Novel Married at First Sight Chapter 1878 -It is said that the women in Annenburg always want to marry into Johnsons.

The women in Wiltspoon want to squeeze their heads into the Yorks and become young mistresses, not only for the Yorks' wealth and status, but also for the Yorks' men's special affection.

After walking around FC Manor for half a circle, the two older and younger wives both felt tired, so they walked back in a tacit understanding without going any further.

Sonny was still a kid, and he couldn't walk such a long distance. On the way back, he asked his aunt to carry him on the back.

Serenity, who was carrying Sonny on her back, said to Jane: "At this time, I miss Zachary very much. If he is here, I don't need to carry Sonny."

Jane laughed loudly.

"Young Master York should be sad when he hears this. He will definitely say that you only think of him because of someone else's man."

Serenity blushed slightly, and asked Jane: "You are also often complained by the young master Johnson. The tone of this sentence is very similar to that of my family."

Jane: "No, Ben frequently complains. He is envious, believes I am too good to my son, and predicts that my son will be someone else's man in the future."

Serenity: "There is a reason why the two of them can be friends, they are the same people."

"Would you like me to help you back for a while?" Jane gestured to ask. She hugged Sonny from Serenity's back.

Serenity quickly stopped her and said, "You can't be tired after giving birth to a baby, can you? Sonny is light enough for me to carry on my back."

Even when Sonny fell asleep, she was worried that the little guy would fall, so she had to bend forward to prevent the little guy from falling, and walking was a bit hard.

Serenity refused, but Jane didn't force it, but she made an internal call and asked a maid to arrange for someone to come by electric scooter.

Soon, a maid came over on an electric car.

“Young Mistress.” The maid stopped the car and called Jane respectfully.

Jane: “Give me the electric car key.”

The maid handed the car key to Jane. Jane rode the electric car and drove Serenity, and asked Serenity to hug the sleeping Sonny back to the main house.

Jane: “The villa is too big. Next time, let’s ride a bicycle and visit the whole villa at once.”

Serenity said, “When I went back to Wildridge Manor, I just rode a bicycle with Zachary to visit the Manor, and we could enjoy the beautiful scenery. It can also exercise. However, his bicycle riding skills are a bit poor. I sit behind the rear of his bicycle and always worry that the bicycle will overturn. Whenever the front of his bicycle shakes, I jump off the bicycle quickly.”

Jane imagined that scene.

Young master York might have ridden a bicycle when he was a child, and he was driven by luxury cars. If he hadn’t married a down-to-earth wife, he probably wouldn’t have touched a bicycle again. It’s normal for him to be poor at driving.

Returning to the main house of the center, Sonny who fell asleep stayed in the room , while Jane took Serenity to the hospital to visit Lilian.

It was not the first time for Serenity to see Dr. Carden, but she was always afraid of Dr. Carden, and she didn’t dare to get too close to her. She also felt that Dr. Carden was a bit serious.

Zachary said that Dr. Carden was the only outstanding student of the genius doctor, who was adopted by the genius doctor and raised as his daughter. Not only was he superb in medical skills, but he was also a master of poisoning. Compared with the old gentleman doctor, everyone dared not offend Dr. Carden.

If you are poisoned by her, she can help you detoxify, but the pain of being tortured by poison is enough to make your scalp numb and leave a lifelong shadow.

After Lilian gave birth, she could have been discharged from the hospital soon, but her man gently coaxed her to stay in the hospital for two more days. She couldn’t stand her man’s coaxing, so she agreed immediately.
