

## **Read I am a quadrillionaire chapter 2576**

I am a quadrillionaire chapter 2576-Using his right hand, Lufian grasped the red light beam that had pierced his forehead and painstakingly extracted it, bit by bit.

Although it was a slow process, he continued to pull it out steadily.

Fortunately, it hadn't penetrated very deep, so Lufian managed to remove it relatively quickly.

Blood flowed out between his eyebrows.

Lufian ignored it and let it drip onto his face.

He said with a malicious smile and a look of madness on his face, "Tsk, tsk, tsk... Is this the so-called method that the great Almighty uses? It's just so-so! Robotia scrap metal, what other trump cards do you have? Use them all on me and I will counter all of them. Otherwise, you won't have a chance when I finally take action!"

As he spoke, Lufian moved toward the egg.

His limbs were restricted so he could not move fast.

However, the red rays no longer restricted Lufian's actions completely.

Having retracted his golden body, Lufian was now the size of a normal human being.

Compared to the giant egg, he was much, much smaller.

However, this ant-sized figure made Mother of the Robotias feel extremely anxious.

It felt more dangerous than just now.

Lufian was like a different person.

Even the tone of his voice had changed.

The only thought in Mother's mind was not to let him get too close or it would be in danger.

Immediately after, it pulled out the red rays in Lufian's chest and stabbed Lufian again. The rays penetrated Lufian's body all over.

However, Lufian did not care about the damage done to his body at all. He did not stop but kept approaching the egg.

When he unleashed his violent personality, Lufian not only lost his calmness and rationality but it also appeared that the pain in his body had vanished.

Mother became even more panicked when it saw Lufian rushing toward her so desperately.

The treasure could release a total of 81 red rays to attack and restrain the enemy.

However, Mother was still too weak and not yet a Heavenly Overlord. Using 7 red light rays was already its limit. If it continued forcibly, its foundation would be damaged.

6 of the 7 rays were used to restrain Lufian's actions. Even if they could not completely restrain Lufian, they could at least delay him.

Otherwise, with the speed at which Heavenly Overlord Lufian displayed, he would be able to reach Mother almost instantly.

In other words, Mother only had 1 red light ray left to use now.

Stab! Stab! Stab!

Mother continued to use the red light rays to penetrate Lufian's body again and again.

In a short period, dozens of bloody holes appeared on Lufian's body.

Blood soaked Lufian's clothes, however, he was still unaffected.

Nothing could stop Lufian's speed. He was like a painless robot.

Facing this crazy human being, Mother panicked. It could only watch as the distance between the two became shorter and shorter.

Mother had a fierce look in its eyes. It said through gritted teeth, "Lufian, since you want to die, I will also go for broke. If worse comes to worst, we'll just die together!"

Woosh!

Three gaps appeared on the eggshell again and three red rays shot out from the gaps, heading straight for Lufian.

"Hahaha! Do you think you're worthy to die with me, you scrap metal? How delusional!" Lufian laughed wildly.

The three rays of light had appeared in front of him.

Lufian forcefully used his hands to grab one in each hand. Then, he caught the last one between his teeth.

Using ten red rays had already overwhelmed Mother and it could not add more rays.

"Pfft!"

A crisp voice sounded.

"You bastard, I'll kill you!" Lufian roared.

He suddenly stopped advancing.

Unknown to him, a red ray wrapped around Lufian's neck had come undone, and when Lufian could not move his hands, it found the right moment to pierce through his head.

The head was still one of the most important parts of every race.

The same for humans and other races.

The dozens of blood holes on the body were not as serious as this one to the head!
