# The Almighty Dragon General

Chapter 813

Back then, Blake and the Elite Eight had infiltrated the research laboratory. While on a mission to steal the research data, they

stumbled upon the research project. It was then they knew there could be Undead Warriors who had been injected with a certain

virus in the laboratory. However, they had never actually seen one with their own eyes.

Upon seeing these humungous, hideous creatures, they immediately knew these were the research products.

Rumble!

About thirty Undead Warriors charged at them. The creatures possessed such tremendous strength that the earth trembled the

moment their feet came into contact with the ground.

"Open fire!" James yelled.

They immediately opened fire. Despite being hit in their vital points, it did not affect the Undead Warriors in the slightest bit.

Bullets were ineffective against them.

Upon seeing this, their faces paled, and James frowned with a grim expression.

He did not expect that the virus created using Gu venom would be this powerful.

"Retreat," James swiftly gave the order.

However, he had no plans to leave himself.

May pulled at him and said hurriedly, "We should leave, James. These are all Bionicles; they are Undead Warriors. They won't

die. We stand no chance against them."

James could not leave, because he still needed to save Tiara.

He turned to look at Blake and said, "Blake, take them out of here."

Looking at James, Blake frowned, "What about you?"

"I will go meet the Undead Warriors in battle."

After he said that, he charged toward the Bionicles at a great speed.

A Bionicle two meters in height clenched its fists and tried to flatten James. The force was so great that a gusting of the wind

could be heard.

James transferred all the power within his body into his fists and blocked the attack.

Their fists collided.

Whoosh!

James was pushed a few meters back, and his arms went numb.

Meanwhile, the Undead Warrior was relentless. It immediately readied itself and charged at James once more.

"How terrifying."

James took a deep breath.

After being poisoned by Gu venom, James had turned feeble and weak. However, after constant meditation and practicing the Internal Cultivation Method, he had successfully cultivated True Energy.

Although he could not remove the Gu venom from his body, it no longer had any effect on him.

However, his punch, which was all of his current strength, was completely ineffective toward the Undead Warrior.

"Retreat, James! Otherwise, it'd be too late!" May cried out.

However, James ran towards his enemies once more.

He was instantly surrounded by multiple Undead Warriors. Although their bodies had grown larger and more muscular, it did not have any effect on their speed at all. Once he was surrounded, James was attacked from multiple sides all at once. He was instantly bruised and bloodied all over.

Another punch came, but James blocked the attack.

However, the Undead Warrior's strength was too great. James was immediately crushed.

After James collapsed to the ground, another one raised its leg to stomp him. James immediately rolled and dodged the attack.

"Go!"

Seeing that James could now barely stand, Blake gave the order.

The Elite Eight immediately tossed their weapons aside and charged at the Bionicles bare- fisted.

They knew that weapons would not deal any damage to the Undead Warriors. Only by utilizing the explosive energy of their True

Energy did they stand a chance.

With the nine of them joining the fight, James managed to catch his breath.

However, the nine of them stood no chance against the Undead Warriors. Soon, they were being slowly pushed back.
