

I'm A Quadrillionaire chapter 1397

Chapter 1397

David and Amadi were gearing up and were ready to take action.

Lucius was frowning.

“Are you all really letting these people from the Milky Way do whatever they want in the Beast Galaxy?” Lucius asked loudly.

“Lucius, since David is here for you, you should just fight him. There are only two of them so they're not bullying you in terms of numbers. Besides, David just stepped into Eternal Realm, what do *you* want us to do? Are the Nine-Headed Serpent Clan so weak that you can't even take on this challenge?” A deep and resounding voice said.

Lucius shut up once he heard this voice.

Obviously, the identity of the other party terrified him.

At this time...

Boom! Boom!

Two loud bangs went off in succession.

David and Amadi activated their Eternal Golden Bodies.

Two huge golden figures stood in the void looking like giants standing upright.

If one looked carefully, one would notice that David's golden giant was smaller than Amadi's.

The size of the Eternal Golden Body varied. It would change with one's strength.

The stronger the person, the bigger the Eternal Golden Body.

If Celeste, an Eternal Realm Sovereign Ranker, activated hers, David's giant would only reach her knees.

Just like an adult next to a child a few years old.

“The Nine-Headed Serpent Clan has been wreaking havoc on the Milky Way for a long time, and even treats the humans in the Milky Way as food. Today, I, David Lidell, have come to collect interest as the Master of the Milky Way.”

The golden giant transformed by David spoke, and his thunderous sound resounded across the entire void.

After seeing that David had activated the Eternal Golden Body, Lucius and Serpentine would not show their weakness.

They could only fight back.

Then, the two activated their Eternal Golden Bodies at the same time.

Golden light shot up into the sky, instantly transforming into two huge monsters.

Both of these two monsters possessed nine terrifyingly huge heads, and every head was showing its terrifying tongue.

This was the true face of the Nine-Headed Serpent Clan.

Two humans and two beasts stood in the air.

“Ah!”

This scene made Celia and the others, who were watching in the building on the enormous tortoise, scream in fright.

Especially Celia, Pearl, and others.

They were weaker and had not experienced this.

At the same time, they were also worried about David’s safety.

Mia and Astrid had seen David use the Eternal Golden Body.

Therefore, they were not too shocked.

Even so, when they saw two huge Nine-Headed Serpents, they were still nervous for David.

This was the first time Lorraine saw this.

As she looked at the four giant towering shadows in the void, she did not have the slightest fear in her heart.

Instead, she felt excited and expectant.

One day, she would also reach this level.

Selena comforted Celia and the others on the sidelines.

“Selén, will David be okay?” Celia asked.

“Don’t worry! Since David is doing this, I’m sure he’ll be fine. It’s not like you don’t know him well. He won’t do things that he’s not confident in,” Selena comforted.

Despite this, there was a hint of worry in her eyes.

Everyone stared at the four huge figures in the distance.

“Haha! Amadi, I’m going first!” David said with a loud laugh.

After speaking, he urged the giant golden shadow to step forward and charge toward Serpentine.

“David! Last time *you* got lucky and hurt me when you ambushed me. This time, I want to show you that you can’t defeat a late Ruler Ranker!”

After finishing speaking, Serpentine also charged at David.

A man and a beast met in the middle.

David reached out and grabbed one of Serpentine’s heads, trying to tear it off.

However, before he had time to exert his strength, Serpentine’s other heads wrapped around David’s upper body, immobilizing him.

Then, Serpentine freed one of his heads and opened its mouth to face David. Afterward, its mouth began to gather power.

Soon, an energy ball was formed. It looked like it would hit David while he was immobilized.

I’m A Quadrillionaire chapter 1398

Chapter 1398

At this time, Amadi arrived and punched Serpentine on the head where the energy was gathering.

Boom!

The energy ball deviated from its original position and shot into the void.

Just as Amadi was about to help David out, Lucius also arrived.

Immediately, he engaged Amadi with

David struggled to break free from Serpentine's restraints.

In reality, even if Amadi did not come to help him just now, David still had a way to escape.

He had not used his mind power yet.

Four huge golden figures fought together in the void.

Everyone was using the most primitive method: close combat.

Serpentine and Lucius would immediately gather energy balls to attack David and Amadi whenever they

had the chance.

However, the energy balls never hit their targets.

It was naturally inefficient to use this kind of long-range attack in close combat.

However, one of the energy balls was fired toward the position of the enormous tortoise.

It horrified Selena and others who were nervously watching the battle.

They could only watch helplessly as a huge ball of light approached.

Just when they thought they were doomed, the energy ball disappeared without a trace when it approached the building as if it had never existed.

"What?"

This scene also puzzled many Eternals in the Beast Galaxy.

They were not surprised that the enormous tortoise could block the Nine-Headed Serpent Clan's energy

ball.

After all, the enormous tortoise was also an Eternal.

However, it was strange that it could make the energy ball disappear without a trace.

However, they did not question it too much.

After the energy ball disappeared, Celeste's voice sounded in the ears of Selena and the others.

"Just watch without worries. David just got into Eternal Realm, so he's gaining combat experience by fighting the other party. He won't be in danger."

"Thank you, Celeste!"

"Thank you, Master!"

The women thanked Celeste.

They went back to watching the battle in the distance without worries after hearing what Celeste said.

'As long as David's not in danger.'

Lucius and Amadi were evenly matched in their battle.

They did *not* use their full strength.

Amadi's goal was to prevent Lucius from joining the fight between David and Serpentine. If he could do so, his mission would be completed.

Now, he could tell David was using his opponent to gain experience.

Even if Serpentine had the upper hand and was suppressing David, he did not cause any substantial harm to David.

David could always dodge his attacks during the most critical moments.

This irritated Serpentine.

He was an Eternal Realm late Ruler Ranker, while David had just stepped *into* beginner Ruler Rank.

However, he still could not defeat David after so long.

There were so many powerhouses watching this battle.

How embarrassing would this be?

The last time out, he was beheaded by David in a surprise attack and had already embarrassed himself in the Beast Galaxy.

If he did not turn this around, how would he maintain his prestige?

Serpentine was anxious, and he was about to hit David with a huge strike.

He had to make David pay the price.

David was fighting Serpentine to gain combat experience with an Eternal.

When the critical moment came, he would use his mind power to avoid the opponent's attack.

Although his whole body was bruised, none of his vital parts were injured.
