### **I'm A Quadrillionaire chapter 945**

I'm A Quadrillionaire chapter 945

David hovered in the air.

His body exuded powerful energy, and the void surrounding him was also distorted.

He moved his limbs and felt the activity of the cells in his body.

They all seemed to be as excited as he was.

Since he had exposed his strength, he should finish the fight as quickly as possible.

Woosh!

David's body disappeared instantly.

Like a flash of lightning, he charged toward the Milky Way Battleship of the Tuffin family.

Adan was still in shock and had not returned to his senses.

Suddenly, his eyes widened.

'He's coming!

'What incredible speed.

Oh no! The Milky Way Battleship can't resist the attack of a peak Cosmos Ranker!

Adan shouted, "Retreat! Now!"

However, right after he said that, and before the others could do anything, David reached the massive body of the Milky Way

This chapter is provided by . Visit for daily update.

Battleship

He clenched his right fist and swung it at the Milky Way Battleship.

This was not an ordinary punch.

Void Punch was one of the three major skills that the system had rewarded him with.

Although it was only at entry level, one should not underestimate the power it yielded when it was used by a peak Cosmos Ranker like David.

If one looked carefully, one could see the space cracking around David's right fist.

Thus, it was evident how powerful this punch was.

It would be even stronger than any of David's previous punches.

Mason and others had been staring at David's figure.

However, they did not notice how David disappeared.

In just the blink of an eye, David had already crossed a distance of tens of kilometers and reached the Milky Way Battleship.

David landed a punch on the giant battleship.

Boom!

A deafening sound resounded throughout the void.

Even the powerhouses from Earth like Mason and the others heard a buzzing in their ears when they were two or three hundred kilometers away.

Everyone covered their ears with a distressed look on their faces.

David threw the Void Punch for the first time at the Tuffin family's Milky Way Battleship.

The Milky Way Battleship, which claimed to be able to withstand attacks from peak Stellar Ranks, was like paper as it crumpled under the blow.

It could not resist such a powerful attack.

First, David's combat power had reached peak Cosmos Rank, which was not comparable to peak Stellar Rank.

Second, David used a powerful combat skill: Void Punch.

Combat skills were very rare even throughout the entire Milky Way. Only some major forces possessed them, and the skills would be used as a symbolic strength of the force.

When the two were superimposed, David immediately punched a hole through the Milky Way Battleship, a strategic military weapon of the Milky Way Empire.

A large hole several hundred meters in diameter appeared on the ship

David could even see the void on the other side through the big hole.

‘What? What a powerful punch!

David looked at his right hand.

Even he was frightened by the power of this punch.

One must know that he just kicked the Milky Way Battleship dozens of kilometers away but did no substantial damage to the battleship itself.

Even so, this punch created a hole straight through the ship.

If he hit Earth with this power, he might punch straight through Earth as well.

‘It’s so strong.’

When David was still lamenting the power of his full–strength attack, his mind power suddenly detected that the energy inside the battleship was continuously expanding at a very fast speed.

‘Is it about to explode?’

He quickly teleported and returned to Mason and the others. The explosion of such a huge ship was no joke.

## **I’m A Quadrillionaire chapter 946**

### **I’m A Quadrillionaire chapter 946**

I’m A Quadrillionaire chapter 946

David could feel the terrifying energy inside it.

Even at a distance of two or three hundred kilometers away, the aftermath could easily kill Mason and others who had not even reached Satellite Rank.

It might even spread to Earth.

Thus, David had to stand in front of them to stop the explosion’s impact from spreading in that direction.

He had to keep Mason, the other elites, and Earth safe.

Inside the control room of the Milky Way Battleship, the alarm blared when David penetrated the ship.

“Warning! Warning! Warning! The battleship defenses and the internal programs have been completely destroyed. The battleship will explode in ten seconds.

“Ten, nine, eight...”

Upon hearing this mechanical sound, the entire control room of the Milky Way Battleship was in chaos.

The Milky Way Battleship was about to explode, so they would die if they continued staying here.

They wanted to open the emergency passage of the ship and escape, but the program had been completely destroyed.

Right now, it was impossible to operate the ship.

All the control systems also failed, so they could only wait for their deaths here.

Adan could not care so much at this time. He grabbed Nine and Lone beside him in each hand and exuded his power as a mid Cosmos Ranker.

He zoomed into the air, and his body smashed straight through the Milky Way Battleship to escape from the control room.

This chapter is provided by . Visit for daily update.

When the others saw an escape route, they immediately swarmed over to the exit.

However, they were not as fast as Adan.

Moreover, the exit was tiny, and there were too many of them.

Before they could escape to a safe place...

Boom!

The Milky Way Battleship exploded with a deafening sound.

The reverberation spread in all directions.

“Ah!”

Screams of agony could be heard.

The people of the Tuffin family who could not escape were all turned into ash by the extremely high heat of the ship's explosion aftermath before they could even let out a scream.

Adan watched this happen from afar, but he had no power to stop it. He was heartbroken, and his eyes turned red.

Anger filled his chest, and he almost had a heart attack.

The damage he suffered this time was too great.

Not only did he lose so many elites of his family, but his Milky Way Battleship was also destroyed.

As one of the eight prominent families in the Milky Way Empire, the Tuffin family only had three Milky Way Battleships.

The Tuffin family obtained the ships from the Milky Way Empire after years of accumulation.

Now that one of them had been destroyed, how was he going to go back and explain it to his family?

The Tuffin family had not suffered this kind of loss for many years.

Who would have thought there would be such a huge surprise awaiting them in this straightforward mission?

In the opinion of the Tuffin family, failure to land on an indigenous living planet on the edge of the Milky Way was not even being considered.

Not to mention, the Tuffin family sent Lord Adan, a mid-Cosmos Ranker, on this mission.

Failure was even more impossible.

Adan was an unbeatable giant in the center of the Milky Way.

However, everyone in the Tuffin family had their faces slapped by this.

This time, the Tuffin family's mission could be described as a complete wipe-out.

This was because they were facing the peak Cosmos Ranker, David, who also possessed three combat skills.

It was hard to say whether Adan, the mid-Cosmos Ranker, could escape.

As for Nine and Lone, they were already scared witless.

Watching the Milky Way Battleship explode in the distance, their minds went blank.

“Grandpa ... Grandpa!”

“L—Lord Adan!”

“W—What should we do?”

The two asked while stammering.

Adan did not answer them.

This was because he also had no idea what they should do next.

## **I'm A Quadrillionaire chapter 947**

### **I'm A Quadrillionaire chapter 947**

I'm A Quadrillionaire chapter 947

The shockwave of the explosion soon reached David.

Mason and the others became tense.

Even so far away, they could feel this explosion's terrifying power.

However, they had a little sense of security with David standing before them.

They knew they would be very safe as long as David was there.

David had slowly become the omnipotent god in these people's hearts.

Indeed, the shockwave of the Milky Way Battleship's explosion disappeared once it reached David.

It was as if a huge indestructible barrier was stopping the aftermath, completely blocking it off.

This resulted from David using his materialized mind power to block what was in front of him.

His mind power had broken through Cosmos Rank, so it would be easy for him to block the shockwave of these explosions.

Adan also spotted David standing in front of Earthlings, blocking the shockwave of the Milky Way Battleship's explosion.

'This aborigine's methods are so unpredictable.'

The Milky Way Battleship was an important military strategic weapon made by the Milky Way Empire.

Although it could only resist the attack of peak Stellar Ranker, even a Cosmos Ranker could not put a hole hundreds of meters in diameter in the ship with just a punch to completely destroy the Milky Way Battleship,

This chapter is provided by . Visit for daily update.

Adan himself could not do so.

Even his eldest brother, Orson, the head of the Tuffin family who was also a peak Cosmos Ranker, could not do so.

The intensity of this attack had gone beyond the scope of a Cosmos Ranker.

If he was right, this aborigine should have some top offensive combat skills and means to resist the explosion's shockwave.

The range of his defensive capabilities was so broad that he could even protect the Earth behind him.

The shockwave of the Milky Way Battleship's explosion could only pass through the void around Earth but had no way to affect the Earth at all.

This should be a top defensive combat skill.

'How terrifying!

'This aborigine is so scary.

'A peak Cosmos Ranker with two top combat skills, one attacking and one defensive, can skip realms and challenge a partial Celestial Ranker.'

Adan remembered David also had the money to buy Earth and turn it into a high-class citizen planet in the Milky Way Empire.

‘With his strong strength, two top combat skills, and enormous wealth, this aborigine from Earth definitely possesses the assets left by at least a Celestial Ranker or Infinity Ranker.

‘Now, everything makes sense.’

Adan wanted to take these two top combat skills and all the assets left by the powerhouse as his own.

Unfortunately, he did not have the power to do so.

While Adan was looking at David and internally forming his assumptions, David’s eyes were also fixed on him.

The two’s eyes met in the void.

“Earthling, I admit that I underestimated you. Pavan killed 100,000 people on Earth, so you killed him, and now you have also destroyed the Milky Way Battleship of the Tuffin family and all our elites, causing us to suffer huge losses. I think you can regard this as a suitable revenge. From now on, we’re even, and both sides will mind their business, deal?”

As Adan faced David, a peak Cosmos Ranker with two top combat skills, he knew he could not win even if he showed all his trump cards.

Therefore, Lord Adan of the Tuffin family, who used to run rampant in the Milky Way, had no choice but to submit.

## **I’m A Quadrillionaire chapter 948**

### **I’m A Quadrillionaire chapter 948**

I’m A Quadrillionaire chapter 948

“Do you think we’ll be even just because you say so? You know Pavan killed 100,000 people on Earth, but how many of your people did I kill? If we are considering giving an eye for an eye, your family will have to send more than 90,000 people for me to kill,” David said sarcastically.

“Don’t go too far. Do you know the value of the Milky Way Battleship? Even if the Tuffin family is one of the eight prominent families of the Milky Way Empire, we only obtained three ships after countless years of accumulation. You’ve already destroyed one, so what else do you want?”

“In your opinion, the Milky Way Battleship is very valuable, but in my opinion, it is just a lifeless object. How can it be compared with a human being with blood, flesh, mind, and

soul? Should the 100,000 human beings on Earth die in vain ? Besides, would you still tell me this nonsense if I were not stronger than you? You would have planted your slave mark on us long ago and turned all earthlings into your slaves, right? So, I disagree to us being even.”

“I admit that you are stronger than me now, but don’t forget, my family has had a strong foothold in the Milky Way Empire for countless years, and our strength is beyond your imagination. Even if you kill me today, you will not be able to escape. It will be detrimental for both of us if we are determined to fight to the death. The Tuffin family doesn’t want to make another strong enemy for no reason. Moreover, you are not alone. There are tens of billions of human beings on Earth who need your

protection. So, you have to think this through,” Adan advised.

He knew that he could only steer the conversation toward Earth if he wanted to survive today.

This aborigine obviously cared a lot about the Earth.

Therefore, this was Adan’s only chance.

Otherwise, he would really be killed here.

“Are you threatening me with Earth?”

David’s eyes narrowed, and the killing intent on his body instantly spread out, filling the entire void.

“It’s not a threat. It’s a matter of fact. I, Adan Tuffin , have been wandering about the Milky Way for hundreds of years and have experienced countless lives and deaths. It’s not that I’m afraid of death. I just don’t want both of us to lose out. Even if you kill me today and escape, what about the Earth behind you? What

about your relatives and friends? My family will definitely destroy them, and even if you come back to seek revenge on the Tuffin family in the future, regardless of whether it is successful or not, is this result what you want?”

David was at a loss for words.

The Earth was indeed his weakness, and Adan also pointed it out

This chapter is provided by . Visit for daily update.

If the Tuffin family really destroyed the Earth, so what if he killed the entire Tuffin family in the future?

If what Adan said was true, David would definitely agree without hesitation.

However, it was a pity that one should not believe Adan at all.

He understood whether it was the small circle on Earth or the large circle in the Milky Way, they were all driven by interests.

Therefore, he could trust no one.

If he let Adan go back, it was possible that in a few months, more powerful people from the Tuffin family would come again.

“Can you represent the entire Tuffin family?” David asked despite not trusting Adan.

“I am the second in command of the Tuffin family, that is, the younger brother of Orson, the head of the Tuffin family. My power is second only to the head of the family. Naturally, I can call the shots,” Adan replied.

At the same time, he breathed a sigh of relief.

Since the other party asked such a question, there was still room for negotiation.

If he still had a chance to get out of this mess, who would want to die?

Besides, the Milky Way Battleship was destroyed in one hit, and he did not have time to send a message back to the family.

If he died here, he did not know how long it would take for the family to find out.

If they took too long, it would be even worse if this aborigine upgraded to Celestial Rank in the time it took for them to arrive.

On the other hand, when it came to the decision on whether to

spare the Earth, there was no room for discussion.

The Tuffin family's position among the eight prominent families was already precarious.

If others learned that an indigenous living planet arbitrarily manipulated them, they would become the laughing stock of the entire galaxy

They still wanted to hold onto their position among the eight prominent families.

The Grandmaster might even come out and slap him to death.

However, Adan would ensure he was fully prepared the next time he returned to Earth.

He could not let this aborigine escape.

Otherwise, the Tuffin family would not have a day of peace dealing with a solitary and highly talented devil.
