

charlie didn't expect that the reason Dr. Simmons wanted to leave Aurous Hill was that he lost a bet with Serene Medical Clinic.

What's more, he didn't expect that the reason why this old man bet with others was to win a medicine cauldron for himself.

He asked with some doubts, "Miraculous Doctor Simmons, who made the bet with you?" "I don't know." Dr. Simmons replied, "That man is quite crazy. He only said his surname is Hong, and he is called Hong Tianshi."

"Master Hong?" charlie frowned suddenly when he heard these three words.

After Stefanie sun sent Grandpa Sanxuejiuxin Pill, charlie once heard her mention this name.

According to her, this person is a very senior Taoist priest in the American Chinese circle, known as Hong Tianshi, who is very close to her grandmother, and at that time, her grandfather was critically ill, so he made a special trip to treat her. dispute.

After seeing the efficacy of Scattering Blood and Rescuing Heart Pill, this person wanted to find the person who made the Scattering Blood and Rescuing Heart Pill. After hearing from his uncle Asher that there was a Rejuvenation Pill in Aurous Hill, he immediately decided to come to Aurous Hill to look for it. .

Stefanie sun specifically reminded herself at that time that she should be careful of this Hong Tianshi in the future, but she was still in the United States at the time, so she didn't take this person seriously.

But now it seems that this person has indeed come to Aurous Hill, and has found someone close to him.

He made a bet with Dr. Simmons. He didn't know whether he simply fell in love with Dr. Simmons's Serene Medical Clinic, or he had found out about himself, so he specially found an entry point from Dr. Simmons.

However, charlie wasn't nervous at all. In his opinion, a person who can be shocked by the Sanxue Rescue Heart Pill has no great ability to judge him. Take it to the dog farm.

The reason why charlie is so overbearing is not blind confidence, but some small details of the other party have penetrated his bottom.

If a person is horrified when he sees a Rolls-Royce, then the person's social status probably cannot afford a Rolls-Royce.

People who can really afford Rolls-Royce, even if they don't have Rolls-Royce, don't think Rolls-Royce is unattainable.

So, he asked Dr. Simmons, "Doctor Simmons, what have you compared with him?"

Dr. Simmons sighed, "He wants to compare his pulse with me, and he wants to randomly choose a female patient who has given birth for a test. There are three points in total. One point is to announce the actual age of the other party, and whoever is closest to the actual age will win; The opponent's number of pregnancies, whoever is closest to the actual number of times, wins... There are three rounds in total, and the two winners of the three rounds will finally win..." charlie couldn't help but said awkwardly, "Miracle

Doctor, let me make a digression, you two Is it inappropriate to guess a female patient's menstruation and pregnancy times in a doctor's competition?"

Dr. Simmons hastily explained, "Master Wade, you don't know, these have always been the content of ancient imperial doctors' competitions, although it sounds It is indeed a bit indecent, but in fact, because women have many more physiological stages than men, gynecology can best reflect the ability of a doctor to call the pulse

; Doctors at a higher level can guess the date of delivery of a pregnant woman through the pulse.

Doctors at a higher level can even tell how many times the other party has been pregnant and how many babies have been born. It is said that there are top imperial doctors who can even judge the fetus through the pulse. gender, but this kind of person has only been seen in ancient books."

"Okay." charlie sighed helplessly, and asked him, "Two out of three games, how many games did you lose?"

Dr. Simmons lowered his head, ashamed "Return to Mr. wade, the old man lost three rounds..."

charlie couldn't help frowning, "The other party is just a Taoist priest. As far as I know, his research is often on the way of alchemy. He shouldn't be too proficient in medical skills, right? Are you really going to lose three rounds to him?"

Dr. Simmons buried his head lower, and said, "I don't know why this Taoist priest has such outstanding medical skills, but the old man is indeed inferior to others..."

charlie asked again, "How did you choose the test object? Is there a possibility that this person arranged a patient to come over in advance, and then came to the door to kick the hall, proposed the test method, and then secretly colluded with you to win?" "

This ..." Dr. Simmons pondered for a moment, and murmured, "I have no evidence to prove it, but I don't rule out the possibility."
