

## Read Novel Married At First Sight Chapter 1936

**Married at First Sight Chapter 1936-Elisa: "Okay."**

Serenity took the initiative to end the call.

Sonny and Titus ran in from outside the house, one behind the other, obviously playing a game of chasing each other.

The two little guys were sweating from playing, and their little faces were also red.

It took two minutes for the two nannies who followed them to come in. They were out of breath, and they probably ran after the two little guys for a long time.

Seeing that Serenity and Jane were wiping the sweat of the two children, the two nannies laughed and said, "Eldest young mistress, the two little young masters are running too fast, neither of us can catch up with them."

Serenity responded to the nanny, "Both of them are practicing martial arts, and their foot strength is much better than that of children of the same age. I can hardly catch up with them."

Jane said: "I have long been unable to catch up with Titus. After Titus joined the old genius master, his movements became faster and faster."

It was right to promise Lilian to take Titus away.

The old genius doctors would not ignore Titus's education, and they could teach Titus how to learn martial arts, and they could protect themselves by strengthening their bodies.

After all, Titus was burdened with blood and blood. If he didn't learn some powerful martial arts, how would he protect himself and the people he would protect in the future.

In fact, Jane wanted Titus to grow up like an ordinary child and live an ordinary life, but after knowing Titus's background, she understood that it was impossible for Titus to live an ordinary life like an ordinary person.

Even if Titus didn't want to embark on the road of revenge, those who killed his family would not let him go. Those people were still looking around for Titus's whereabouts.

If Titus hadn't been lucky enough to meet Jane, be picked up by her, adopted as an adopted son, and have Lilian treat him differently, accept him as a disciple, and live with those legendary masters in the world, Titus would probably never grow up.

It was difficult for the Johnson family's power to protect Titus comprehensively.

It was preferable to train Titus to be a great person with both civil and military skills rather than to suffer future slaughter at the hands of others. At least he had the ability to protect himself.

It was better to rely on himself than others.

“How is Sonny learning martial arts?” Jane asked.

Knowing that Sonny was almost taken away, Serenity and her husband decided to let Sonny learn some martial arts.

“Sonny’s aptitude is so-so, he can only practice to strengthen his body. His teacher said that he is the best, but he can only deal with one or two ordinary child. If he really meets a real skilled child, he will not succeed. We don’t expect him to participate in martial arts competitions to win the championship, as long as he can fight better than ordinary child.”

“Auntie, I’m hungry.” Sonny rubbed his stomach, “Auntie, I want to eat some snacks.”

Titus also said Jane: “Mommy, I also want to eat snacks and drink milk.”

Jane: “You two, go and wash you hands and sat quietly for ten minutes before you can eat snacks and drink milk.”

Titus said oh.

He dragged Sonny to wash his hands, and Jane asked the nanny to follow her to prevent the two of them from washing their hands and their clothes.

“Wow...” Enzo cried.

Jane got up from her side and said, “Enzo must be hungry again. Every time he wakes up, he opens my mouth and cries, and when he’s full, he kicks the quilt.”

Serenity looked at Avah, who was hugged by Grandma May. She could hold a child in her arms for a whole day without letting go.

Because they were going back to Wiltspoon, Grandma May was reluctant to part with Avah, she didn’t even look at Sonny, she stared at Avah all day long, or hugged Avah.

Ben was afraid that Grandma May would take his precious daughter back to Wiltspoon while they were not paying attention.
