

Read Novel Married At First Sight Chapter 1999

Married at First Sight Chapter 1999-Kathryn heard Shiloh's shout, she stopped, turned her head to look at Shiloh, and then thought again. Thinking about it, she walked back and returned to Shiloh.

She leaned slightly, leaned close to Shiloh's ear, and said softly: "What's the use of them loving you? I will be the successor of the Matriarch in the future!"

When she became matriarch, the first thing she did was request that Shiloh change her surname. She wouldn't let Shiloh's surname be Farrell any longer, and she would gradually take back all the money Shiloh had gotten from Farrell's house before driving Shiloh out of Farrell's house.

Why could the person who harmed her still enjoy the glory and wealth in the Farrell family?

Parents and elder brother had been with this fake daughter for more than twenty years, and they had feelings. Kathryn and Shiloh had no feelings, and would not show mercy to Shiloh.

After graduating from university, Kathryn was able to set up her own company, and after struggling in the business world for many years, she was found by the Farrell family and recognized her ancestors.

She knew that being kind to the enemy was being cruel to herself.

Shiloh was her enemy, Shiloh was not reconciled, and wanted to compete with her for the position of matriarch, she knew it very well.

Her father, brother and sister-in-law also instigated Shiloh to fight with her, and they all stood on Shiloh's side. If Shiloh thought they were really helping her, it would be a big mistake. She and Shiloh killed each other, so that they could reap the benefits of fishing.

They just wanted to change the rule of the Farrell family that women were in charge of the house.

Kathryn didn't care at all that her father, brother and sister-in-law love Shiloh more.

It's not that she was ruthless, but that she could see reality clearly.

As long as the mother was firmly on her side and gave her the opportunity to get in touch with the family business.

In the Farrell family, all she needed was the approval of the head of the family.

On the surface, her biological mother treated her in a normal way, and she preferred Shiloh as outsiders see, but she had given her everything that should be given to her.

Nor was she prevented from contacting the power center of the Farrell family just because she looked weak and deceptive.

After all, they were the real mother and daughter.

Even if Shiloh grew up in Farrell's parents, even if she was trained by the matriarch since she was a child, so what?

As long as Shiloh was not the biological daughter of the Farrell family, it was absolutely impossible for her mother to give up the position of matriarch to Shiloh, an outsider.

Even if she was mud, her own mother would try her best to help her up the wall.

Shiloh couldn't even see clearly, so she had been trained for more than 20 years in vain.

"Kathryn, mom is fine now. It's still unknown who will be in charge. Do you think you, a country bumpkin who grew up in the countryside, can really control so many people? Who will convince you?" Shiloh sneered: "You think you can succeed the head of the family? You don't have that kind of ability, even you, mother's own daughter can't take over the Farrell family. Mom can choose one of the daughters in the family to take over as the head of the family. At that time, you are a joke, and it is still unknown whether you can survive."

If a woman is selected from the clan to succeed the matriarch, Kathryn, the daughter of the matriarch, will become a thorn in the side of the new matriarch, and she will definitely not let Kathryn live. Those who went down did not know how Kathryn died.

Ruthlessness flashed across Kathryn's eyes, but there was still a smile on her face, she said with a smile: "Then we will wait and see. You, you should find a way, how to climb into the bed of a wealthy family, as long as you marry into a wealthy family, Only you can keep your current life, otherwise, you can go back to the countryside and live with your biological mother."

The life she lived should also be tasted by Shiloh.

"It's just that, with your current status, which wealthy wife dares to let their son marry you? There is no benefit in marrying you. The marriage of a wealthy family is worthless. You think you can get in, but at most it's just someone else's plaything. "

"You!" Shiloh was half-dead from anger.
