

I'm A Quadrillionaire chapter 1573

Chapter 1573

After Marlee left David's room, she gathered all the Universe Realm powerhouses on the merchant ship and prepared to fight to the death.

There were more than twenty people in total.

The strongest was naturally Marlee, a peak Infinity Ranker.

Then there was Fraser, the senior butler of the Jung family, whose strength had reached late Infinity Rank

There were also two mid-Infinity Rankers and three beginner Infinity Rankers.

The rest of the dozen were Celestial Rankers and Cosmos Rankers.

If this power was compared with those space pirates outside the merchant ship, the difference in strength was not that big, and the two sides could still fight each other.

Although there were many space pirates, with Marlee the peak Infinity Ranker, it was not certain who would win.

However, the core members of the space pirates had not gotten off the black battleship yet.

If the opponent were to suddenly send over a peak Infinity Ranker, the Jung family would have no hope of

winning

Additionally, the peak Infinity Ranker was not even the strongest combat power of this group of space

pirates.

No matter how one looked at it, the Jung family was at a disadvantage.

"Miss, the merchant ship's defense will be breached. There's only one percent left," someone shouted.

Marlee and the powerhouses behind her tensed up

Once the defense was broken, they would immediately attack and fight to the death with the opponent.

No one thought about running away.

They could only concentrate their strength and fight to the death after encountering the cruelest space

pirates.

Running away would only result in them dying faster

Marlee quickly tried to think up a way to create an opening for David.

Time passed slowly.

A few seconds. Ten seconds. Half a minute... One minute. Three minutes...

Three full minutes passed, but the last one percent of the merchant ship's defense was not breached.

"Oh? What's going on?"

Everyone on the merchant ship sensed that something was wrong.

"How could it be possible that the one percent defense was not breached after three minutes?"

'Did the opponent stop?

However, they could see from the merchant ship control room that the space pirates outside were still attacking with all their might.

Despite this, the defense of the merchant ship stopped at one percent and did not decrease further.

Such a strange phenomenon aroused great curiosity in everyone's heart.

Not only did Marlee and others notice that something was wrong, but the space pirates outside also sensed it

When they were attacking just now, they could feel the defense of the merchant ship weakening.

However, as of three minutes ago, nothing more changed no matter how they attacked.

The remaining thin layer of defense was impenetrable.

This was somewhat beyond their understanding.

If a partial Eternal or an Eternal suddenly emerged from the merchant ship, they would all be wiped out. Everyone understood that.

However, it was hard for the space pirates to understand why they were stopped when their success was just around the corner.

What was more important was that they had never heard of this

This, coupled with their attacks not working, made the space pirates gradually start to feel like retreating.

Their attacks also began to grow weaker.

The unknown was always the scariest.

Even if a partial Eternal appeared on the merchant ship, they would not feel as uneasy as they did now.

The change in the situation naturally could not escape the eyes of the core members of the space pirates in the distance.

I'm A Quadrillionaire chapter 1574

Chapter 1574

They had been paying attention inside the battleship.

"Boss, it's weird. According to the damage we caused to the merchant ship with the first blow, it's impossible that we still haven't breached it after such a long time," one of the core space pirates said.

"It seems that this merchant ship is not as simple as imagined," Boss stared at the merchant ship not far away and said meaningfully.

"Then what shall we do?"

"Let's wait! If it still doesn't work after five minutes, then you peak Infinity Rankers should go and see what's wrong."

"Yes, Boss!"

Several of the space pirates' cores at peak Infinity Rank replied at the same time.

The black battleship did not move, and the space pirates continued to attack

After five minutes, the merchant ship was still in the same state as it was five minutes ago.

Nothing had changed

Marlee and the others did not know what to say anymore.

This was also their first time encountering such a weird situation.

They obviously had only 1% of the defense power left, but it was not showing any signs of weakening

after dozens of Universe Realm powerhouses attacked them for a full eight minutes.

In other words, this group of space pirates weakened nearly 40% of the merchant ship's defense in about 20 minutes.

However, they could not do anything to the last remaining 1% after 8 minutes.

'I don't understand.

'Could it be that the family quietly remodeled this merchant ship and greatly strengthened its defense?

"This is the only possibility!

"We have no other explanation.

'But does the family have such means?"

Even Marlee, the top three core seniors of the Jung family, did not even know about it.

'It seems that the family was still not ready for me to integrate into the family and was always guarding against me!

Marlee thought to herself.

In any case, the fact that the merchant ship had not been breached was great news for the people on the merchant ship.

It did not matter whether it was the Jung family members or someone whom Marlee hired with a lot of money, none of them would want to risk their lives if they could avoid facing the space pirates.

"Miss Jung, w-what's going on?" Someone expressed the doubt he had in his heart.

He was not the only one who had such questions, everyone was wondering the same.

“You don’t have to be in awe, everyone. This is one of the backup methods arranged by the Jung family. This shipment carries all of the Jung family’s hope. Naturally, we have taken into account various situations and made preparations,” Marlee replied calmly.

She did not really know the source of the protection.

However, as the person in charge of this merchant ship, Marlee could not show ignorance like everyone else.

Her words reassured everyone present.

“I see! Why didn’t you say it sooner, Miss Jung? We were worried for so long and we thought we would have to fight to the death with these space pirates!”

“Yeah, Miss Jung, you were so unreasonable. We all thought we were going to die today.”

The two who spoke were the mid-Infinity Rankers hired by the Jung family at a huge price.

“Since this is a backup plan, I definitely couldn’t use it until the last moment. You have collected so much money, so you should have considered all kinds of accidents.”
Marlee replied calmly.

“Of course, we know that. We were ready to fight just now, but Miss Jung, How long can the last one percent of defense power last? And what level of attack can it block? The core figures of the space pirates have not yet come out, and according to the current situation, they will definitely not be able to sit still

“Sorry, this is one of the Jung family’s secrets, so I can’t tell you. You just have to wait patiently. If they can’t break it, everything will be fine for us. If they break it, we can only fight to the death.”

“Miss Jung, you should at least let us be mentally prepared. If you are so secretive, how can we work together to fight those space pirates, am I right?”

“That’s right! Miss Jung, this matter concerns our life, so please tell us the truth...”

Everyone who was hired to be here started to make noise.

Although the Jung family members did not speak, they also wanted to know.
