

## I'm A Quadrillionaire chapter 1297

### Chapter 1297

On the edge of the Milky Way, Earth.

Back when David just entered Eternal Realm.

“My name is David Lidell and I’ve achieved Eternal Realm. From now on, I am the Master of the Milky Way and I will protect everything within the Milky Way. I will not spare anyone who comes here uninvited and disrupts the law and order of the Milky Way.”

David’s voice crossed the vast distance and came into the ears of everyone on Earth, including Harlan and his people who just arrived on Earth.

“What? Someone entered Eternal Realm and became the Master of the Milky Way? How is that possible?” Floyd said in shock.

‘Who is David Lidell? Shouldn’t Emperor Nimbus be the first in the Milky Way to enter Eternal Realm? Where did David come from? Why did we have no idea about this? When did such a powerhouse show up in the Milky Way?’ On one side, Harlan was also in disbelief.

However, only a true Eternal Realm powerhouse could make his voice travel such a huge distance.

Emperor Nimbus could not even do this.

Eternal Realm was too powerful.

Harlan and his people spent three months in the black-horned ship before they arrived on Earth.

However, David’s voice could travel so far in an instant.

At this moment, aside from envy and longing, Harlan also felt a sense of urgency.

He had to plant his slave mark on Earth and absorb the earthling’s talent to become a powerhouse everyone looked up to.

His goal was not Celestial Rank or Infinity Rank.

He wanted to be at Eternal Realm like David.

His words would be able to travel through the entire Milky Way. One would lose themselves in the feeling of being on top of the Milky Way the most.

“Tell them to speed up. We have to get to Earth and plant the slave mark. Ignore everything else,” Harlan ordered loudly.

“Yes, Master!”

More than ten black-horned ships charged toward land at full speed.

The earthlings also heard what David said.

Even though David had left Earth for about a year, he left a pretty deep impression on everyone.

Furthermore, footage of him in battle was still circulating on the Internet.

“Did you hear that? It’s Mr. David’s voice! Did he become the Master of the Milky Way?”

“I did! I did! It’s Mr. David’s voice! He’s so amazing! He left for such a short time and he became the Master of the Milky Way!”

“Mr. David is my idol. He will always stay my idol. I must continue training hard so I can leave Earth in the future and go exploring in outer space. I want those aliens to see how strong earthlings are.” 2

“You? Even if you train your whole life, you won’t catch up to one day of Mr. David’s training.” “I didn’t say I wanted to catch up to him. Plus, Mr. David is my idol. I just want to follow his footsteps and leave Earth. It’s fine if I can just go out to make the earthlings proud.”

David’s voice seemed like an adrenaline boost for countless earthlings.

Even though they did not know what Eternal meant, the sound of Master of the Milky Way already sounded very powerful to them.

The entire Milky Way would look up to David as their master. How amazing!

A group of beautiful women gathered inside the courtyard David used to live in.

After Celia sent the message to David, everyone waited for David’s reply.

In the end, before David had time to reply after he saw the message, he failed to control himself and exploded with his Eternal Realm energy.

After that, he did not have time to reply anymore.

Celia and the rest did not get a reply but they heard an extremely imposing statement from David.

“Did you hear that? Or am I hearing things?” Celia asked as she looked at the others.

“Mumble mumble...”

Selena and the others nodded to confirm that they had heard it too.

“That sounds like David, right?”

“Mumble mumble...”

## I'm A Quadrillionaire chapter 1298

### Chapter 1298

“Selena, you are the strongest among us. What is Eternal Realm and the Master of the Milky Way?” Celia asked.

Pearl and the others looked at Selena.

“Even though I am very strong on Earth, I am nothing in outer space. Thus, I don't really know what Eternal Realm is. As for the Master of the Milky Way, you can take it literally. This should be the title belonging to the Milky Way's master,” Selena said, feeling unsure.

‘The Milky Way's master?’

Celia, Pearl, Sandy, Julia, and Amelia widened their eyes and looked at Selena in disbelief.

How big was the Milky Way?

To them, it was boundless.

‘How long has it been since David left Earth?’

And he's now the Master of the Milky Way?

‘How incredible!’

“Selena, are you telling the truth? Is Dave really the Milky Way’s master? It’s only been a while since he left Earth. Those aliens are so weak.”

“Um... I’m not sure either. However, from what David said, I think that should be it. Didn’t you hear him say he’d protect everything in the Milky Way from now on?”

The rest of them recalled what David said.

‘He did seem to say that.’

“Wow! Dave is so amazing! He’s the strongest on Earth and he became the strongest in the Milky Way less than a year after leaving Earth! I admire him so much,” Sandy jumped around happily while squealing.

The other women showed happy smiles on their faces as well.

Of course, they wanted David to be as strong as possible.

The stronger David was, the prouder they would feel following David.

At this moment, Selena’s heart was filled with questions.

She was also a participant in David’s last battle on Earth.

Back then, David was evenly matched against their opponents.

Even if he ended up winning, he still got hurt.

The Tuffin family where that guy was from was only one of the eight prominent families of the Milky Way, and it was the last one that was about to fall out of the list.

There were stronger forces than the Tuffin family.

David had only left Earth for less than a year, so how did he trample all the forces of the Milky Way to become the Master of the Milky Way?

She could only wait for David to come back to answer these questions.

Even though David connected the Internet on Earth to that of the Milky Way, in order to avoid earthlings knowing too much about the situation of the Milky Way and forming lofty ambitions, he decided to control the degree of access.

The earthlings could only obtain some surface information about the Milky Way through the Internet.

If not, earthlings would have understood one-third of the Milky Way's workings through the Internet.

Everyone would not doubt what David said.

Mason knew David, and he recognized David's voice.

Initially, he was a little worried. He was scared that the aliens would harm the Earth and they would not be able to hold on until David came back.

Now, judging from that kid's tone, he was protecting the entire Milky Way, so there should not be anyone who dared to touch his homeland.

Even though Mason did not know how David achieved this in such a short amount of time, he was content only knowing that David was strong.

It was because David was born on Earth and his friends and family were all here.

Plus, his girlfriend and the people who loved him were here.

As for the others, Mason did not have the right to interfere.

Everyone had their secrets.

## I'm A Quadrillionaire chapter 1299

### **Chapter 1299**

A mysterious enormous tortoise appeared in the Milky Way and was moving toward the heart of the Milky Way where Planet Royal was.

At this moment, inside the splendorous and majestic building on the tortoise's back, a man and a woman were having a match.

The man was about 27 or 28 years old. He looked very handsome. He was wearing white all over and had a folding fan in his hand. Anyone who saw him would not hesitate to compliment that he was a peerless man with an unmatched temperament.

He was the kid that would make women of all ages fall for him, and he could charm millions of women and young women.

The woman looked about ten years older than the man. She was wearing the outfit of a middle-aged woman.

Even though she was a beautiful middle-aged woman, her skin that was on display was even fairer, suppler, and pinkish than that of teenage girls.

She was also a beautiful woman who could charm men of all ages. Young men in their twenties and men in their forties or fifties would be head over heels whenever they laid eyes on her.

Even though the two were in a match, they were not playing chess. It was a 3D map of the universe.

The handsome man's name was Amadi Star while the beautiful woman's name was Celeste Red.

The two were the legendary Universe Enforcers who were secretive in both their movement's and identities.

In everyone's opinion, Universe Enforcers were righteous and unsmiling fiends.

Once someone broke the Universe Convention, the Universe Enforcers would not hesitate to punish them.

However, these two were not at all like what the public thought Universe Enforcers would be. These two seemed like they were traveling around the universe, not supervising it.

However, if anyone was fooled by the two's appearance, they would end up in a tragic state. Even their ride could break the void like an Eternal Realm and move into another space. Was this something a normal person could do?

"Ms. Celeste, are you sure it's here? This should be a low-civilization galaxy, right?" Amadi pointed at the small dot on the edge of the map and asked.

The place he pointed at was where the enormous tortoise under his feet was right now: the Milky Way.

The Milky Way was just an unremarkable tiny dot on the huge map.

Meanwhile, this huge map was just a small corner of the universe. At the same time, it was also within the Universe Enforcers Celeste and Amadi's patrol area.

"I am sure! According to the map of the universe, this place is called the Milky Way. Even if it's an unremarkable low-civilization galaxy, someone over here could enter Eternal Realm, so from now on, it will be a mid-civilization galaxy," Celeste answered.

Her voice was so charming that anyone who heard it would fall in love with it.

Amadi lifted his head to look at the beautiful woman in front of him.

Even he was attracted to Celeste's voice.

This was because of Celeste's physique.

Celeste was a woman born with a demonic charm. The aura emitted from her body would be fatally attractive to the men around her.

If it was a normal man, he would be attracted to her at first glance.

The ones with a strong will could barely restrain themselves and maintain their elegance, like Amadi.

On the other hand, the weaker ones would be so attracted to her that they could give up their souls.

Celeste was a magnificent woman who could make her enemies lose 80% of their combat power the moment she stood before them in battle.

However, the previous beautiful young woman was now a beautiful middle-aged woman. Still, no man could captivate Celeste's heart after thousands of years.

Countless geniuses and demons in the universe had fallen head over heels for her and had been deceived by her.

In the end, none of them would even bad-mouth her.

This was Celeste's special power.

"Ms. Celeste, even if someone in the Milky Way became Eternal, we don't need to come all the way here, right? It's just someone in Eternal Realm, what's so interesting about that?"

"Amadi, this is the first time you come out as a Universe Enforcer. Your mother and I are good friends, so since she entrusted you to me, I have the duty to bring you around the universe to see the powerhouses of all the galaxies."

"What's the point of that? How strong can these people from a mid-level civilizations be? I think it's better if you bring me to observe the wars between galaxies. Isn't that our job?" Amadi asked, feeling disapproving.

## I'm A Quadrillionaire chapter 1300

To Amadi, a mid-level civilization was not worth his attention.

Even if someone was at Eternal Realm, they would still be at Ruler Rank, which was the lowest rank in the realm. It was not even Immortal Rank, let alone Sovereign Rank, which was at the peak of Eternal Realm.

“Amadi, you can’t think that. Even if you enjoyed a very high starting point that most people can’t reach in their lifetimes, you can’t be full of yourself. We have to be humble so that we can go further.”

“Alright, Ms. Celeste. You’re the senior, so anything you say, goes,” Amadi said helplessly.

His mother asked him to listen to Celeste this time he was venturing out.

He could not be willful, and he could not make decisions on his own.

If not, he would not have the chance to come out in the future.

Therefore, Amadi could only listen to Celeste’s arrangement.

He would go anywhere Celeste wanted him to go.

“Oh, you!”

Celeste smiled and did not continue talking.

Of course, she would not waste time going to a mid-level civilization with an Eternal Realm, because it would not be worth it.

If mid-level civilization had a newly-emerged Eternal Realm, then this newbie might have gotten it from their master.

Even if these people were talented, they were not worth her time.

However, it was unknown when an Eternal Realm appeared in a low-level civilization.

If one appeared, it would be the first Eternal Realm in the entire civilization.

Someone who became an Eternal Realm without a master or other beings at Eternal Realm could only fumble to achieve this goal. Such a person was definitely blessed with exceptional talent.

Hence, they were worth Celeste’s time.

It was hard for something like this to happen within the patrol range of a Universe Enforcer. Once this happened, they would go and look as soon as possible. If they found someone with potential, they would get the one with the potential to join them.

Universe Enforcers did not come from just one force. Instead, they came from many major forces.

Furthermore, they would take turns going on duty. Every once in a while, there would be a new batch of them.

While they supervised the area they were charged with, they also needed to find someone that was blessed with an exceptional talent to join the force they were from.

This was considered one of the perks of the job.

However, they would not be interested in ordinary people.

“Ms. Celeste, I’ll get going now if there’s nothing else. Please call me when we arrive.”

Amadi was about to bid farewell.

As a normal man, he could not hold himself back after staying with Celeste for too long.

“Alright,” Celeste replied.

Amadi got up and left.

The building on the tortoise’s back was huge, and Amadi went back to where he stayed.

Immediately, four gorgeous maids approached him.

“Master, you’re back!”

“Master, are you tired? Let me massage your shoulders for you.”

Amadi sat on the soft chair and enjoyed the service from the four gorgeous maids.
