

The Return of the God of War [The Protector] Chapter 4070 -

The way to drain the cold pool water is that Levi Garrison uses it to quench his body.

Absorb all the lightning power, leyline power and unique extreme cold elements contained in the cold pool water.

The ordinary moisture in the cold pool was directly evaporated by the terrifying power that Levi Garrison's basic exercises came into being.

In the early days of Levi Garrison's body quenching with the water of Hantan, he was naturally attacked by Tianlei's "protest" force, and the thunderstorm poured down.

After all, what Levi Garrison did at the moment was breaking the new energy balance that was achieved not long ago.

However, in the face of Levi Garrison's terrifying strength, Tianlei's lethality was almost like scratching a tickling, and the protest was soon declared invalid.

After struggling for a while, Tianlei finally gave up, allowing the total amount of water in the cold pool to decrease rapidly.

Chi Chi Chi!

The power of thunder and lightning in the cold pool water kept jumping with electric flowers, and was quickly absorbed into Levi Garrison's body, washing the meridians and quenching.

Levi Garrison bombarded the quenched body with the power of thunder and lightning gathered in the Buried Dragon Valley, and the effect of the cold pool water quenching body was already minimal.

But it is still helpful for the consolidation of the new realm, and Levi Garrison doesn't want to waste the slightest.

Seeing the rapidly dropping water level in the cold pool, Murong Qingxue and Gongsun Yueying were dumbfounded.

They thought it would take a long time to drain the cold pool, but looking at this speed, I am afraid it will take less than three days to complete.

"Is this pile of heaven and earth treasures comparable to the comprehensive heritage of several large sects?"

Murong Qingxue said with emotion on her face.

Gongsun Yueying sneered: "You are overestimating the heritage of large sects."

As the only saint in the Sun Moon Divine Fire Hall, she can be considered to be well-informed, especially she has a deep understanding of the background of large-scale sects.

There are ten grades of heaven and earth treasures in the Kunlun Ruins, and most of the heaven and earth treasures stored by middle-level sects like the Xingyue Shenzong are grade one or two.

There are very few third-level natural treasures, and one or two fourth-level natural treasures is not bad.

The third-level heaven and earth treasures in the Sun Moon Divine Fire Hall's inventory are relatively common, the number of fourth-level treasures has dropped sharply, and there is only one fifth-level heaven and earth treasure.

Gongsun Yueying had seen Divine Bone by chance, but it was because a top powerhouse planned to exchange it with the Sun Moon Divine Fire Temple for the training method.

The deal caused a huge stir in the Sun Moon Divine Fire Palace, but the deal was rejected after high-level discussions.

It's not that the level of the god bone is not enough, but compared to the god bone, the teaching method is a necessity.

Once the Sun Moon Divine Fire Hall is leaked, it is very likely that the enemy sects will develop targeted exercises, and the entire sect will likely be destroyed by then.

Missing out on this divine bone deal also made the senior officials of the Sun Moon Divine Fire Hall feel very sorry. After all, that divine bone was a sixth-level treasure of heaven and earth.

However, the most common piles of heaven and earth treasures in front of them have reached the fifth level.

There are not a few treasures of heaven and earth at the sixth level and seventh level.

As for the eighth-level heaven and earth treasures, the number of god bones is also very considerable.

There are also several types of eighth-level heaven and earth treasures, such as Fire Lotus, Netherworld Bone Erosion Flower, Cold Crystal Cuiyushan, etc.

These things look at the entire Kunlun Ruins, even those hidden super families or super sects, the storage of top-level natural materials and earth treasures may not be so rich.

Once the message is spread, even the top executives of the Taiyi Chamber of Commerce's various branches will be completely sensational.

After all, the Taiyi Chamber of Commerce is all about trading all kinds of treasures, and the more top-level resources, the more popular they are.

"It turns out that the large-scale sects don't have so many treasures in their imagination!"

After hearing Gongsun Yueying's remarks, Murong Qingxue felt a little disappointed. She thought that the top-level cultivation resources of large sects would be very rich.

But it now appears that top-level natural treasures are very rare for a sect of any size.

The Return of the God of War [The Protector] Chapter 4071 -

"The owner has so many top-level materials, coupled with such a special forging environment."

"The forged magic weapon is probably the top existence in the entire Kunlun Ruins."

"I really look forward to the moment when the peerless magic weapon takes shape!"

Gongsun Yueying was filled with emotion and longing.

Following Levi Garrison is more terrifying than enjoying the resources as a saint in the Sun Moon Divine Fire Hall.

Even the Yuwei baptism of the power of the thunder before, and the quenching of the body when he went deep into the cold pool, have greatly increased Gongsun Yueying's cultivation realm.

If you stay in the Sun Moon Divine Fire Hall all the time, it will probably take a few years to reach the current state of cultivation.

Murong Qingxue also sighed: "Yes, the forging skills of the sect master are also at the peak, and I don't know what kind of terrifying level the forged magic weapon can reach?"

“According to the specifications of the previously forged magic weapon, it is used for top-level heaven and earth treasures, plus the natural power of thunder and sky and the flames of the earth veins.”

“I’m afraid that it can really forge a peerless magic weapon, even the hidden sects will be regarded as the level of the sacred magic weapon”

Gongsun Yueying speculated.

Levi Garrison’s shocking actions one after another, Gongsun Yueying almost felt commonplace.

If it was said before that Levi Garrison could forge a real peerless weapon, she would think it was a fantasy, but now there is an inexplicable trust.

It even feels that there is nothing in this world that Levi Garrison can’t do, and the top peerless magic weapon is naturally no problem.

Time passed quietly, and in a blink of an eye, two days later.

The cold pool has been completely quenched and drained by Levi Garrison, and the cracks at the bottom of the cold pool and the flames of the earth veins are also revealed.

Levi Garrison has settled down, and Hantan water quenching body really has no significant effect, but it still consolidates the realm he has risen to.

“Congratulations to the master for draining the cold pool.”

“Congratulations Sect Master.”

Gongsun Yueying and the two congratulated each other, and they couldn’t wait to watch Levi Garrison forge the peerless magic weapon.

Levi Garrison’s whole person was calm, and he said solemnly: “I will start forging magic weapons after a while, and you should be a little farther away.”

“There is no cold pool water to reconcile it. The power of the thunder and the flames of the earth veins here will be very manic, and if you are not careful, you will burn yourself.”

“As ordered!”

The two women responded quickly and respectfully.

In fact, they also felt the manic energy, as if a volcano that could erupt at any time was extremely dangerous.

Levi Garrison didn't say more, and directly transported the various materials needed to the surrounding of the leyline flames and began to forge the top magic weapon.

Crack!

The leyline flames rose up, scorching the surrounding area a little distorted, and even Levi Garrison felt a little dry at this temperature.

The most bizarre thing is that in this dryness, it still carries a biting chill.

The originally diametrically opposed temperature attributes were all concentrated in the earth vein flame.

This is of course the result of the special attributes of Hantan before.

"It's time to start!"

Levi Garrison threw the celestial iron and flint into the earth's core flame, and then released his power, forming a giant energy vortex centered on Levi Garrison's body.

"The power of Tianlei is for my use!"

With a low drink from Levi Garrison, the top of his head was suddenly covered with dark clouds, lightning and thunder continued.

Immediately afterwards, a three-colored sky thunder poured down, apparently attracted by the energy vortex created by Levi Garrison.

This thunderbolt landed in the terrestrial flames with incomparable precision.

The terrifying energy of the two attributes of cold and electricity collided in one place, and an incomparably terrifying energy coercion burst out in an instant.

The powerful energy coercion shook, but it was directly offset by the energy shield released by Levi Garrison in time.

This did not cause any harm to Murong Qingxue and the others.

Tianxing iron and flint melted instantly under the bombardment of two violent energies.

"Congeal!"

Levi Garrison hurriedly used the forging technique to cool and crystallize the liquid of the two materials that were about to be lost under the leyline flame.

The Return of the God of War [The Protector] Chapter 4072 -

With the deliberate guidance of the power released by Levi Garrison, the raw material slurry that was about to flow quickly condensed into crystals.

However, one could clearly see that the sparks of the earth vein flame and the power of the thunder were stalemated, and a cloud of white death mist bloomed on the surface of the crystal.

This mist also contains the material power of Tianxing iron and flint, but there are obviously many impurities in it.

If it is not controlled in time, these impurity forces will invade into the pure crystal fusion, and the purity of the magic weapon will be greatly reduced.

Once this kind of impurity mass energy mist invades too much, even the toughness of the divine weapon forged in the future will be greatly reduced.

But now it is not possible to rashly disperse the mist of impurity energy, because the energy of impurity gas will appear in the crystal body through continuous tempering.

If you do it before it is completely purified, it will also affect the quality of the magic weapon.

And how to accurately grasp the timing and strength of the shot is the key to whether the forging is superb or not.

The difference is a thousand miles away, and that's it.

"It's not the best time yet."

Levi Garrison thought to himself.

After a long time, I saw that the surrounding impurity mist was getting thicker and thicker, and there was a faint trend of infiltrating again.

Levi Garrison shot decisively, he waved his arm gently, and a ferocious energy swept out the mist of impurity energy.

Immediately, the crystal area of the top raw material forged became clear again.

And that crystal became crystal clear with the continuous quenching of Tianlei's power.

"After a while, it will be able to integrate into the divine bone. At that time, the energy of the fire of the earth must be instantly detonated, otherwise it will be difficult to melt the divine bone with the power of the thunder alone."

After making up his mind, Levi Garrison continued to quench and crystallize the crystal until the crystal reached a nearly transparent state, and quickly added a divine bone.

lol!

The sky thunder continued to bombard the divine bone, not only could it not cause any damage to it, but instead stimulated the power of the divine bone.

Almost knocked the crystal out.

"As expected of a top-level god bone, it has been tempered by Tianlei for many years, and it has almost become immune to this power."

Levi Garrison no longer hesitated at all, and raised his left hand directly. With the pulling of a force, the earth vein flame that was still in a suppressed state suddenly rose.

Whoohoo!

A dark blue flame appeared at once, and two forces, fiery and icy, burst out at the same time, and immediately attached to the surface of the god bone.

bang bang bang!

Divine Bone began to struggle violently, like a criminal who was severely tortured, and could hear the shrill screams faintly.

The divine bones already possessed a great aura, and such a scene could actually appear when they were scorched by the flames of the earth veins.

Buzz!

Divine Bone instantly released its power and made a violent tremor.

It seemed that he was desperately trying to escape the fate of destruction, but Levi Garrison hurriedly exerted his strength to suppress it, which made the gods disappear.

With the double bombardment of the power of the thunder and the flames of the earth veins, the god bones finally gradually melted, and they were finally quenched and chained into smaller crystals.

“Give it to Lao Tzu!”

Levi Garrison released the power guidance again, and the essence of the divine bone was quickly sneaked into the previously condensed crystal.

In this way, Levi Garrison put all the materials needed by the peerless magic weapon into the flames of the earth’s center one after another.

Melt, purify, fuse, quench chain.

The four steps go round and round, culminating in Levi Garrison trimming the mixed condensate into a long sword shape.

“The next step is the final tempering process.”

Levi Garrison’s eyes are serious, this will be the most critical step in the entire blacksmithing technique.

As the saying goes, a thousand trials and hardships can lead to magic weapons, and the focus is on training.

“Nine-colored Tianlei is the most charming, so choose you as the most important part of this process!”

Thinking of this, Levi Garrison directly triggered the power of Tianlei, and in an instant, the situation changed to lightning and thunder.
