

Chapter 5199

Matthew did not expect that the young, smiling nightmare Stella would want to totally exterminate him!

However, in the next second, he figured out the reason for it.

The misappropriation of office funds has always been the most disgusting thing for the shareholders of large corporate groups.

Even if the shareholders hold a lot of shares,

But generally do not directly intervene in the operation of the enterprise,

The operation of the enterprise is generally also handed over to the founder of the shares who have a small percentage to bear.

In this world, many well-known large enterprises are basically the same.

Originally, if the company has a net profit of \$500 million,

Then after setting aside next year's budget, the rest of the money if they want to take out,

Is given to all shareholders in the form of a dividend, according to the proportional share of the holder.

But Matthew, as the founder of the company, said it was in a developing phase.

So without dividing any dividend, he continued to finance it from the profits.

In this way, he was able to take the company to a market value of ten billion dollars.

However, Matthew himself is only left with 10% of the shares,

If the 500 million dollars are used for dividends,

He can only get 50 million of them, and out of these 50 million, he will have to give them out to the IRS, nearly half of it.

It is precisely because of this, he has done the rat race,

Five hundred million dollars is not divided, directly to engage in investment,

In this said investment, in fact, is money laundering,

Five hundred million dollars thrown out, at least three hundred million dollars back into his own pocket,

Compared to honestly giving all shareholders dividends, this way to get more money and faster.

For a generally large listed group, every year there are a large number of acquisitions,

Mergers and acquisitions cases, and who can guarantee that every acquisition can make money?

Some projects are also likely to hit the water.

Matthew, based on this point, only single-handedly planned the acquisitions.

But he never expected that Emily, who usually obeys his words and even has some taste of slavery,

Had so much evidence of him and uttered that in front of Stella without any break.

In this way, if you take away the 500 million dollars,

You are directly taking away the money that should have been distributed to the Fei family,

How can Stella, who has reached the position of the Fei family head, spare him?

And, what's worse, Emily also exposed the nasty things between himself and his adopted daughter,

Once this matter is reported to the FBI, he will certainly have to sit through the bottom of the jail!

A thought to this, Matthew almost immediately made up his mind,

No matter what he has to reconcile with Stella.

So he looked at her and begged: "Miss Fei, as long as you are willing to let me go,"

"I am willing to transfer all my shares to the Fei family at a 50% discount on the market price,"

"Which will not only allow the Fei family to profit hundreds of millions of dollars,"

"But also help the Fei family to strengthen their control over the entire company,"

"Which is already far beyond the damage I have done to the Fei family earnings,"

"This is an absolutely very sincere effort from my side....."

Stella smiled faintly: "Do you think your hundreds of millions of dollars have any value in my eyes?"

"To the Fei family, money is far less important than reputation,"

"If the Fei family harbors a beast of clothing like you for a few hundred million dollars,"

"Then would Randal Fei have died in vain?"
