “Master Wade, then What should we do next?”

“Can’t just stop like this? Then it will be difficult to make new progress...”

Charlie smiled and said, “Detective Li, we have another direction. You can go deeper.”

Duncan asked subconsciously, “What direction?”

Charlie said, “Keep an eye on the six planes under the name of Yuantai Express!”

After speaking, Charlie said again:

“They would never have dreamed that this express company and these six planes have been exposed.”

“This is the biggest advantage in our hands.”

“As long as they don’t notice the exposure, this Six planes will continue to serve this organization,”

“And since aviation information is public, every time they move planes in the future,”
