

Read I Am A Quadrillionaire Chapter 2078

I am a quadrillionaire chapter 2078-He alone was enough to destroy a level 7 civilization, but this was under normal circumstances.

If dozens of Sacred Saints in this level 7 civilization gathered and acted together, it would also overwhelm a partial Pre-Deity.

After all, they were only in a transition period, and they had not yet reached the real Divine Realm.

Pre-Deities would not have this problem.

Even if there were a hundred Sacred Saints, to a Pre-Deity, it would just be like breaking into a nest of ants.

Their resistance would be a waste of effort. 1

The energy exuded by Azul was not too exaggerated huge.

However, the slight trace of Divine Power turned Sid's expression unpleasant.

He felt the Saint Power in his body turning sluggish and under the Divine Power.

Right now, the strength he could exert was greatly reduced.

It was already clear to him that the enemy in front of him was a partial Pre-Deity.

'What should I do?'

Sid's mind was spinning rapidly.

As he thought about it, unless he had a partial Pre-Deity on his side too, he would only be able to fight back after he gathered more than ten peak Sacred Saints or more than thirty Sacred Saints.

There were no partial Pre-Deities in Star Kingdom.

Star Kingdom also did not have more than ten peak Sacred Saints or more than thirty ordinary Sacred Saints.

In other words, there was no way out of this.

Not to mention Nova and others in the distance, who were trembling as they stood in place.

They were like lambs waiting to be slaughtered. They had no way of fighting back and the only thing they could do was wait for their death.

The only person on the scene who felt lucky was David.

After feeling Azul's energy rising to partial Pre-Deity Rank and then stopping, he was greatly relieved.

It would be fine as long as he was not a Deity.

David could still handle a partial Pre-Deity.

David's real strength was also at partial Pre-Deity Rank, but he had his clones!

With his three clones, four partial Pre-Deities could easily defeat one of Azul.

Plus, Azul felt weak to David.

At this moment, his opponent was no longer a threat.

Now that the enemy had shown his murderous intentions, David had no choice but to take action.

Although he was very unwilling, he had no other way.

He had given Azul a chance.

Yet, the other party did not intend to let him go at all.

At this time, several space cracks appeared in the sky and several figures walked out one after another.

First Zenon, then Vaughn, and others.

There were a total of five people, and they were all Sacred Saints.

So far, the six known Sacred Saints of Star Kingdom, plus David's master, had arrived. Now, all seven of them were here.

The moment they walked out of the space crack, all five of them were taken aback.

Immediately after, they were horrified.

'What kind of power is this?

'Why does my Saint Power feel so sluggish?

'Could it be... Divine Power?

'The Divine Power that only appears after igniting the Divine Fire?

'Have we met a partial Pre-Deity?'

The five of them cast their terrified gazes on Azul at the same time.

They could feel the Divine Power emanating from this young man.
