

I'm A Quadrillionaire Chapter 1579

Chapter 1579

"Of course, we also don't want everyone here to lose out. Since that's the case, let's join hands to take down this merchant ship first, and then we will split it 50-50," the boorish man said.

"Impossible! We are stronger than you and have more people than you. How can we split it 50-50? At most, we can do 80-20. 80 for us and 20 for you," the effeminate man directly rejected the other party's suggestion.

"You are powerful, but don't forget, we discovered this merchant ship first, and we are about to take them down. You are just here to steal our bounty."

"That won't work either! 50-50 is too much."

"Then 60-40. No less!"

The effeminate man quietly communicated with the few people next to him.

Then he said, "70-30 at most. 70 for us and 30 for you. Take it or leave it. There are so many of us, and it'll be hard for us to explain ourselves to everyone if we get so little

The boorish man thought about it and figured 70-30 was still acceptable

The key was that they were on the weak side and did not want to fight to the death with the other party. Thus, the boorish man agreed, "Okay! 70-30 it is! But I want the woman who heads the merchant ship." "Okay! It's just a woman! You can take all of them if you want."

After a brief discussion, they reached a compromise.

The two sides were almost equal in strength, so they would not fight.

To put it bluntly, everyone was doing this for profit and resources.

If they were stronger, they would get more.

Fighting would do them no good.

The space pirates also understood what was a win-win situation.

The two groups of space pirates reached an agreement, which worried Marlee and others on the merchant ship again.

They thought things had turned around.

Unexpectedly, they fell into an even more dangerous situation.

The enemy had increased from three partial Eternals to eight partial Eternals.

Marlee and the others were unable to speak of their bitter suffering.

They were so weak they could only be distributed as prey by others.

“Deal! Then let’s join forces and take them down first.”

“Say, are you regressing as a partial Eternal? It’s just a stupid merchant ship, do you still need to join forces? if word gets out, you’ll become a laughing stock,” the effeminate man said with some disdain.

“Really? Then you go first! I want to see how you break through the opponent’s last defense.”

“You two, go and break the merchant ship for me,” the effeminate man said.

Immediately behind him, two peak Infinity Rankers stood forward and rushed directly to the merchant ship.

They did not see the four space pirates at Infinity Rank getting injured by the merchant ship’s shock.

Otherwise, they would definitely not have attempted this.

The two space pirates quickly approached the outside of the merchant ship and attacked it with full strength.

One could imagine the result.

The merchant ship was not damaged at all, while the two space pirates vomited blood and flew backward.

“Huh? What’s going on? This merchant ship can not only withstand the full blows of two peak Infinity Rankers but also cause them damage? How is that possible?” The effeminate man asked with a frown.

Apparently, he had been doing this for years and he had also robbed a lot of merchant ships, but he had never seen such a situation.

Even when a low-level merchant ship like this had its defense at full power, a peak Infinity Ranker could break through it with a few hits.

It was incomprehensible how it only had its last bit of defense left, and yet it could still block the attacks of the two peak Infinity Rankers and send them flying backwards.

“Two won’t do. The four peak Infinity Rankers I sent out just now all flew back because of the shock, otherwise, why would we have come out to do it ourselves?” The boorish man added.

“I see! It seems that this ship is a little weird, so how about we break it open together?”

“You read my mind.”

The eight partial Eternals from both sides were ready to fight.

They were prepared to attack at the same time, break through the last defense of the merchant ship in one fell swoop, and capture the people inside.

This scene made Marlee and others’ worried hearts leap to their throats.

What followed could be said to be the most critical moment in their lives.

As long as the ship could withstand this, everyone would be safe

They could ignore the attacks of these people and drive the merchant ship forward.

They could not break through the defense anyway.

Once the merchant ship was destroyed, no one in the entire ship would be able to escape, and they would all be doomed.

I’m A Quadrillionaire Chapter 1580

Chapter 1580

Marlee originally wanted to use her own life in exchange for a way out for David and Peggy, but after another group of space pirates came, this plan was foiled.

The new space pirates obviously did not have much interest in women.

What they wanted more were benefits.

The scene fell into silence.

Marlee on the merchant ship, and the two groups of space pirates outside, all set their sights on the eight partial Eternals.

They would witness how powerful the eight partial Eternals were at the same time.

This was also something they would brag to others in the future about.

The space pirates around the merchant ship were rapidly retreating.

If the eight partial Eternals joined forces to attack, they would not dare to stay near the merchant ship any longer

The shockwave could kill them.

When everyone had evacuated and the eight were about to attack, a suffocating energy suddenly emanated from the merchant ship, making their scalps tingle.

“Um...”

The eight partial Eternals did not even think about it. They did not even have time to communicate with each other before they turned around and ran away as fast as they could.

As a partial Eternal, how would they not know what kind of energy was that?

It was an Eternal!

Only Eternals could have such a terrifying energy that would make them feel powerless to resist.

Even if eighty of them went against an Eternal, they could only escape for their lives, let alone the eight partial Eternals

The gap between partial Eternal to Eternal could not be made up with quantity.

Eternals were strong because they had the hack in the form of the Eternal Golden Body.

Once this was used, only another Eternal Golden Body of the same level could resist it

No matter how many people there were, they were all just ants and could be killed with one casual slap.

If one were to face the Eternal Golden Body, they would surely die if they did not escape.

The eight people desperately wanted to escape, but how could David give them a chance?

Now that he was exposed, he should expose himself more clearly!

Boom!

A huge golden figure slowly appeared above the merchant ship.

It was a man who exuded golden light all over his body.

His handsome face looked even more attractive under the golden light, and he was definitely someone

who would be attractive to people of all ages.

The sudden appearance of the golden giant stunned the hundreds of space pirates around.

Only Marlee and others on the merchant ship had not reacted yet.

After all, they were at the feet of David's Eternal Golden Body.

Meanwhile, Marlee and the others did not feel David's energy

At this time, they were still wondering why did the people who were already preparing to unanimously attack choose to run away.

While they were escaping, the eight partial Eternals quietly turned their heads and looked behind them.

After they took a look, the scene behind them scared them so much that their hair stood up. They were drenched in cold sweat and their souls almost left their bodies from the fright.

'Gosh! Run away! They have already cast the Eternal Golden Body and our lives are in danger!'

I'm A Quadrillionaire Chapter 1581

Chapter 1581

When the eight leading space pirates turned their heads and saw the golden giant, they knew today was the day they would meet their demise.

How was it possible for a partial Eternal to escape from the hands of an Eternal who had cast the Eternal Golden Body?

Despite this, they still clung onto a glimmer of hope and were desperately fleeing

The eight people exhausted all means and disappeared in the blink of an eye.

If a partial Eternal had reached their maximum speed, they could be said to reach the maximum speed possible in three-dimensional space.

If one wanted to go faster than this, one could only tear apart the three-dimensional space and enter four-dimensional space.

However, only real Eternals could do this.

Now that he had cast the Eternal Golden Body, David naturally had no reason to let these guys escape.

He reached out his giant hands at the same time and directly tore open the three-dimensional space to enter four-dimensional space.

Then, he stepped out of the space in front of the two gangs of fleeing leading space pirates.

The eight leading space pirates who were fleeing then saw a giant golden hand suddenly protruding from the space in front of them.

Before they could react, they were captured by the golden hand and could not move.

David was holding five people in his left hand and three people in his right hand.

The eight leading space pirates at partial Eternal Realm all fell into David's hands in an instant.

The whole process happened quite fast.

Before the rest of the crowd could react, the eight leading space pirates had already been captured by David's Eternal Golden Body

There was silence and no one dared to make any noise.

Everyone stared blankly at the golden giant in front of them.

Marlee and others on the merchant ship also noticed something wrong

They were all in the control room of the merchant ship under David's feet, so they could not see the

golden giant.

However, they could see that outside, all the space pirates raised their heads and were staring blankly at the top of the merchant ship.

There was fear in his eyes.

In addition, the eight leading space pirates at partial Eternal Realm suddenly disappeared.

Marlee realized that things might be turning around, and the turning point was due to something happening at the top of the merchant ship.

“Come, let’s go up and have a look!”

After Marlee finished speaking, she left the control room first and went to the top of the spaceship.

The others hurriedly followed behind her

As they came to the top of the merchant ship, they looked up and saw a golden giant figure.

The golden giant still held the eight leading space pirates who had escaped just now.

Marlee and the others were all dumbfounded.

They could no longer describe the feeling in their hearts with words.

“What kind of person can hold eight partial Eternals in his hands like ants?”

As a peak Infinity Ranker, Marlee naturally knew what that was.

The Eternal Golden Body!

Only real Eternals had this exclusive ability

They could cast a giant golden shadow with the power to destroy worlds with their every move.

Marlee stared carefully at the golden giant’s face.

This face looked a little familiar.

‘Is that..

Suddenly Marlee’s heart skipped a beat again.

The pupils of her eyes kept dilating

‘David’

The face of this golden giant is exactly the same as David's!

It is said that the appearance of the Eternal Golden Body mimics the person who cast it.

"In other words, is David an Eternal?"

At this moment, Marlee had a bitter grin on her face.

There was an Eternal beside her, and yet she did not realize it at all.

On second thought, it was normal for her to not notice an Eternal if they wanted to hide themselves.

It was just that Marlee never expected a young man like David to be a real Eternal.

Marlee had many guesses about David's identity

I'm A Quadrillionaire Chapter 1582

Chapter 1582

She knew that David's identity might not be simple.

He might be a direct descendant of a big family in Star Kingdom, or even an heir

He might also be the core of a sect or a personal discipline.

However, she never thought that David was an Eternal.

At first, she wanted to use the power behind David to scare off these space pirates, but she never expected that David could easily take care of all the space pirates by himself.

Eternal Realm!

The realm that many people dreamed of

Countless people were stuck outside the door of this realm, unable to peek at the scenery inside.

However, David was so young, and he had already pushed open the door to this realm and entered it.

At this point, even if David said he was a member of a certain super giant force in Star Kingdom, no one would doubt him.

Keeping David around was definitely the best decision Marlee made in her life.

With David, an Eternal, here, the time of crisis had passed.

Marlee also figured that the merchant ship had been able to defend against the attack of the peak Infinity Rankers also because of David.

Otherwise, she could not think of anyone else with such ability.

The Jung family?

'Forget it!

If the Jung family had such ability, how would we be reduced to this state today?

"They even needed a woman like me to deliver the goods in order to ensure the continuation of the family.

Fraser also recognized David.

Fraser was one of the few people who had seen David on board.

The expression on his face also changed from horror to surprise in an instant

Who would have thought that this young lad was someone whose strength reached Eternal Realm?

What a surprise!

The crisis was resolved the moment David's identity was confirmed.

After a moment of silence outside the merchant ship, a violently trembling voice stammered.

T-The Eternal G-Golden Body?" a peak Infinity Rank space pirate muttered to himself.

His voice was small, but it was still audible to all the space pirates who were standing in complete

silence.

His words were like bombs thrown into calm water, immediately creating countless waves.

The originally very quiet scene became as noisy as a market after that.

The Eternal Golden Body was not accessible to everyone.

It was not that Eternals were rare, but they generally would not start wars.

Even if it happened, not everyone would dare to watch.

The Eternal Golden Body was a method that could destroy a world at will.

Peak Infinity Rankers or even partial Eternals would not dare to stand and watch so casually.

If they were not careful, they would face serious consequences or even death if they were roped into it.

Too many people would be affected and there would be too many accidental casualties in battles between Eternals.

At least ninety-nine percent of the people present had never seen the Eternal Golden Body.

Even if they had, it would be from afar.

This was definitely the first time they had such close contact with it.

Is this. Is this the Eternal Golden Body? It's Too majestic, too spectacular

"Right? I just heard about it before, but this time I finally saw it with my own eyes at such close proximity. It's so awe-inspiring

"When will I have such a glorious moment that I can hold partial Eternals in my hands like ants and feel their fear?"

"You? Don't even think about it! Eternal Realm is beyond what we can imagine! Even the leaders have been unable to break through the last half step."

I can always dream! Otherwise, what is the difference between me and trash?"

"Is this a dream? There should be a possibility of you achieving your dream, but since that is impossible, it's just a fantasy, okay?"
