Chapter 906

I'm A Quadrillionaire by Xiruo Huang Chapter 906

Chapter 906

This was Pavan's family, the Tuffin family.

The Tuffin family was also one of the eight major families of the Milky Way.

They were very powerful, and many people looked up to them.

Even on the scale of the entire Milky Way, the Tuffin family was among the top forces.

"The reason I called everyone here is to discuss something. According to the news I just received, Pav discovered an indigenous living planet called Earth on the edge of the Milky Way. There are tens of billions of human beings living on it," the head of the Tuffin family, Orson Tuffin, said.

'What?'

When Orson said this, it immediately shocked the core members of the Tuffin family who were in the room.

'He found an indigenous living planet on the edge of the Milky Way with tens of billions of humans?'

Everyone knew how beneficial this was.. was.

However, at the same time, they also had a question in their hearts.

Since he encountered an indigenous living planet, why did Pavan send this news back?

This was obviously unreasonable.

In such cases, Pavan should have planted a slave mark on the Earth as soon as possible.

Then, he would use genetic drugs to stimulate the potential of human beings on earth and bring back the ones with great potential to the family.

Pavan's position in the family would change immediately if this were the case.

Even if he was not very talented, he could still overtake the others and become the most respected person in the family.

In the history of the Milky Way, many people with mediocre talents had flourished because of the slave mark they planted on the indigenous living planet.

Wasn't Pavan searching for this opportunity after leaving the family for so many years?

Before everyone could speak, Orson immediately changed the subject and continued, "But this indigenous living planet called Earth is a bit special. According to the news from Pav, there is a peak Planet Ranker on Earth, and he has imprisoned Pav, so Pav needs us to send someone to rescue him. What does everyone think?"

Indeed, they knew it was not that simple.

It turned out that he had encountered an obstacle, and had sent the message to ask for help.

If Pavan could handle it, he would not have sent a message back.

He would have already planted his slave mark.

It was impossible for him not to know how valuable an indigenous living planet was.

Once he needed his family's help, that planet would no longer belong to him.

However, the Tuffin family would also give Pavan the corresponding compensation.

Even the compensation alone would make many people jealous.

After all, the value of an indigenous living planet was too great.

"Orson, is the news reliable? An indigenous living planet with a peak Planet Ranker? It has never happened before," an old man said.

He was the deputy head of the Tuffin family and the current head's younger brother, Adan Tuffin.

A super family like the Tuffin family had a lot of children.

Before the next head was elected, everyone could compete fairly with various means.

Once the head was determined, everyone would stop fighting internally and help each other.

If not, they would be punished by the family and get kicked out.

Otherwise, a family would only decline if internal fighting continued, and it would be impossible to continue its glory.

“The news was sent back by Pav’s ship. Plus, such an incident is

not impossible just because there has been no precedent. The Milky Way is so big, and there are still many unknown areas, so anything can happen. I think it’s reliable, so I’m discussing with everyone how we will deal with this.”

“If it’s true, then the value of this planet is too great. An indigenous planet with an actual peak Planet Ranker means that the human talent on it is terrifyingly powerful. If we plant the slave mark on it, the feedback for the planter would be unprecedented. This might further empower our family,” Adan said with some excitement.

All the cores of the Tuffin family who were sitting lit up.

This was indeed the case.

The higher the talent of the people with slave marks, the greater the feedback would be to the planter.

- If it was really like what Pavan said, the possibility of the Tuffin family furthering itself in the future was very high.

## I’m A Quadrillionaire Chapter 907

Chapter 907

### Chapter 907

“Lord Orson, if the news is true, what else is there to discuss? We should send people immediately to plant a slave mark on Earth. Things might change if we’re too late.”

“Yes, I agree to send someone to Earth immediately.”

Everyone expressed their opinions.

The whole hall was chaotic and noisy.

—

It was exhilarating to hear the news from Pavan as this was related to the heights the Tuffin family would reach in the future.

Currently, the Tuffin family looked glamorous, and they were one of the eight major families of the Milky Way, but they had been the last of eight major families for many years.

Many families that were not inferior to the Tuffin family were eyeing their position.

Now, the Tuffin family was in dire need of change, but they needed to secure their position in the eight major families first.

Pavan's news could be regarded as the long-awaited rain for the Tuffin family.

When everyone in the Tuffin family saw these rays of hope, Orson waved his hand, and everyone fell silent.

"I didn't invite you here to discuss whether we should send people to Earth because there's no need to discuss that. Everyone knows that the value of the Earth is huge, so how can

we not take it for ourselves? I called everyone here to discuss who should go to Earth to plant the slave mark. Once the candidate is confirmed, this person will undoubtedly be the next head of the Tuffin family. Although it is a bit early and the family's training is not over yet, we have no other choice. Since there is an unexpected situation, and there should be special treatment. What does everyone think?" Orson said.

"I agree!"

"I agree!"

"I agree!"

Earth had such huge value, so no one opposed the idea of asking the next head of the Tuffin family to plant the slave mark.

However, determining the next head of the Tuffin family might be a fierce battle.

It was just that Pavan had been left out.

Although he was the eldest son of the Tuffin family, he was not even among the top five most talented people in the Tuffin family.

Since they needed to choose the younger head of the family, he had to be the best person among the younger generation of the Tuffin family.

"Very well, issue a family summoning order to all the direct descendants of the Tuffin family who have been trained abroad, and ask them to come back within a month for

the election of the next head of the Tuffin family. If they're late, they'll be disqualified. We'll go to the Earth immediately after the

election," Orson decided.

Earth.

David locked Pavan and the rest in Dark Cape, and they were interrogated separately.

The final information they gathered infuriated David and the gang and taught them more about the slave mark.

Luckily, Pavan had failed.

If not, everyone on Earth would be doomed as they would never escape from Pavan's control forever.

They would still be trapped until the Earth went extinct.

David also posted the explanation of the slave mark on the Internet and instantly ignited the anger of human being worldwide.

At the same time, David also gave them some information about the Stella Civilization Galaxy, the Milky Way Empire, and the Tuffin family.

The Tuffin family that Pavan belonged to was one of the eight major families of the Milky Way, and they were very powerful.

In other words, the Tuffin family would send a stronger team to Earth after three months. David felt that his current strength was not enough, and that he needed to continue to improve.

Unfortunately, the system was still updating.

This made him a little helpless, since this had never happened before.

It had been three days, and it was still updating.

David could not do anything either.

He could only continue to use the system after it was updated. Night time.

## **I'm A Quadrillionaire Chapter 908**

## Chapter 908

### Chapter 908

David was sleeping.

Suddenly, he found himself in an unfamiliar place.

He thought he was dreaming, but David felt something was *wrong* after a while.

A dream would not feel so real.

Just as he was about to look around, a figure slowly appeared in front of him.

The figure slowly looked more authentic.

It was an old man with long bangs that completely covered his forehead.

David looked at the old man and felt that this man looked familiar, but he was sure that he had never seen this man before.

It was such a strange feeling.

He had obviously never met this man before, but the man felt very familiar to him.

David calmed himself down.

Before he could start asking, the old man spoke.

“Hi, David, nice to meet you.”

“Who are you? Why do you feel so familiar to me even though I’m sure I haven’t met you before?” David asked.

“Hahaha... Is that so? I also feel that you are very familiar,” the old man said with a loud laugh.

David frowned and asked again, “Who the hell are you?”

However, what the old man said next surprised David.

“I am you!”

“What? Impossible!” David asked with wide eyes.

“Nothing is impossible! To be precise, I am you three thousand years later,” the old man said again.

“What... What the hell is going on here?” David stammered.

Even though his strength had significantly increased now, and he had seen people from alien planets like Pavan, he was still a little caught off guard by this news.

“David, since you’re here, it proves that the earth’s catastrophe has come. You have met Pavan, right? The system will now connect to the Stella Civilization Galaxy and start the second phase.”

“You... How do you know?”

“David, I am very relieved to see you like this, because although we are the same person, we have different destinies. I have been limited in my life, and I don’t even have the right to have any descendants, but you have unlimited potential. This is good ... Very good... My efforts were not in vain, and God finally blessed me for once,” the old man’s voice started to choke up.

As he listened to the old man’s choked voice, David’s heart felt

sad for some reason.

Maybe the old man was too infectious.

David understood that this old man definitely had an inseparable relationship with the system.

He also urgently wanted to gain some information about the system now.

He had the system for so long.

Aside from knowing that it was called a super lavish system and he could become stronger by spending money, he did not know

anything else.

The old man sobbed by himself for a few minutes.

Then, he suddenly stretched out his right hand and pulled apart the bangs on his forehead, exposing his forehead.

David’s eyes narrowed.

This... This old man had a blood-red word that said ‘slave’ on his forehead.

'Is he planted with a slave mark?'

"David, do you see this? This is the difference between us. Pavan planted a slave mark on me, and my life, including my descendants, is controlled by him. All of my hard work is for him, so I didn't dare to have any descendants. On the contrary, you've gotten away with this. With your talent, you will have endless potential and chances in the future. The Stella Civilization Galaxy won't be your finish line. You should look further. More powerful civilizations are waiting for you to

conquer, and your success will also be my success. Hahaha!" The old man said excitedly.

Then, he started guffawing.

At this moment, David's brain was empty.

He felt that this old man was a maniac.

However, deep in his heart, he believed what this old man said. "Sir, can you tell me what's going on?" David asked respectfully.

## **I'm A Quadrillionaire Chapter 909**

Chapter 909

### **Chapter 909**

The old man looked at David and started reminiscing.

David did not bother him.

After a while, the old man said slowly, "David, I know it's hard for you to accept this for now, but I want to tell you that we are indeed the same person. You would have turned out like me in three thousand years if you had no system."

"I don't understand what you mean," David said.

"Then I'll ask you one last question. You should know Celia, right? What is your relationship with her?" the old man asked.

"She's my girlfriend. I love her very much and will protect her for the rest of my life," David replied honestly.

“That’s good! You must cherish her. Celia is a good girl,” the old man said with a sigh of relief.

Three thousand years ago, he let down Celia in his timeline.

Now, he hoped David could make up for his regrets.

The old man felt relieved when he heard David talking about being with Celia.

He did not want to intervene and affect David and Celia in this timeline.

“I know,” David said seriously.

“There is another woman. If you can, try to help her as much as possible,” the old man thought for a while and added.

“Who?”

“Selena.”

“Her?”

“You know her?”

“Yes, I know her, and we’re pretty close.”

“Then, you... Have you developed into that kind of relationship?”

“Not yet! I already have Celia. *Are you and Selena...*”

“No. Selena is also very talented. When I went out to find a way to remove the slave mark, she was always by my side. We have been together for nearly three thousand years. She can live a good life but chose to take the road of no return with me. We all knew that under the restriction of the slave mark, there could be no descendants. So, we had never gone passed that stage. Ultimately, I could only watch her die in the ruins of the God Tier Civilization to give me hope in life. I owe her too much...” the old man said sadly.

David was taken aback.

He did not expect David in that timeline to have such a relationship with Selena, or should he call it a star-crossed relationship.

In the end, in order to give the old man a chance, she died in the ruins.

In that moment, David felt a massive change in his impression of Selena.

Even though he did not hate her before, he was starting to appreciate her a little bit now.

This woman had personality, persistence, and righteousness .

She was indeed a nice woman.

“Don’t worry! I will do my best to help her. Maybe I can make up for your regrets,” David replied.

The old man nodded and continued, “Three thousand years ago, I graduated from South River University, and then at Celia’s insistence, I joined Beautylish, which belonged to her mother, Mrs. Young.

“Slowly, I won over Mrs. Young and Mr. Young with my hard work, and also won over many customers to become the general manager of Beautylish. When Celia and I were fantasizing about a better life in the future, the catastrophe came...”

After listening to the old man’s narration, David could not return to his senses for a long time.

It was just unbelievable.

According to the old man, he genuinely was himself three thousand years later.

After being dumped by Sarah after she cheated on him with Leo during college, he still vomited blood and got sent to the university’s infirmary.

However, the fate of the two was completely different next.

## **I’m A Quadrillionaire Chapter 910**

### **Chapter 910**

#### **Chapter 910**

David’s life changed dramatically after he got the system, while the old man was still just an ordinary person.

He continued going to class. Later, Celia discovered he had broken up with Sarah, so she launched a fierce pursuit of him, and the two stayed together after graduation.

After that, he joined Mindy's Beautylish.

While everything was going well for him when the catastrophe arrived.

A comet hit the Earth.

Pavan did stop it at the last minute, but he was not so kind since he was the one who pushed the comet to Earth in the first place.

If he had not accelerated the comet, it would not have reached Earth and would have been intercepted by Jupiter's strong gravitational pull.

After saving the earthlings and becoming the savior, Pavan successfully planted the slave mark on Earth.

Then, he used the genetic drug on young people ages ten and thirty on Earth to stimulate their potential.

The old man happened to be one of them.

He did not expect his talent to be completely activated after he used the genetic drug to stimulate his potential.

His cultivation speed was shocking.

The old man at that time did not know the function of the slave mark

Thus, he practiced very hard.

In reality, he passed on half of his potential to Pavan.

It was not until later that he realized something was wrong.

It was a pity that the slave mark had penetrated into the bloodline of human beings on Earth by then.

Whether it was the descendants of humans on Earth or humans born on Earth, they would all be controlled by slave marks.

Since then, he had embarked on the road to remove the slave mark

This had been going for nearly three thousand years.

During this period, the old man met many people with the same fate as him.

They all had unique talents but were planted with the slave mark. However, they were not willing to accept their fate. For the continuation of the entire species, they began to search for a way to remove the slave mark.

The old man organized them and searched together.

However, three thousand years had passed, but they still had not found any solution.

“Then what happened to this system? Were you the one who gave me the system since it chose me?” David asked.

“The system was found in the relics of a God Tier Civilization. In order to get it, we sacrificed a lot of people. In the end, I was the only one who escaped with the system. Everyone pinned their hopes on it, but because the technological level of the God Tier Civilization far exceeded our imagination, I couldn’t solve it at all. You can only slowly find out for yourself in the future,” the old man replied.

“God Tier Civilization ? What level is that? I only know that the Milky Way is a level 3 civilization, and the Earth should be less than level 1,” David asked curiously.

“The God Tier Civilization is a civilization beyond level 9. If you have to count how many levels it is, it should be a level 10 civilization.”

“L—Level 10 civilization?” David asked in shock.

A level 3 civilization in the Milky Way was already a behemoth to David.

So what was a level 10 civilization like?

Did this civilization even exist?

“That’s right. The universe is huge, and it’s unimaginable. The Milky Way is just a small corner of it. There are still a lot of high level civilizations out there, and you need to discover them yourself in the future. After I got the system, I was badly hurt even though I survived. In the end, I opened the system before I died and gambled with my life. Just like that, the system quickly brought me back to reminisce about my life. Ultimately, we returned to the time when I was in my third year of uni and got

dumped by Sarah. At that point, I could not hold on anymore. I think the system should have appeared at that moment, right? Right now, I am dead, and what you’re seeing is just a glimpse of my soul.”
