

I'm A Quadrillionaire Chapter 951

Chapter 951

Chapter 951 Adan knew it was impossible for them to escape today.

If his opponent could become a strong peak Cosmos Rank at a young age, how would he be so easily fooled by Adan?

Now, Adan started feeling calm.

"Why do you have to force me?" Adan said with a sigh.

"It's not that I'm forcing you, you are the ones forcing us. We were just living our lives when Pavan came to Earth trying to enslave us. After I killed him, you came too. Then, when your family finds out something bad happens to you, they will probably send stronger people over. Say, who did we provoke to get this treatment?"

"You didn't provoke anyone. If you want to blame someone, you can only blame yourselves for still being an indigenous living planet when Pav discovered you."

"So we deserved to be enslaved just because of this?" David gradually increased the volume of his voice.

"You don't have to get so emotional. You would also do the same once you reach our level."

"Don't worry, I won't," David said seriously.

Adan laughed and did not answer.

Instead, he took out a vial filled with some sort of potion.

It looked similar to the genetic drug, but the liquid inside was crimson.

"Grandpa! Don't!" lone stopped when she saw Adan take out the crimson potion.

"Lord Adan, you..."

Nine also wanted to persuade him, but when he recalled the situation the three of them were in now, he swallowed his words.

Adan did not say anything more.

After taking out the crimson potion, he opened it and put it in his mouth before drinking it.

David watched it all from a distance.

He instinctively felt that the thing in Adan's hands was not simple.

Hence, he quickly acted.

He instantly crossed a distance of two to three hundred kilometers and appeared in front of Adan.

After that, he aimed his punch at the trio.

'Void Punch!

This was a punch that could easily penetrate the Milky Way Battleship.

However, Adan did not show any sign of panic as he faced the punch.

The energy emitting from his body kept intensifying. Then, he also punched at David.

Boom!

The two punches collided.

The intense aftermath created a storm in the void which radiated in all four directions.

David's eyes narrowed.

He could feel the strong energy from Adan's punch.

Then, his body was pushed dozens of kilometers away.

'H-How is this possible?'

David was very shocked inside.

He did not hold back at all when he threw the punch.

The Void Punch from a peak Cosmos Ranker could easily destroy the Milky Way Battleship.

Meanwhile, he could feel that Adan was just a mid-Cosmos Ranker. However, when he drank the crimson potion, his combat power skyrocketed suddenly.

It was just a hasty punch, but it was already on par with his.

Sure enough, the people of these big families were not simple, and they all had their own trump cards.

Adan was also blasted back dozens of kilometers by David's Void Punch.

Nine and Lone were behind him, but they were not affected by the battle between Adan and David.

Otherwise, the shockwave from the colliding punches just now could easily have shocked the two to death.

"You two stand back. If I win, immediately use the Earth's Internet to notify the family and tell Orson everything that happened here. Tell them to come over as quickly as possible. If I lose, then you don't have to do anything. If you can escape, escape. If you can't, I can't do anything about it either, do you understand?" Adan said through gritted teeth.

"Understood, Grandpa."

"Understood, Lord Adan."

Nine and Lone answered at the same time.

David was hundreds of kilometers away as he looked at Adan in the distance.

At this time, Adan was reacting after taking the crimson potion.

Not only did his skin turn crimson, but even his eyes, hair, and eyebrows had turned crimson.

In addition to that, his entire body was filled with violent energy.

Even though David was far away, he could clearly feel it.

Adan was taking Blood-Burning Potion, which was a hundred times more precious than the genetic drug.

It could instantly invade every cell in the body when the consumer took it.

It would then enhance cell vitality and strength. At the same time, it would significantly increase the consumer's combat

power for a short period.

However, Blood-Burning Potion was different from the genetic drug. The genetic drug had no side effects.

I'm A Quadrillionaire Chapter 952

Chapter 952

Chapter 952

It would only trigger a person's talent.

If the person was not gifted, taking a genetic drug would not do anything.

On the contrary, the side effect of the Blood-Burning Potion was huge.

It would directly stimulate every one of the consumer's cells.

No matter who took it, their combat power would increase for a short time.

Even if ordinary people took it, they would instantly become extremely powerful.

If the consumer did not take a cooperative drug to get rid of the effect midway through the cycle, the cells in their body would die after glowing and heating up.

After which, the user would die.

The sooner it was removed, the fewer side effects the consumer would experience.

However, this side effect was small, and it was not very relevant.

This was because even if the person drank the antidote the moment they took the Blood-Burning Potion, not only would this person's future be doomed, they would have no way of breaking through to the next realm anymore.

Their lifespan would also be greatly reduced.

Also, the cells in their body would fall into a semi-dormant state after being stimulated.

The consumer would experience a long period of weakness.

One could not say that the price of consuming it was not significant.

The Blood–Burning Potion would use the consumer’s lifespan to improve their strength and rescue them from their short–term crisis.

If they were not desperate, no one would take the Blood–Burning Potion.

Aside from being precious, it would even accelerate the death of the consumer and ruin the consumer’s future.

Adan also knew that he would die, so he took the Blood–Burning Potion to take a gamble.

If he won, he might still live.

If he lost, then there was nothing more to say.

“What did you just drink? Why did your combat power increase so much?” David could not stop himself from asking.

“Ah!” Adan let out a furious roar.

His body disappeared from its location, and he rushed toward David.

He did not have time to answer David’s question now.

Right now, for Adan, time was everything.

If he could relieve himself from the blood–burning stage one second earlier, it would also give him more time to live.

When David saw that the other party was not answering, he did not waste his breath.

He also charged at the frantic Adan.

David had never been afraid of a head–on collision with someone at the same level as him.

The system strengthened his body, but Adan was even less afraid.

The cells in his body had been stimulated to the extreme now, so he felt like he had infinite power.

Boom!

The two collided and recoiled in an instant.

Then, they continued to charge at each other again.

Boom boom boom boom boom!

Countless collisions resounded throughout the void.

Every sound was deafening.

The Earth's powerhouses and Nine in the distance had to cover their ears and continue to back away in pain.

As the spectators, they could not see David and Adan at all, and they could only hear loud collisions in the void.

Their punches were extremely hard when they landed on their opponent's body.

The more David fought, the more apprehensive he felt.

He was a peak Cosmos Ranker, and with the addition to his top combat skill Void Punch, his power had almost reached partial Celestial Rank.

Adan was only a mid-Cosmos Ranker, but after taking the crimson potion, he could fight David for so long without losing out.

Adan might even be slightly better than him.

This made it difficult for David to believe the power of this potion.

This was the technological gap between the two.

A level 3 civilization was so much more advanced than Earth's level 0.7 civilization.
