

I'm A Quadrillionaire chapter 1399

Chapter 1399

Boom!

There was a loud sound.

The Void Punch cast by David hit Serpentine hard on the chest.

However, when Serpentine was hit, he also turned around and swung his tail toward David with all his strength.

Smack!

Both of them received their opponent's full blow and staggered backward.

The places they passed through were left in a spectacular mess, and the planets in the way were obliterated.

The Nine-Headed Serpent Clan was a race that was good at defense and had strong physiques. Meanwhile, David's body was also not inferior to theirs after being tempered by the system.

In terms of physical strength alone, the two could be regarded as evenly matched.

However, David was only a beginner Ruler Ranker, while Serpentine was a late Ruler Ranker, which was two small realms higher than David.

In addition, Serpentine had lived for nearly ten thousand years and had more combat experience compared to David.

Hence, Serpentine had the upper hand from the very beginning of this battle.

However, David's purpose now was to accumulate combat experience, so that he would react correctly when he encountered someone powerful in Star Kingdom in the future.

Therefore, he did not use any of his trump cards.

He only used a small part of his mind power to assist him, and he did not even use the Evil-Splitting Sword.

The two of them exchanged blows one after another and retreated occasionally.

Serpentine was in the process of retreating while nine of his serpent's heads gathered energy at the same time.

Soon, a huge ball of energy formed in front of him.

It was more than ten times larger than the energy ball he gathered with just one head earlier.

The power this ball contained was unmistakable.

If David were hit by this super energy ball, his Eternal Golden Body would be crushed.

Even if it would not directly kill David, it would severely injure him.

When David saw Serpentine gather energy, he knew that the other party was going to deal him a huge blow.

David waved his hand and a long red sword automatically flew out of the sheath on Mia's back.

The red light flashed and fell into David's hands.

While David was holding the Evil-Splitting Sword, a long red sword also suddenly appeared in the Eternal

Golden Body's hand.

With the Evil-Splitting Sword in hand, David's demeanor changed.

Sharp energy spread to the surroundings with him as the center.

Amadi saw this and his eyes narrowed.

'Isn't that a Soulbound Weapon?

'How is this possible?

'How could David have a Soulbound Weapon in his hand?'

One must know that this kind of Soulbound Weapon was rare even in Amadi's hometown.

Amadi also had two of them with him.

One of them was given to him by his father who was the head of the Star Mansion when he stepped into Eternal Realm.

The other was given to him by his mother.

His countless Eternal Realm siblings did not have many of these weapons, and most of them did not even have one.

This was even considering the fact that they were all direct descendants of Star Mansion.

They would only be bestowed one if they had made a significant contribution to Star Mansion.

Amadi got it by relying on his identity as the younger head of Star Mansion.

It would be extremely difficult to get a Soulbound Weapon by himself.

He might only find one if he was lucky and was willing to risk his life exploring all kinds of dangerous ruins.

Of course, there was a higher chance he would die in the process.

Every Soulbound Weapon was priceless.

Unexpectedly, David, who was born in a low-level civilization, had one.

This was so incredible.

Moreover, Amadi felt that the sword in David's hand should be top-notch even among Soulbound Weapons.

It was more advanced than the two pieces he had.

Chapter 1400

'David is so lucky.'

Even Amadi felt a little jealous at that moment.

He was initially worried that David would not be a match for Serpentine, a late Ruler Ranker.

Now, it seemed that he was overthinking.

With this weapon in hand, David had the chance of fighting someone of a higher rank than him.

‘No wonder he was so confident just now.

‘This kid is hiding so many secrets.

‘As expected of a man who is immune to the Star Observation Skill.

‘No matter what, I have to recruit David into Star Mansion.

‘Bringing such a lucky guy into Star Mansion can be regarded as a great contribution to Star Mansion.

‘When that happens, Father will definitely reward me again.’ 1

Amadi looked at David with a look of excitement.

Fortunately, David was busy dealing with Serpentine’s big move, otherwise, he would surely misunderstand the look in Amadi’s eyes.

Celeste was also watching the fight outside in a room covered in a sea of red inside the luxurious building on the back of the enormous tortoise.

She saw the long red sword in David’s hand being cast into the Eternal Golden Body’s hand.

“What?”

Celeste could not help but let out a small gasp.

It was clear that she was also very surprised at this time.

“Interesting! How Interesting! How very interesting! I didn’t expect that there would be a top-quality Soulbound Weapon in a low-level civilization. David, I’m very curious about how many secrets you are hiding. I’m looking forward to the day when all of them will be revealed, I hope you don’t disappoint me,” Celeste murmured. 1

The Soulbound Weapon was a rare treasure for Amadi.

However, for a powerhouse of Celeste’s level, it was not that precious. She had more than one of these

things.

What really surprised Celeste was that David, a kid from a low-level civilization, also had one.

Even in mid-level civilization, a Soulbound Weapon was hard to come by, let alone in a low-level civilization.

There would only be more of them in a high-level civilization.

However, they were all in the hands of major forces.

If two Eternals with similar strength were in battle, having a Soulbound Weapon and not having a Soulbound Weapon would lead to very different outcomes.

This was excellent for battles between different ranks,

Not only did Amadi and Celeste recognize the Evil-Splitting Sword in David's hand as a Soulbound Weapon, but the other powerhouses from the Beast Galaxy who were watching the battle in secret also recognized it.

This was a level 5 civilization, so they had seen more things than a level 3 civilization like the Milky Way. "Is that..."

"A Soulbound Weapon?"

"It is a legendary Soulbound Weapon!"

Shocked voices that were laced with surprise could be heard one after another.

The last time David used the Evil-Splitting Sword to cut off Serpentine's head, there was an infinite distance away, so nobody could clearly tell what technique David had used.

This time, they were all nearby, so they could see clearly.

Indeed, it was a legendary Soulbound Weapon.

'A Soulbound Weapon!'

Pairs of possessive eyes lit up in the void, staring at the Evil-Splitting Sword in David's hand.

They were just like old perverts who had been locked away for thousands of years and finally saw a gorgeous woman. They could not wait to pounce on her and dominate her.

There were only three Soulbound Weapons in the entire Beast Galaxy.

Two of them were in the hands of the first-ranked powerful race, and one was in the hands of the second-ranked race.

Everyone wanted to have this.

Among the top ten races in the Beast Galaxy, except for the two races with Soulbound Weapon, the strength of the other races was not very far apart.

If anyone could get a Soulbound Weapon, their ranking would immediately rise to third or even second. That was why everyone wore this look.

Even the two major races that already had Soulbound Weapons were no exception, as they also wanted it. Naturally, it would be better to have more of these powerful weapons.
