

This barrage is completely formed by hundreds of thousands of 30mm close-in anti-aircraft shells covering the entire area. Sky screen. Moreover, each cannon can densely cover hundreds of square meters, and the three cannons cover each other, even if it is a fly, it is impossible to fly out of the barrage alive." He said, he

laughed, and said again, "I gave this system a very two-dimensional name, called Death's Kiss." Abbas's master Qiu Zhiyuan listened to him, and unconsciously felt a chill down his back. He felt that he couldn't even catch a single round of the big shells. If hundreds or even thousands of rounds were fired, Da Luo Jinxian would have to explain it here.

At this time, Abbas nodded in satisfaction, and asked him, "What if multiple targets appear at the same time?"

The weapon expert said, "If multiple targets appear at the same time, the system will issue an early warning. If you choose to fire, the system will lock the targets one by one in the order of the three-gun cooperation."

Then, the weapon expert further explained, "Because the shooting is very fast, basically it can be solved in less than a second. One target, so even if a dozen people come in at once, as long as you press the switch, the anti-aircraft guns will clean up one by one by themselves, and the battle will be resolved within 20 seconds." Then he said, "Let me simulate it for you

. Then, he picked up the walkie-talkie and said, "All the Xiaoqiguards ( Bickford guards ) who are waiting outside, come in together." As soon

as the words fell, more than a dozen Xiaoqiguards ( Bickford guards ) quickly broke into the second-level alert area, and a prompt popped up on the computer screen in front of Abbas .

The near-anti-cannon has locked on to the first Valiant Cavalier to enter, and the muzzle is constantly fine-tuned following his movement.

At this time, the weapon expert said to Abbas, "Hall Master, you can actually choose to fire now. The three close-in defense guns are not loaded. You can press and try. This set of close-in defense guns is not smart enough. If it is not loaded, it will be driven by the program to make an attack process."

Abbas nodded, and pressed the fire button, and then, the barrel of the close-in anti-aircraft gun behind him began to rotate rapidly, and then, the turret It also began to move quickly, and the barrel continued to rotate at high speed.

The turret aimed at more than a dozen targets one after another, the barrel idling, the whole process was very fast, only 20 seconds. If not, stop completely.

The weapon expert said with a smile, "For the close-in defense gun, it has simulated the entire attack on these dozen people just now, but it has not been loaded, so the barrel is just idling, but in its own eyes, it has already killed these targets all over again, if they are reloaded, and the dozen or so people are indeed intruders, the battle is over now, and we can start preparing to evacuate." "That's good." Wan

Abbasong He took a breath and said with a smile, "If this is the case, even if the four earls come together, I'm afraid they won't be able to escape.

” He does not wear the heavy armor of a main battle tank, but an ordinary light armored vehicle can penetrate a cup-sized hole with one shot. No matter how strong he is, he will meet the king of Hades after two shots. Let’s think he is really awesome Forced, it can carry twenty shells, which is a matter of one or two seconds. What’s more, our cannons are all at the commanding heights, and the cannon bodies are strong. It may be difficult for them to pose a threat to the cannons. Once we fire, they can only Being beaten passively, there is no other way but death.”

“Okay.” Abbas smiled slightly and said, “I will guard here for the time to come, and I will also control the system. ”

After that, he said to the master Qiu Zhiyuan next to him, “Master, it’s hard work for you to inform me that from this moment on, everyone is not allowed to leave the area of the copper mine for half a step.”

Qiu Zhiyuan immediately said, “OK, I will Command to go on!”

Abbas said to a subordinate next to him, “Let all the helicopters return to the freighters at the port and stand by 24 hours a day. Once they hear the sound of the guns, the helicopters will immediately take off and rush over to hoist the anti-aircraft guns. With the speed of these three close-in anti-aircraft guns, when the pilot hears the sound of the guns and starts the engine, the battle is over. They can fly here in five minutes, and this time is enough to explode the bolts to detonate, and make all preparations before hoisting Already.”

The subordinate immediately said, “Okay Palace Master, this subordinate will make arrangements immediately!”
