

## The Return of the God of War [The Protector] Chapter 4066 -

For two days in a row, ordinary divine weapons were refined, and the mountains of quasi-sacred bone-level heaven and earth treasures were almost exhausted.

Dozens of weapons that were slightly inferior to peerless divine weapons were refined, which made Murong Qingxue and the two stunned again.

In particular, Gongsun Yueying is well-informed, and there are also senior blacksmiths in the Sun Moon Divine Fire Hall, but compared with Levi Garrison, it is only the difference between cloud and mud.

“This blacksmithing technique is a top-notch existence even in Kunlun Ruins?”

Gongsun Yueying exclaimed again and again.

“Then it’s Hantan’s turn.”

Levi Garrison said with anticipation.

There are so many treasures of heaven and earth on the shore of Hantan, and it is conceivable to know how many superb talents are in Hantan.

“Come with me!”

Levi Garrison waved to the two women.

However, when Levi Garrison’s right foot touched the cold pool water, the feeling of being secretly peeped came again clearly.

“who?”

The solemn color in Levi Garrison’s eyes flashed, and he suddenly looked away, and the feeling of being peeped disappeared instantly.

As if it never existed.

Levi Garrison released energy to search, but there was no energy feedback after spreading for several miles.

“How strange!”

Levi Garrison didn't think this kind of snooping was an illusion, but since the other party refused to show up, he didn't need to take the initiative to provoke him.

Just being able to hide his perception in the previous situation is enough to show that this guy's cultivation realm is extremely strong.

At least in terms of concealment, it is definitely a transcendent existence, otherwise it will not be hidden freely.

Of course, Levi Garrison is more inclined to another guess, that the thing hidden in the dark may not be a person.

For example, spirit beasts have a unique way of hiding their breaths, and at the same time they have a spiritual sense comparable to that of humans, so it is not surprising to surveil secretly.

Gongsun Yueying and Murong Qingxue felt their scalps go numb for a while, and the sense of prying eyes just now put a lot of pressure on them.

"Who is it?"

"It's even a bit more terrifying than the pressure of Tianlei before."

The two women's faces were pale, and they had no doubt that as long as the other party wanted to do something, they had absolutely no room for resistance.

Levi Garrison scolded secretly: "Little thing, you'd better not make trouble for Lao Tzu, otherwise..."

"Don't worry about it, follow me into the cold pool!"

Before he finished speaking, Levi Garrison took the lead and jumped into the cold pool.

Pfft!

Levi Garrison had just entered the cold pool, and the biting chill struck instantly.

At the same time, the terrifying power of thunder and lightning struck, but for Levi Garrison, it did not cause any harm.

In order to relieve the pressure on Murong Qingxue and the others, Levi Garrison directly absorbed most of Hantan's lightning power.

Not only could the remaining lightning power not be fatal, but the two women also took this opportunity to temper their bodies, taking their cultivation to a higher level.

Of course, this was also deliberately done by Levi Garrison, as a benefit to these two followers.

“It seems that this is a gift from the master!”

“Well, as long as we keep a certain distance from the sect master, we can use the power of Tianlei carried by Hantan to improve.”

The two women transmitted each other’s voices and followed Levi Garrison closely to find the treasures of heaven and earth.

As the three gradually dived into the cold pool, Murong Qingxue and Gongsun Yueying realized that the divine bone they had seen above the water was just the tip of the iceberg.

Most of the body is hidden under the cold pool.

I saw that it was a behemoth about ten feet long, and the smallest bone had the thickness of an adult thigh.

“This should be Jiaolong, right?”

Murong Qingxue said with emotion.

The description of the Jiaolong also only exists in the ancient book records, and the shape is very similar to the ancient book drawings.

Such a huge skeleton is also partially damaged, some parts are directly missing, and some are in a state of charred black, which is obviously caused by the bombardment of the sky.

“This is the supreme divine bone transformed by the Jiaolong.”

Gongsun Yueying’s excited voice transmission was confirmed.

## **The Return of the God of War [The Protector] Chapter 4067 -**

Gongsun Yueying was fortunate enough to have seen a small piece of divine bone, the quality of which was completely incomparable to the skeleton of the Jiaolong before him.

It can even be described as the difference between clouds and mud.

Therefore, Gongsun Yueying was very sure that what was in front of him was the divine bone, and it was derived from the top-quality divine bone formed by Jiaolong crossing the sky and thunder tribulation.

It can be seen that the part of the divine light that has been completely preserved is sparkling and translucent, and even the finest diamonds are eclipsed by it.

Especially this god bone contains extremely strong terrifying energy.

It has the power of thunder and lightning, the power of earth veins, and the unique cold aura of Hantan.

In addition to this Flood Dragon Divine Bone, there are many scattered Divine Bone in other parts of Hantan, presumably because other Divine Beasts failed to cross the Thunder Tribulation.

All in all, the number of divine bones in the cold pool is unimaginable.

“With so many top-quality divine bones, how many peerless divine weapons can be forged?”

“It’s okay to use these divine bones to concoct pills! By then, there will be a lot of excellent pills coming out.”

The two women’s faces were full of excitement, and this trip to the Dragon Burial Valley was a huge profit.

“Sect Master, what are your plans?” Murong Qingxue asked tentatively through voice transmission.

Levi Garrison pondered for a moment and said, “Of course it’s the best use of everything, so many god bones can’t be wasted at all.”

This is indeed what Levi Garrison thinks in his heart, and he even intends to let many confidants have a peerless magic weapon.

However, based on the number of god bones found so far, the raw materials such as Tianxing iron on hand are a bit less.

“Fortunately, these are only auxiliary materials, and the most important part is still the divine bone.”

“At that time, Lao Tzu will be forging together with the power of the Earth Vein and the Sky Thunder. It doesn’t matter if the auxiliary materials are less, and the environment can be used to make up for it.”

Levi Garrison made up his mind secretly.

As for the two of them, Murong Qingxue gradually got used to the energy intensity of the water in the cold pool as they went deeper into the cold pool.

The two women took this opportunity to step up the exercise, and the cultivation realm came directly to a new level.

Especially as they went deeper into the cold lake, many more superb natural materials and treasures appeared.

“Is this Tianlei Xuan milk?”

“There’s still Mingshui?”

Gongsun Yueying’s eyes were full of surprise.

“Thunder cold grass, even such precious and rare medicinal herbs, this cold lake is simply a gathering place for treasures!”

Murong Qingxue was equally shocked.

Thunder Cold Grass has both extreme cold and thunder and lightning properties, even if it is placed in a large sect, it can definitely be regarded as a spiritual elixir.

Of course, there are the most treasures of these two attributes in the cold pool, mainly due to the continuous pouring of the power of the thunder into the cold pool.

This cold pool is not very deep, and it didn’t take long for the three of them to reach the bottom.

“The bottom of this cold pool is so weird, this trip to the Dragon Burial Valley is really eye-opening!”

Levi Garrison was very emotional.

Because he found that the bottom was a far cry from the waters above, where the water layer was not full of lightning.

The lower part is actually made of purple flames. The key is that these flames show a sense of sight of liquid.

And the tearing sensation of these purple flames is much stronger than the power of the upper layer of lightning, and it also has a chain-quenching effect on the body.

Naturally, this level of chain quenching did not work for Levi Garrison. He originally thought that Murong Qingxue and Gongsun Yueying could not withstand the terrifying purple flames.

However, the reality surprised Levi Garrison.

“The energy of these purple flames is almost the same as the energy of the lightning waters in the upper layers, and they can bear it completely.”

Levi Garrison quickly made a judgment.

In fact, this situation was far beyond the expectations of Murong Qingxue and the two of them. They thought they could not bear it, but they ended up unscathed.

Levi Garrison pondered for a moment and explained the sound transmission:  
“Presumably the bottom layer of this cold pool also conforms to the law of energy balance, but the visual effect presented is different.”

## **The Return of the God of War [The Protector] Chapter 4068 -**

When the sky thunder strikes the cold pool, it will naturally make the cold pool itself carry the power of the sky thunder.

However, the power of the ley lines is also very terrifying, and it also affects the water of the cold pool to a large extent.

In particular, Hantan itself has the characteristics of extreme cold, so under the influence of the sky thunder above and the earth veins at the same time, it has formed a clear effect.

The upper half of the cold pool has the effect of lightning, and the lower half is the effect of the ley lines.

In addition, Tianlei and Leylines have reached a certain energy balance after years of ‘hands-on’.

The two states that directly lead to the water of the cold pool do not affect each other and exist at the same time.

“Is this the Nether Flame recorded in the ancient books?”

Murong Qingxue swam to a group of blue and purple flames and asked through voice transmission.

Gongsun Yueying also came to the front, looked over and nodded affirmatively.

“This is a top-level Nether Flame. According to ancient books, there is a fire in the extremely cold realm. It is called Nether, and the flame is extremely cold. It can burn everything and is the first choice for refining.”

Gongsun Yueying’s voice transmission repeated the description of the Nether Flame in the ancient book, and Levi Garrison also became interested in an instant.

“So this thing is also very good for forging peerless weapons. Do you have utensils to collect it?”

Levi Garrison asked through voice transmission.

“Don’t worry, master, I’m ready.”

While speaking, Murong Qingxue took out what looked like a palm-sized jade bottle in her arms.

The bottle stopper is made of a special material, and the jade bottle is crystal clear.

Opening the cork, a biting chill emerges from the bottle, which is actually comparable to this cold pool water.

“This is a cold jade bottle, which is specially used to hold strange objects with powerful fire attributes.”

Murong Qingxue briefly explained.

When he learned that Levi Garrison was coming to Bury the Dragon Valley, Murong Qingxue exchanged the cold jade bottle at the Taiyi Chamber of Commerce, and planned to use it to deal with the Tianlei attack.

Because the cold jade bottle has a natural attraction to fire attribute items, it can be used as a ‘lightning rod’ to some extent.

However, now Levi Garrison has reached a new energy balance with the Buried Dragon Valley, coupled with the protection of the energy shield before.

This cold jade bottle has never had a chance to be taken out, but now it has come in handy.

Gongsun Yueying collected Nether Flame and directly handed the Cold Jade Bottle to Levi Garrison, and the three continued to search for other treasures in the depths of Hantan.

“Look over there!”

At this moment, Murong Qingxue suddenly transmitted a voice.

Levi Garrison and Gongsun Yueying looked in the direction of Murong Qingxue's fingers.

I saw a lotus flower in the depths of the cold pool not far away.

The whole body of these lotus flowers is glowing with red divine light, just like groups of flames jumping in the depths of the cold pool.

“Fire lotus?”

Gongsun Yueying's voice transmission was extremely excited.

“The fire lotus is even more precious than the Nether Flame. The fire lotus can not only be the raw material for refining, but also refining medicine.”

“And it is only possible to breed fire lotus in Netherworld Fire, which is more precious and rare than Netherworld Flame.”

“Even if this kind of thing is placed in the Taiyi Chamber of Commerce, or even the larger Zijin Chamber of Commerce, they will go crazy when they see it.”

Levi Garrison was also very happy, and immediately said, “What are you waiting for, pack up all these fire lotuses and take them away.”

The three of them are like a harvester of natural materials and earth treasures, scavenging all the top-quality natural materials and earth treasures they encounter.

Not long after, Gongsun Yueying discovered a large amount of flint again, which made Levi Garrison even happier.

After all, it was found that the number of flints exchanged at the Taiyi Chamber of Commerce was not enough, and now it can be said that all the auxiliary materials for refining the peerless magic weapon have been collected.

“This trip to the Buried Dragon Valley is really rewarding!”

Levi Garrison continued to lead the two women to dive towards the bottom of the cold pool. After a while, the three of them found that the surrounding water flow was significantly faster.

“There is an undercurrent at the bottom of this cold pool, which may connect to deeper places. Be careful.”

Levi Garrison's voice transmission reminded.

## The Return of the God of War [The Protector] Chapter 4069 -

Under normal circumstances, if it is a pool of stagnant water, there is a high probability that the water flow below will be very quiet.

If there is a connection to a wider space, or if there is some kind of crack in the bottom of the pool, then there will be undercurrents surging.

The two women instantly raised their vigilance, the three continued to dive, and after another half a stick of incense, the three finally came to beat the bottom of the pool.

Levi Garrison really found a long and narrow crack, and through the cold pool water, he found that there seemed to be flames beating under the crack.

The surrounding cold pool is obviously cold, but the cracks give people a scorching feeling.

"This should be connected to a leyline, and it seems that this leyline is a fire attribute."

"It's no wonder that it can attract the power of the thunder to gather the leylines."

Levi Garrison suddenly realized.

Through the understanding of Kunlun Ruins during this period, Levi Garrison also knew that many of the spiritual veins in this area have certain special attributes.

For example, the medicinal vein of Yan Zangsheng is naturally suitable for cultivating precious medicinal herbs for refining medicinal herbs, and the medicinal materials grown in the medicinal vein are more effective.

Of course, it can also be used for refining, but for a relatively mild spiritual meridian such as the medicine pulse, the refining is too overbearing after all.

On the other hand, the fire of the ley lines at the bottom of the cold pool belongs to the natural fire element attribute, and it is an excellent choice for forging magic weapons.

Especially in the final chain quenching stage of forging the magic weapon, the fire of the earth veins is simply an environment for building one body, and it has a bonus effect on the power of the magic weapon.

"Sect Master, what are you going to do next?"

Murong Qingxue asked through voice transmission.

Levi Garrison pondered for a moment and said, "First collect all the treasures in this cold lake."

Seeing that Levi Garrison was also planning to state the plan in detail, Murong Qingxue and the others did not dare to ask any further questions.

Directly following Levi Garrison's request, he began to search for all kinds of treasures in the cold lake.

The scope of Hantan is not small, but it did not take too long for Levi Garrison and the others.

Since these few people are used to seeing treasures of the rank of fire lotus, ordinary quasi-divine bones are somewhat disdainful.

In this way, Levi Garrison and the three spent two days and two nights to finally scavenge the divine bones and top-level treasures in the cold pool.

By the cold pool.

Levi Garrison watched the occasional scene of thunder strikes in the cold pool water, and the corners of his mouth rose slightly.

"It's time to drain this cold pool."

Levi Garrison said quietly.

Murong Qingxue and Gongsun Yueying were shocked, completely ignorant of what Levi Garrison meant.

The scope of the cold pool is not small, how easy is it to get rid of it in a short time?

"Master, is this trying to directly use the fire of the earth's veins and the power of the sky to forge a top-level divine weapon?"

Gongsun Yueying asked tentatively, and she was taken aback by her speculation.

After all, the magic weapon forged by these two forces is too terrifying, especially for the test of blacksmithing.

In other words, even if you have such an excellent environment for forging magic weapons, if your forging skills can't keep up, it is equivalent to ruining things.

It is even very likely that the prepared forging raw materials will be destroyed by forging, or the forged items will be defective.

“You’re still pretty smart!”

Levi Garrison said with a smile: “That’s right, that’s what I planned. Only weapons that are forged with this natural power are qualified to be called divine weapons.”

“Otherwise, other flames will be used instead, and artificial power will inevitably be mixed in the forging process, which will be inferior after all.”

The shock in the hearts of Murong Qingxue and the two girls couldn’t be further increased, Levi Garrison’s thoughts were so crazy every time.

For example, he used the power of thunder to quench his body before, and now he is about to forge the ultimate version of the peerless weapon.

Of course, it is precisely because of this that he is Levi Garrison, the man who is like a god.

“You sort these raw materials into categories, and I’m going to start extracting the water from the cold pool.”

Levi Garrison ordered.
