

## I'm A Quadrillionaire Chapter 931

Chapter 931

lone and Pavan shared the same bloodline.

Pavan's grandfather was Orson, while lone's grandfather was Adan.

Orson and Adan were brothers.

Therefore, the bloodlines of the two were relatively close.

They had been close since childhood and shared a good relationship

When lone heard that Pavan had died, she was stunned.

On the side, Nine heard the news but did not feel much.

He knew Master Pavan, but they were not close to each other.

Since his lineage had deteriorated , Nine had to hide and wait until the family meeting to amaze everyone with a single brilliant feat.

Hence, before this, the other direct descendants of the Tuffin family would never even look at him.

"Yes, Pavan is dead! His life plaque is broken," Adan confirmed.

"How did he die?"

"Before he died, he sent a message to the family saying that he found an indigenous living planet on the edge of the Milky Way, but this planet had an inhabitant at peak Planet Rank. Not long after that, his life plaque broke."

"Found an indigenous living planet?"

Nine and lone were simultaneously astounded.

They naturally knew how valuable an indigenous living planet was.

They just did not expect the eldest son of the Tuffin family, Pavan, to find one. Aside from the fact that he did not reap any benefits, he even lost his life there.

Suddenly, Nine's heartbeat quickened, and his breathing grew heavy.

He thought of a possibility.

Were they going to the indigenous living planet Pavan found ?

This was the only possibility to explain why they were taking the Milky Way Battleship to a destination they had not reached for more than two months.

“Lord Adan, could it be... that the indigenous living planet discovered by Pavan is called Earth?” Nine asked breathlessly.

“That’s right! We’re on our way to Earth now, and there are still about ten days to go before we arrive,” Adan replied.

Nine was already laughing wildly in his heart.

No wonder the Tuffin family suddenly held a family meeting ahead of schedule to determine the next head.

It turned out they had discovered an indigenous living planet.

Now that Pavan was dead, he would not be able to plant his slave mark on Earth anymore.

Now, the Earth was still unowned.

If he was not wrong, Adan was bringing them to Earth to plant a slave mark.

He was now the head of the younger generation of the Tuffin family, so he must be the one identified to plant the mark.

An indigenous living planet with a peak Planet Ranker must be highly talented

If he successfully planted the slave mark, the benefits he would get in the future were sure to be enormous.

He would likely prosper from that moment on.

Containing his excitement, Nine asked while hiding his intention, “Lord Adan, we’re going to Earth to...”

“Nine, by now, you must have guessed that the reason why the Tuffin family called everyone back in advance to determine the next head is to have the new head of the younger generation go to the Earth and plant a slave mark. Since you defeated everyone during the family meeting and became the head of the younger generation, of course, you’re the one who will do this. Nine, with your talent, coupled with the feedback

from the slave mark, your future achievements will be limitless. The Tuffin family will rise again because of you,” Adan said seriously to Nine.

“Thank you, Lord Adan. I am grateful for the cultivation of all the elders in the family. I will not let everyone down, and I will return the Tuffin family to its former glory,” Nine said solemnly,

standing up to bow in front of Adan.

The value of an indigenous living planet with a Planet Ranker was too great.

Since the family could give him this chance, it meant that they trusted him.

His dissatisfaction with the Tuffin family’s coldness toward him back when his bloodline deteriorated disappeared at this very moment.

Chapter 932

The Tuffin family was huge.

Therefore, they needed to be coordinated.

They would not be able to do anything if their enemies were too strong.

He would avenge his parents’ and relatives’ death after he was strong enough.

“Nine, I know you’re unhappy with the family because we did nothing when your family was killed. However, you must know that we were not the Allaband family’s opponents even in our heyday. If it weren’t for the Grandmaster still being alive and scaring the Allaband family, the entire Tuffin family would have been wiped out because of your lineage. So, please don’t blame the family. Even so, it’s alright now. You have excellent talent, and in addition to the slave mark, you will have all the chances in the world for revenge. From now on, you have to work hard.”

“Lord Adan, I understand. I don’t blame you either. I will definitely seek revenge on the Allaband family for the blood feud between my parents and relatives.”

“That’s good! Nine, I have one more thing to tell you. Ione is my favorite, and she’s also the most outstanding and beautiful granddaughter I have. She was impressed by your performance at the family meeting, and she adores you. I hope you can accept her and become her partner. I believe she will help you in the future.” Adan smiled and looked at the two of them.

Upon hearing this, Nine looked at lone next to him.

lone bowed her head a little shyly.

“Lord Adan, I also like lone very much. It is my great honor to be her partner. I will definitely not let her down,” Nine said.

Although he did not want to talk about romantic relationships right now, Nine could not refuse since Adan had spoken.

It was because he also had to rely on Adan’s mid-Cosmos Rank strength.

What he wanted to do most now was to improve his combat power and settle the deep blood feud he bore.

As long as he became lone’s partner, he could utilize the power backing her.

Not only was Adan powerful, but he was also second only to the head of the family, Orson, in terms of authority.

Now, all of them were being very helpful toward Nine.

Furthermore, lone was indeed stunning

She was one of the most attractive women Nine had ever met.

Thus, he had no reason to reject.

“Hahaha! Alright, after we get this done and return to the family, I’ll host a huge banquet for you two,” Adan said while guffawing.

“Thank you, Lord Adan!”

“Thank you, Grandpa!”

lone and Nine said together.

“Advance at full speed!” Adan roared.

The Milky Way Battleship’s speed doubled as it headed to Earth.

At night, lone followed Nine to his room.

The two held each other immediately.

As the two approached each other, their clothes disappeared one by one.

The following day, Ione left the room quietly when she saw Nine still sleeping.

After she left, Nine opened his eyes and sat up.

His eyebrows were furrowed together.

I thought that girl was innocent and pure, but I didn't expect this not to be that b\*tch's first time!

Nine, the future head of the Tuffin family, was picking up someone else's used toy.

Furthermore, he even had to become her partner in a grand banquet

At that moment, Nine felt a fire burning inside him.

However, this was not the time to have a fallout with her.

Just you wait, you b\*tch!

## **I'm A Quadrillionaire Chapter 933**

Chapter 933

Ten days passed again.

The Earth was in a tense situation right now.

During this period, the earthlings learned not only about the huge size of the Milky Way from the Internet but also that some powerful aliens could physically cross the void and even blow up a small planet with one punch.

There were also countless videos circulating online.

At one point, it made them feel like they were watching a sci-fi movie.

As they learned more about the Milky Way, the earthlings gradually understood that the Earth was really just a low-level planet on the edge of the Milky Way.

The outside world was too big.

The Earth was like a grain of sand in the desert that was the universe or a drop of water in the ocean.

It was very unremarkable.

Therefore, they became strongly determined to succeed and strived to improve their strength.

They hoped to one day venture out of Earth and explore the vast starry world outside.

At this time, the Milky Way Battleship of the Tuffin family approached the solar system, heading straight for Earth.

Pearl had entered Tiger Rank in a short period after using genetic drugs to stimulate her potential.

This was also thanks to the careful teaching of David, a peak Cosmos Ranker.

During this time, David had been on alert for the arrival of the Tuffin family.

He dared not to be careless.

Once he noticed the people from the Tuffin family, he had to stop them in time, and he could not let them land on Earth.

Otherwise, countless innocents would be caught in the conflict if they were to engage in a battle.

Earth simply could not endure the aftermath of a battle in his realm.

While David was teaching Pearl, he suddenly frowned.

Then, he instantly disappeared, leaving a trailing sentence echoing in place.

“Miss Pearl, you should practice first. I have something to deal with, and I will be back soon.”

Pearl hurriedly looked for David after hearing this.

However, he was nowhere to be seen.

Inside the control room of the Milky Way Battleship.

Adan and Nine looked joyfully at the blue planet not far away. “Lord Adan, this should be Earth, right?” Nine asked excitedly.

This was where his destiny was set to change.

Once he planted the mark, his talent would go up a few notches again. His strength would also grow by leaps and bounds.

At that point, revenge would no longer be a luxury to him.

Nine was extremely thrilled at this moment.

“Yes, according to the news from Pav, this is Earth, and it is also an indigenous living planet with a peak Planet Ranker. Thus, it is very precious,” Adan replied.

“Then what do we do now?”

“We’ll land and immediately conquer Earth with our most powerful forces. If these aborigines dare to attack the direct descendant of the Tuffin family, they will have to pay the price. Pav is the eldest son of the Tuffin family, but he lost his life here. If we didn’t come here to plant the slave mark and take advantage of the value of these aborigines, I’d have already made the entire planet a burial offering for Pav,” Adan said in a deep voice.

This was what Orson told Adan before he left.

Not only would they plant slave marks on this indigenous living planet that dared to take action against a direct descendant of the Tuffin family, but they would also want them to fear the Tuffin family.

“Full speed ahead. Land on Earth!” Adan roared.

“Yes, Lord Adan!”

All the operators inside the control room of the Milky Way Battleship answered loudly at the same time.

“After entering the Earth’s atmosphere, directly destroy the ten nearest cities and make them burial offerings for Master Pavan. At the same time, let these aborigines know the consequences of offending the Tuffin family.”

“Yes, Lord Adan!”

The Milky Way Battleship headed toward Earth.

As it got closer, it started slowing down.

Otherwise, if they hit the Earth with this speed, they would penetrate it or smash it into pieces with the ship’s power.

Adan and Nine watched as the Earth approached and grew bigger.

## I'm A Quadrillionaire Chapter 934

Chapter 934

Their excitement was beyond words.

Suddenly, a bright spot on Earth caught the attention of everyone in the control room.

'What is this?'

While everyone was in doubt, the bright spot flickered.

Then, as it approached quickly before crashing directly into the Milky Way Battleship.

Boom!

A huge crash resounded across the sky on Earth.

Adan and the others felt the ship sway for a while. After that, the Milky Way Battleship suddenly stopped moving forward.

Although the Milky Way Battleship had been slowed down, it had still been moving very fast.

Thus, when it suddenly stopped, everything inside the ship lurched forward due to inertia.

However, this did not affect Adan and others.

With their great strength, dealing with such trivial matters was very simple.

If it were an ordinary person, they might have fallen down face first.

The highlight of this collision with the Milky Way Battleship was

naturally David, who flew out of the Earth at high speed.

He had been paying attention to the void outside the Earth because he refused to let the people of the Tuffin family approach Earth.

Thus, he directly collided with the Milky Way Battleship to intercept the opponent.

The Milky Way battleship was indeed an essential military strategic weapon of the Milky Way Empire.

It suffered no damage at all after David suddenly stopped it at such high speed.

One could see how great its defense was.

It was much stronger than the Octagon.

After stopping the Milky Way Battleship, David did not even bother to lament about this ship's power.

Instead, he just pushed the Milky Way Battleship back.

It was still very close to Earth, and he would not keep the Earth within his opponent's firing range,

The farther away, the better.

The sound of David's collision with the Milky Way Battleship moved so slowly that it took several minutes to reach Earth.

Humans all over the planet could hear a loud bang.

Mason was training Julia when he heard a loud bang.

He narrowed his eyes and looked up at the sky.

Suddenly, his pupils contracted.

"Julia, I'll go up and take a look. You should protect yourself."

After Mason finished speaking, he shot directly into the sky.

"Great-grandpa, be careful!" Julia shouted.

Then, she quickly returned to the house, went online, and watched what was going on from the satellite.

Celia and Selena were chatting when they also heard a loud bang.

Then, the two quickly came to the villa's top floor and looked up at the sky.

Since their realms were not high enough, they could not see what was going on in outer space like Mason, who was a Super God.

"Celia, I'll go up and take a look. Wait for me here," Selena said to Celia.

"Okay, Selena. Be careful," Celia replied,

Selena grunted a reply before her body soared into the sky.

Now, she was already a partial Super-God.

Aside from Mason and a few others who upgraded to Super-God Rank after being stimulated by the genetic drug, Selena was one of the strongest people on Earth.

At the same time, Selena took the opportunity to make swift progress and successfully overtook her grandfather Delmont to

become the strongest person in the King family.

The masters above partial Super-God Rank went into space as fast as possible.

However, their speed was still miles behind David's.

## **I'm A Quadrillionaire Chapter 935**

Chapter 935 'What happened?

Everyone in the Tuffin family inside the Milky Way Battleship control room was stunned.

The ship was now backing up after it shook for a while.

Since the accident just now happened too suddenly, Adan did not even notice what that light was.

"What's going on?" Adan asked in a deep voice.

"Lord Adan, we're looking for the cause," an operator replied.

"Hurry up!"

"Yes!"

After only ten seconds...

"I found it! I found it!" shouted another operator.

Immediately after that, a shocking scene appeared on the screens of the Milky Way Battleship control room.

They saw a young man below the battleship, and he was pushing the battleship back.

'How can that be?'

Adan and the others stared at the young man on the screen.

He could intercept the Milky Way Battleship that was flying at high speed and also resist the power of the Milky Way

Battleship while pushing it backward.

Was this something an citizen of an indigenous living planet could do?

Aside from the people in the control room, even Adan, a super powerhouse at mid-Cosmos Ranker, was also stunned.

It was not that David's strength shocked him, as many people from prosperous areas in the heart of the Milky Way could do the same.

Instead, it was because they were at the edge of the Milky Way, and this was a resource-poor area.

How could such a person appear in this place?

If someone wanted to do this, they needed to be at least a Stellar Ranker.

Judging by this kid's age, he should not be too old!

The news Pavan sent back to the family stated that the Earth was only a level 0.7 civilization.

It was already shocking for this kind of low-level civilization to have a Planet Ranker.

Now, this person had gone a step further and reached the combat power of a Stellar Ranker.

It seemed that either the opponent had only broken through recently, or he had been hiding his true strength.

In Adan's opinion, this earthling had definitely hid his strength from Pavan.

If he had just broken through, he would not have fully grasped the power of Stellar Rank yet.

Furthermore, he would most likely not be able to do this.

'This son of a gun actually knows how to hide his strength in the face of the enemy.

'Interesting. Very interesting.

Adan had thought that this trip to Earth would be boring.

He was a Cosmos Ranker, so it would be very easy for him to suppress an indigenous living planet.

Adan was not bothered even though this indigenous living planet had a peak Planet Ranker.

However, he did not expect to meet an aboriginal with a combat power that reached Stellar Rank.

This was so much fun.

Even so, this was just entertainment to him. Adan would not pay much attention to it.

Even though Stellar and Cosmos Rank were only one rank apart, the difference in combat power between the two was like heaven and earth.

Stellar Rank was only in the Star Realm, while Cosmos Rank had reached the Universe Realm.

The two seemed to be of similar levels, but there was a massive gap between them.

Satellite Rank, Planet Rank, and Stellar Rank were in the Star Realm, while Cosmos Rank, Celestial Rank, and Infinity Rank that came after Stellar Rank were all in the Universe Realm.

## **I'm A Quadrillionaire Chapter 936**

Chapter 936

Further up would be the legendary Eternal Realm.

David kept pushing the Milky Way Battleship that was about to land on Earth.

"Lord Adan, should we stop him?" Nine asked.

"No, it's been a long time since I met such an interesting person. It seems that he doesn't want us to go to Earth. He wants to push us farther away to protect the Earth. Let's give him a chance. I would like to see if this earthling will choose to fight us to his death or run away after learnin the strength of the Tuffin family," Adan said with a grin.

Although David wondered why the Tuffin family did not respond, it was not the time to care about that now.

The battleship this time was obviously more advanced than the last one Pavan came in.

The farther away from Earth, the better:

That way, even if the Earth were attacked, David would have enough time to stop it.

He could only fight with ease once he knew the Earth was absolutely safe.

He had a hunch that the people from the Tuffin family who came this time definitely did not come in peace.

After ten minutes, David glanced back at the Earth.

Then, he stopped when he figured they were at a safe distance.

He left the Milky Way Battleship and stepped back quickly.

After that, he stood in front of the Milky Way Battleship.

At this time, Mason and the others who were partial Super-Gods or above rushed behind David and looked at the behemoth in front of him.

The battleship that came this time was bigger, more powerful, and more shocking than the one Pavan came in three months ago.

“David, what’s this...” Mason asked.

“They’re from the same family as the one that came last time.

They’re all from the Tuffin family in the Milky Way Empire. Pavan had sent news back to his family after I stopped him,” David answered.

‘The people from the Tuffin family?’

Mason and the others were shocked.

They had learned a lot about the Milky Way Empire after their Internet was connected.

So, they also would not forget the other forces.

The Tuffin family seemed to be among the eight prominent families of the Milky Way Empire, right?

Back then, despite Pavan telling them about this, they never connected Pavan to the Tuffin family.

If they could become one of the eight prominent families in the Milky Way Empire, they would be extremely powerful.

“Is it the same Tuffin family that stands among the eight prominent families of the Milky Way Empire?” Mason asked.

“Yes, that’s them,” David answered affirmatively.

“W-W-What should we do?” Mason stammered.

At this moment, even the old man who had experienced all kinds of turbulence on Earth felt discouraged.

How would the Earth resist the behemoths of the eight prominent families of the Milky Way Empire?

The other powerhouses, including Selena, Marlon, and the others, were all looking at the Milky Way Battleship with wide

eyes.

‘It’s the Tuffin family, one of the eight prominent families of the Milky Way Empire.

‘What should we do?’

‘Can Earth survive this calamity?’

Soon after, they looked at David hopefully.

If David could not do anything, then Earth would be doomed.

“Old Master Stefani , you guys should go back first. Watch the Earth. I can handle this,” David said expressionlessly.

“David, c-can you really handle this? Why don’t you leave first? You can survive anywhere with your talent. When you become

stronger in the future, you can just avenge all of us,” Selena said, unable to hold herself back. ‘Yeah, David. If you can’t stop this, you should flee. You don’t have to worry about us,” Mason added.

David turned his head to look at Selena.

He could see the reluctance in her eyes.

When David wanted to comfort her, Adan’s voice came from the Milky Way Battleship.

“You’re the strongest people on Earth, right? Aside from that one who’s piqued my interest, the rest of you are like trash. However, I can understand. After all, you’re just indigenous people on an indigenous planet on the edge of the Milky Way.”
