

As soon as the commander said this, the surrounding staff immediately became extremely horrified!

And Wu Shutong, who was eavesdropping outside the tent, was even more scared out of his wits! When he heard this, combined with all the things that happened before, he immediately guessed the general context of the whole thing.

Originally, they had long suspected that the Cyprus line had the possibility of leaking secrets. At first they thought that the enemy should be eyeing this place, or that the Jiedushi here was colluding with the enemy internally and externally.

But now he realized that this place has already been completely controlled by the enemy! If the enemy hadn't completely controlled this place, how could it be possible to quietly prepare such a big killer here as a close-in defense gun? !

The enemy even knew that Ober-Jun was coming, so they set up a death trap for him here in advance!

Combined with the two clues that Nakul Ou Bojun has disappeared and human DNA was found on the near-anti-aircraft shells at the scene, he also guessed in his heart that Ou Bojun may have been sieved by the near-anti-aircraft hidden here in advance by the enemy, even Beat to ashes!

You know, the Poqing Society has developed for so many years, and they have always been in the dark places of all enemies, and they have always been the ones who design ambushes, and they are the ones who plant their own eyeliner around the enemies. Never been infiltrated by the enemy. But this time, everything changed drastically.

The enemy has actually sneaked into the interior of the Poqinghui quietly, and even without the Poqinghui's knowledge, occupied the entire garrison of dead soldiers, and then killed an earl who had mastered the aura!

At this time, Wu Shutong was not the only one who was horrified.

The commander in the tent, as well as his subordinates, were also speechless by this discovery. Everyone was silent for a long time, and the commander's adjutant took the lead to break the silence, "Boss, this is just a copper mine, not a military base... If they are equipped with AK47, or even RG individual rocket launchers, I can accept and understand this. After all, copper mines also have their own security needs. It is not very strange to have some individual weapons and set up a security team..."

At this point, he couldn't help muttering, "But... it's just a copper mine, and it's just a copper mine. It's not a military base, why would they be equipped with such abnormal heavy weapons as close-in anti-aircraft guns... Isn't this incredible?!" "

Yeah..." the commander said with a sad face, "I completely miss the question you mentioned. It doesn't make sense..."

As he said that, his eyes suddenly lit up, and he said, "What did you say in the first sentence?"
