

I'm A Quadrillionaire chapter 925

I' m A Quadrillionaire chapter 925

David did not know that Pavan 's death had caught the Tuffin family 's attention.

Pavan 's death directly made Adan, the second head of the Tuffin family, lead a team to Earth.

Adan was at the same level as Orson, the head of the Tuffin family.

Although he lost the position as the head, one should not underestimate Adan 's strength as he was a main representative of the Tuffin family.

He even assisted Orson in managing the entire Tuffin family.

However, even if David knew this, he would not care. With his current strength as a peak Cosmos Ranker, he was unbeatable even in the heart of the Milky Way.

They would have proceeded with caution if the Tuffin family knew of David 's true strength.

After killing Pavan, David entered the Octagon under the leadership of the ship 's commander and took out the genetic drug that could stimulate human potential.

However, the number puzzled David a little.

According to the old man, Pavan had used genetic drugs on people between the

ages of 10 and 30 around the world, so there should be many of them.

Despite this, David only found a little over 10,000 of them.

After he asked, he found out that genetic drugs were expensive and could be diluted.

Pavan accumulated 10,000-plus drugs over many years. He wanted to use them after he found an indigenous living planet and planted his slave mark on them.

However, the more you diluted the drug, the less effective it would be.

Furthermore, the genetic drugs originally had no side effects, but after a lot of dilution, some side effects might occur.

Even if Pavan successfully planted the slave mark, he would not be so generous and immediately use them.

He would definitely dilute them to be able to use them on all the earthlings.

In this way, although the effect would be greatly reduced, it would not have much of an effect on people who were rather average.

On the other hand, it could still stimulate the ones who were very talented.

As for whether there were side effects, Pavan did not care.

What he needed was someone with outstanding talent.

David was very talented in the other timeline, so he was

stimulated by the diluted genetic drug and made rapid progress.

Unfortunately, he was limited by the slave mark.

In the end, Pavan succeeded and prospered.

After David brought the genetic drugs back, he was happy and thought about

how to arrange for everyone to use these drugs.

Since there were certain side effects after dilution, he would definitely not dilute it.

In this case, only a little over 10,000 people could get the drugs.

As for who, David planned to keep some for the people around him. Then, he

would distribute the rest of them according to the ratio of each force.

Once someone reached Satellite Rank, their life expectancy would increase.

Naturally, David did not want to see the people around him die.

However, when he reached the center of the Milky Way, he would buy more

genetic drug to bring them back if he had the chance.

He just needed to spend some money.

Right now, he had nothing but money.

Besides, those expenditures would lead to lavish points.

First, David gathered the forces in Somerland and hosted a meeting.

Since David was the number one on Earth, as long as he said something,

everyone who got the notice would immediately

drop what they were doing and rush over no matter what.
The next day, all the heads of various forces gathered in
Capital City David had
gathered everyone from all the various forces.
